

JEPPESEN[®]

NavData[®] Alert

!! URGENT !!

Date: 11 March 2009

Subject: Multiple Air Force Bases
United States & Japan
Multiple Procedures
Cycle 0903

Procedures Unusable

Jeppesen receives much of its aeronautical information on U.S. Air Force (USAF) bases through Department of Defense publications that are released just prior to the effective date. The release schedule for those publications does not allow Jeppesen to update its database and charts in time for the effective date of new and changing information. Jeppesen NavData for cycle 0903, effective 12 March 2009 contains data for some USAF approach procedures that has not been updated for changes effective 12 March. **The affected procedures are listed below.**

THEREFORE, DO NOT USE THESE USAF PROCEDURES IN CYCLE 0903 NAVDATA.

Revised coding will appear in Jeppesen NavData for cycle 0904, effective 9 April 2009. Until then entries will appear in the NavData Change Notices beginning 20 March 2009, and this Alert will be posted on the Jeppesen Web site (<http://www.jeppesen.com/company/alerts/alerts-region.jsp?®ion=United+States>).

WE STRONGLY URGE YOU TO MAKE THIS INFORMATION AVAILABLE TO APPROPRIATE CREW MEMBERS OR CUSTOMERS IMMEDIATELY!

NavData Alerts are published to advise users of significant issues in Jeppesen navigation data which may affect flight operations or safety. They are distributed to affected ARINC 424 NavData users (avionics companies and other raw data users) and airlines receiving NavData directly from Jeppesen. Alerts are not distributed by Jeppesen to individual airline, business aviation or general aviation pilots, but are available to them on the Jeppesen Web site, www.jeppesen.com. Different avionics equipment and computer systems use and display NavData and data derived from NavData differently. Avionics users should consult with their database update service provider for definitive information on whether their system is affected by this Alert.
