

JEPPESEN.
NavData® Alert

!! URGENT !!

Date: 16 November 2009

Subject: Hanoi, Vietnam
Noi Bai Intl (VVNB)
NDB Rwy 29R [N29R]
Cycles 0911 and 0912

Incorrect Vertical Descent Angle

Jeppesen NavData for cycles 0911 and 0912, effective 22 October 2009 and 19 November 2009 respectively, contains incorrect data for Noi Bai Intl; Hanoi, Vietnam (VVNB). The vertical descent angle is incorrect.

THEREFORE, DO NOT USE THE VERTICAL DESCENT ANGLE INFORMATION FOR APPROACH PROCEDURE NDB RWY 29R [N29R] IN CYCLES 0911 and 0912 NAVDATA.

Revised coding will appear in Jeppesen NavData for cycle 0913, effective 17 December 2009. Until then an entry will appear in the NavData Change Notices beginning 27 Nov 09, and this Alert will be posted on the Jeppesen Web site (<http://www.jeppesen.com/company/alerts/aviation-alerts.regionMiddleEastSouthAsia>).

WE STRONGLY URGE YOU TO MAKE THIS INFORMATION AVAILABLE TO APPROPRIATE CREW MEMBERS OR CUSTOMERS IMMEDIATELY!

If you have questions concerning this NavData Alert, please contact Jeppesen Technical Support at:

E-mail: navdatatechsupport@jeppesen.com

NavData Alerts are published to advise users of significant issues in Jeppesen navigation data which may affect flight operations or safety. They are distributed to affected ARINC 424 NavData users (avionics companies and other raw data users) and airlines receiving NavData directly from Jeppesen. Alerts are not distributed by Jeppesen to individual airline, business aviation or general aviation pilots, but are available to them on the Jeppesen Web site, www.jeppesen.com. Different avionics equipment and computer systems use and display NavData and data derived from NavData differently. Avionics users should consult with their database update service provider for definitive information on whether their system is affected by this Alert.

VVNB 0911 and 0912
