

JEPPESEN.
NavData® Alert

!! URGENT !!

Date: 3 Feb 2012

Subject: Canada / United States
North American Routes (NAR)
Cycle 1202

Route designation changes and re-alignments effective 9 FEB 2012

Jeppesen NavData for cycle 1202, effective 9 Feb 2012, contains out of date information. Canada AIRAC 42/11 revised the designation of some NAR routes, however these changes were not revised in cycle 1202. In addition, the same routes have been re-aligned. As a result, the following NAR routes are unusable in the 1202 Navdata cycle:

N171A, N183C, N185A, N258A, N280A, N296E, N306C, N344B, N352C, N354C, N386G, N398B, N428C, N432B, N468E, N494C, N514C.

THEREFORE, DO NOT USE NAVDATA FOR THESE NAR ROUTES IN CYCLE 1202.

Revised coding will appear in Jeppesen NavData for cycle 1203, effective 8 Mar 2012. Until then an entry will appear in the NavData Change Notices, and this Alert will be posted on the Jeppesen Web site ({ HYPERLINK "<http://ww1.jeppesen.com/company/alerts/alerts.jsp>" }).

WE STRONGLY URGE YOU TO MAKE THIS INFORMATION AVAILABLE TO APPROPRIATE CREW MEMBERS OR CUSTOMERS IMMEDIATELY!

If you have questions concerning this NavData Alert, please contact Jeppesen Technical Support at:

NavData Alerts are published to advise users of significant issues in Jeppesen navigation data which may affect flight operations or safety. They are distributed to affected ARINC 424 NavData users (avionics companies and other raw data users) and airlines receiving NavData directly from Jeppesen. Alerts are not distributed by Jeppesen to individual airline, business aviation or general aviation pilots, but are available to them on the Jeppesen Web site, www.jeppesen.com. Different avionics equipment and computer systems use and display NavData and data derived from NavData differently. Avionics users should consult with their database update service provider for definitive information on whether their system is affected by this Alert.
