

JEPPESEN.
NavData® Alert

!! URGENT !!

Date: 24 Apr 2012

Subject: Tonopah, Nevada
Tonopah (KTPH)
RNAV (GPS) RWY 15 [R15]
Cycles 1204 and 1205

Incorrect Approach Coding

Jeppesen NavData for cycles 1204 and 1205, effective 05 Apr 2012 and 03 May 2012 respectively, contains an incorrectly coded final approach transition on RNAV (GPS) RWY 15 [R15] at Tonopah; Tonopah, NV (KTPH). Turn point DOBZU was coded as a stepdown fix and may or may not be in your database depending on whether or not your database contains stepdown fixes.

THEREFORE, IF YOUR DATABASE DOES NOT CONTAIN TURN POINT DOBZU, DO NOT USE RNAV (GPS) RWY 15 [R15] IN CYCLES 1204 AND 1205 NAVDATA.

Revised coding will appear in Jeppesen NavData for cycle 1206, effective 31 May 2012. Until then an entry will appear in the NavData Change Notices beginning 4 May 2012, and this Alert will be posted on the Jeppesen Web site (<http://www.jeppesen.com/company/alerts/aviation-alerts>).

WE STRONGLY URGE YOU TO MAKE THIS INFORMATION AVAILABLE TO APPROPRIATE CREW MEMBERS OR CUSTOMERS IMMEDIATELY!

If you have questions concerning this NavData Alert, please contact Jeppesen Technical Support at:

Phone: 303-328-4445

E-mail: navdatatechsupport@jeppesen.com

NavData Alerts are published to advise users of significant issues in Jeppesen navigation data which may affect flight operations or safety. They are distributed to affected ARINC 424 NavData users (avionics companies and other raw data users) and airlines receiving NavData directly from Jeppesen. Alerts are not distributed by Jeppesen to individual airline, business aviation or general aviation pilots, but are available to them on the Jeppesen Web site, www.jeppesen.com. Different avionics equipment and computer systems use and display NavData and data derived from NavData differently. Avionics users should consult with their database update service provider for definitive information on whether their system is affected by this Alert.
