## **NavData® Alert**

**!! URGENT !!**

**Date:** 19 Sep 2012

**Subject:** Nicaragua  
KABOG Compulsory Reporting Point  
Cycle 1210

***KABOG Nicaragua waypoint coordinates***

Jeppesen NavData for cycle 1210, effective 20 Sep 2012 contains incorrect coordinates for KABOG compulsory reporting point (CRP) on the B767 Enroute Airway (ER) record in Nicaragua. The incorrect KABOG waypoint coordinates results in an incorrect route bearing and distance between CRUTA CRP and 'PZA' VOR on B767.

**THEREFORE, DO NOT USE THE B767 ENROUTE AIRWAY (ER) RECORD BETWEEN CRUTA CRP AND 'PZA' VOR IN NAVDATA CYCLE 1210.**

Revised coding will appear in Jeppesen NavData for cycle 1211, effective 18 Oct 2012. Until then an entry will appear in the NavData Change Notices beginning 28 Sep 2012, and this Alert will be posted on the Jeppesen Web site (<http://www1.jeppesen.com/company/alerts/alerts.jsp>)

**WE STRONGLY URGE YOU TO MAKE THIS INFORMATION AVAILABLE TO  
APPROPRIATE CREW MEMBERS OR CUSTOMERS IMMEDIATELY!**

If you have questions concerning this NavData Alert, please contact Jeppesen Technical Support at:

Phone: 303-328-4445

E-mail: [navdatatechsupport@jeppesen.com](mailto:navdatatechsupport@jeppesen.com)

NavData Alerts are published to advise users of significant issues in Jeppesen navigation data which may affect flight operations or safety. They are distributed to affected ARINC 424 NavData users (avionics companies and other raw data users) and airlines receiving NavData directly from Jeppesen. Alerts are not distributed by Jeppesen to individual airline, business aviation or general aviation pilots, but are available to them on the Jeppesen Web site, [www.jeppesen.com](http://www.jeppesen.com). Different avionics equipment and computer systems use and display NavData and data derived from NavData differently. Avionics users should consult with their database update service provider for definitive information on whether their system is affected by this Alert.
