

JEPPESEN[®]

NavData[®] Alert

!! URGENT !!

Date: 02 Nov 2012

Subject: Praia, Cape Verde
Praia Intl (GVNP)
Approach procedures
Cycle 1211

Incorrect Approach procedures due to late incoming source

CAPE VERDE AIRAC AMDT 1/12, effective 18 OCT 12 was received after the date specified by ICAO for aeronautical information distribution. As a result, Jeppesen NavData for cycle 1211, effective 18 October 2012, contains incorrect Approach procedures at Praia Intl, Cape Verde (GVNP).

Approach Procedure	Instruction
VOR DME Rwy 03 [D03]	DO NOT USE
VOR DME Rwy 21 [D21]	DO NOT USE

Revised coding will appear in Jeppesen NavData for cycle 1212, effective 15 November 2012. Until then an entry will appear in the NavData Change Notices and this Alert will be posted on the Jeppesen Web site: <http://ww1.jeppesen.com/company/alerts/aviation-alerts.jsp?region=Africa>

WE STRONGLY URGE YOU TO MAKE THIS INFORMATION AVAILABLE TO APPROPRIATE CREW MEMBERS OR CUSTOMERS IMMEDIATELY!

E-mail: navdatatechsupport@jeppesen.com

NavData Alerts are published to advise users of significant issues in Jeppesen navigation data which may affect flight operations or safety. They are distributed to affected ARINC 424 NavData users (avionics companies and other raw data users) and airlines receiving NavData directly from Jeppesen. Alerts are not distributed by Jeppesen to individual airline, business aviation or general aviation pilots, but are available to them on the Jeppesen Web site, www.jeppesen.com. Different avionics equipment and computer systems use and display NavData and data derived from NavData differently. Avionics users should consult with their database update service provider for definitive information on whether their system is affected by this Alert.
