

!! URGENT !!

Date: 25 June 2008

Subject: Phuket, Thailand
Phuket Intl (VTSP)
VOR Z RWY 09 [S09]
Cycle 0807

Incorrect Approach Procedure Data

As a result of receiving the Thailand AIP Supplement (A12/08) three days after the NavData cutoff, Jeppesen was unable to process the changes contained in that Supplement. Therefore, Jeppesen NavData for cycle 0807, effective 3 July 2008, contains incorrect approach procedure data for VOR Z RWY 09 [S09] at Phuket Intl airport; Phuket, Thailand (VTSP).

THEREFORE, FOR NAVDATA CYCLE 0807, DO NOT USE THE APPROACH PROCEDURE VOR Z RWY 09 [S09] FOR PHUKET INTL AIRPORT (VTSP)

Revised coding will appear in Jeppesen NavData for cycle 0808, effective 31 July 2008. Until then an entry will appear in the NavData Change Notices beginning with the 11 July 2008 revision, and this Alert will be posted on the Jeppesen Web site (www.jeppesen.com, click on Aviation Resources, On-line Publications, NavData NOTAMs/Alerts). The current chart 13-2 dated 2 Nov 07 will also be revised in the 11 July 08 revision. Between now and the 11 July 08 revision, the corrected chart will be available via Jeppesen HubWatch (www.jeppesen.com, click on Notices and Alerts, then HubWatch on the left hand side).

WE STRONGLY URGE YOU TO MAKE THIS INFORMATION AVAILABLE TO APPROPRIATE CREW MEMBERS OR CUSTOMERS IMMEDIATELY!

If you have questions concerning this NavData Alert, please contact Jeppesen Technical Support at:
Phone: 303-328-4445 Fax: 303-328-4122
E-mail: navdatatechsupport@jeppesen.com

NavData Alerts are published to advise users of significant issues in Jeppesen navigation data which may affect flight operations or safety. They are distributed to affected ARINC 424 NavData users (avionics companies and other raw data users) and airlines receiving NavData directly from Jeppesen. Alerts are not distributed by Jeppesen to individual airline, business aviation or general aviation pilots, but are available to them on the Jeppesen Web site, www.jeppesen.com. Different avionics equipment and computer systems use and display NavData and data derived from NavData differently. Avionics users should consult with their database update service provider for definitive information on whether their system is affected by this Alert.
