CLEAR, COOL WATER

It covers nearly three-fourths of our planet. And provides a vast, refreshing world of recreational opportunities. It's the liquid of life: H2O. And whether you're into fishing, cruising, diving, active watersports, or just getting away from the daily grind – when you want to make the most of every hour you spend on the water, trust Garmin to guide the way with the very best in detailed cartography.

For U.S. and Canada inland lakes and waterways, Garmin offers a variety of easy-to-use GPS mapping products. These electronic charts fit a wide spectrum of Garmin chartplotters and navigation devices, with displays styled to match the look of paper charts in digital electronic form. Coverage includes thousands of freshwater lakes – in all shapes and sizes – with helpful reference on nearby roads, boat ramps, campgrounds, marinas, and other recreational amenities. Sharp, colorful, graphics let you see every lake contour and feature with a minimum of panning and zooming to bring specific details into focus. And for easy data loading directly to your compatible plotter or portable GPS, Garmin offers plug-in versions of its Inland Lakes, Inland Lakes Vision™, and LakeMaster® cartography on pre-programmed microSD™ card with SD™ adapter. Plus, you can get Garmin data cards for U.S. Inland Lakes and LakeMaster - as well as DVD

versions for downloading from your computer. You can also go to the Garmin website (www.garmin.com) to preview and purchase downloads of these products online. In addition, such popular recreational spots as Lake Murray, SC, and Lake Winnepesaukee, NH, are now available separately as individual downloads from the Garmin website.

Compare the features, the detail, the value, quality and convenience: You'll see that nothing goes better with boats and water than these clear, cool cartography products from Garmin.

TABLE OF CONTENTS

2	Inland lakes	8	Canada Inland Lakes
4	Inland Lakes Vision™	10	Lake Murray, SC or Lake Winnepesaukee, NH
6	Lakemaster®	12	Which map is best for me?

INLAND LAKES

Navigate the lakes and channels you visit like a local with U.S. Inland Lakes mapping from Garmin on your GPS chartplotter or portable navigator. From small, local reservoirs to the biggest lakes, this comprehensive software offers coverage of over 16,900 freshwater bodies of water throughout the continental U.S. Full continental coverage available on plug-in microSD™ card with SD™ adapter, DVD, or via download onto a blank data card from www.garmin.com.

The microSD card and adapter make it easy to view the map data directly on your compatible Garmin device without using a computer. The DVD includes MapSource®, which provides the ability to view map data and do trip and waypoint planning on

your computer, while providing a “big picture” view of the lake before you venture onto the water. Downloading the DVD data to your Garmin unit requires a simple connection to your computer using a USB interface cable (sold separately).

For regional coverage, choose Inland Lakes Vision™. This product has the same features as U.S. Inland Lakes, but includes vision technology. The vision version is available as regionalized downloads only.

U.S INLAND LAKES HIGHLIGHTS* :

- Single product that offers detailed shoreline and bathymetric contours for over 16,900 freshwater lakes in the continental U.S.
- High-definition shoreline, underwater structure, and river and creek channels on select lakes
- Shows navigational aids, wrecks, obstructions and tides
- Includes rivers, perennial and seasonal streams
- Shows nearby interstates, highways and other road detail to get you to the water
- Displays marinas, fuel, boat ramps and campgrounds
- Searchable by lakes or by city
- Prices start at \$139.99 for nationwide coverage on DVD, microSD/SD card, or download. Regional Inland Lakes Vision downloads available starting at \$99.99

*NOTE: Not all lakes are covered; covered lakes may not contain all features listed.

INLAND LAKES VISION™

Available as five regional downloads from the Garmin website – Inland Lakes Vision™ is the most feature-rich freshwater mapping software Garmin has ever offered. When it comes to taking the guesswork out of navigation, nothing else even comes close.

In addition to all the standard cartography features of U.S. Inland Lakes, Inland Lakes Vision offers upgraded high-resolution aerial imagery for added realism on your map display. It also provides fast redraws and realistic depictions. Plus, on many of America's most popular lakes, the Vision software enables true 3-D MarinerEye perspective of your surroundings from above the waterline, as well as a unique 3-D FishEye underwater view depicting bathymetry data as realistic lake-bottom terrain.

This premium version of U.S. Inland Lakes, with capabilities enabled by Garmin Vision technology, brings even more detail, dimension and graphical sophistication to an elite group of Garmin chartplotters and navigators. See it, try it, experience it: You'll never look at freshwater mapping the same way again.

High-Resolution Satellite Imagery

On select lakes, you can use this feature to overlay satellite images on the land, water, or both. By selecting varying levels of opacity, you can customize how the satellite imagery will appear on your Garmin device.

When you download Inland Lakes Vision onto your compatible¹ high-end Garmin device, you will tremendously expand its full graphical capabilities—while bringing a fresh new perspective to your situational awareness.

The mapping is object-oriented, which means you can pan to an object on the chart and instantly view information about that point. Geo-referenced imagery lets you “navigate on the picture” with a dynamic presentation of your boat's current position. Plus, handy Auto Guidance technology scans relevant map features and obstructions to suggest the best passageway to your destination.

MarinerEye 3-D

Providing a bird's eye overhead perspective of your map position, this 3-D visual aid is especially helpful when navigating tricky coves, channels, bridges or other map features.

FishEye 3-D

This underwater perspective shows realistic lake bottom features and contours, based on bathymetric mapping data. You can customize the view to interface with sonar data as well.

Auto Guidance technology

Like a knowledge guide, Garmin Auto Guidance technology helps simplify navigation by searching the relevant map data to calculate and display the best route for safe passage.

LET'S COMPARE CAPABILITIES²:

U.S. INLAND LAKES

INLAND LAKES VISION

- Detailed shoreline and bathymetry for over 16,900 U.S. lakes
- High-definition shoreline and bathymetry on select lakes
- Includes rivers, streams, and channels
- Shows marinas, fuel, boat ramps and campgrounds
- Includes nearby highway and road detail
- Searchable by lake or by city
- High-resolution satellite imagery for select lakes
- 3-D MarinerEye
- 3-D FishEye
- Auto Guidance technology (suggested routings)

LAKEMASTER®

Our LakeMaster maps are basically the electronic form of the popular LakeMaster paper maps for the Great Lakes region. With amazing bottom detail and down to one foot contours for many lakes, LakeMaster can help you key in on prime fishing locations in Michigan, Minnesota, Wisconsin, the Dakotas, Iowa-Illinois, and in select lakes along the Canadian border. LakeMaster cartographic features include highly detailed shoreline data and amazing depth contours. It also features underwater structures and bottom information created from meticulous on-the-water surveys – along with advanced navigation aids, rivers, streams, channels, islands, bays, inlets, obstructions, campsites, boat ramps and access points, hazards, and aquatic vegetation, and more. LakeMaster maps also include full statewide highways and road coverage to help you navigate easily to and from the lake. LakeMaster is available on CD-ROM and preprogrammed microSD™ card with SD™

adapter for Minnesota, Michigan, Wisconsin, Iowa-Illinois, and the Dakotas. Lake of the Woods/Rainy Lake is available only on preprogrammed microSD™ card with SD™ adapter only.

To make things even more convenient, all of the above LakeMaster maps can also now be downloaded directly from the Garmin website. To find out more, check out the options at www.garmin.com

LAKEMASTER® HIGHLIGHTS¹:

- Provides detailed shoreline and depth contours
- Features one-foot bathymetric contours for many lakes
- Detailed map data created from on-the-water surveys
- Shows islands, reefs, points, bays, inlets, bottom conditions and more
- Offers zooming capabilities down to 80 feet in scale
- Includes nearby highway and road detail to get you to the water
- Prices start at \$107.13 per region

¹ NOTE: Not all lakes are covered; covered lakes may not contain all features listed.

CANADA INLAND LAKES

Navigate your favorite Canadian lake with our Canada Inland Lakes mapping and your compatible Garmin device. Garmin offers coverage of hundreds of freshwater lakes across the following regions of Canada: Ontario, Saskatchewan, Alberta, Yukon, and British Columbia. Many lakes contains detailed bathymetric contour coverage in addition to spot soundings, islands, reefs, points, bays, and bottom information.

Canada Inland Lakes is available on microSD™ card with SD™ adapter or may be downloaded from our website (www.garmin.com) onto a blank data card. Simply choose your region and use your computer plus high-speed internet access to load your desired region onto a blank data card.

Next, plug the card into your compatible Garmin device and you are ready to hit the water. It's easy to see that our Garmin marine team is committed to making freshwater navigation as safe, smart, and convenient as today's technology will allow. No wonder Garmin Inland Lakes cartography is fast becoming the benchmark of boating.

CANADA INLAND LAKES HIGHLIGHTS¹:

- Coverage of freshwater lakes throughout Ontario, Saskatchewan, Alberta, Yukon, or British Columbia
- Includes coverage of lakes that extend into neighboring provinces and/or U.S. states
- Detailed shoreline, bathymetric contours and spot soundings
- Islands, reefs, points, bays, and bottom information points (where available)
- Searchable by lakes or by city
- Ontario region includes coverage for Lake Ontario, Huron and Erie on the Canadian side
- Prices start at \$116.65 per region

¹ NOTE: Not all lakes are covered; covered lakes may not contain all features listed.

LAKE MURRAY, SC OR LAKE WINNIPESAUKEE, NH

If you desire, Garmin inland waters mapping products offer you the flexibility to add comprehensive coverage of Lake Murray, SC or Lake Winnepesaukee, NH with exceptional detail, including contour lines, high-definition shoreline and bathymetric detail.

This map also contains navigational aids, boat ramps, landing sites, and major roads and highways.

LAKE MURRAY, SC OR LAKE WINNIPESAUKEE, NH HIGHLIGHTS¹:

- Exceptional bathymetric coverage of Lake Murray, SC or Lake Winnepesaukee, NH.
- High-definition shoreline, underwater structure, and river and creek channels
- Shows navigational aids and bottom conditions, where available
- Includes rivers, perennial, and seasonal streams
- Shows nearby interstates, highways, and other road detail immediately surrounding the lake
- Displays marinas, fuel, boat ramps and campgrounds
- Searchable by lake or by city name
- Prices start at \$9.99 per lake

¹ NOTE: Lakes listed above may not contain all features listed.

WHICH MAP FORMAT IS BEST FOR ME?

Inland Lakes maps for your Garmin GPS unit are sold in a variety of formats – DVD/CD-ROM, preprogrammed microSD™ card with SD™ adapter, or via internet download. Please see below for the benefits of each format:

DVD/CD-ROM: Maps purchased in this format will require the use of a computer, but will allow you to plan trips on your computer and transfer waypoints, routes and tracks to your GPS device. The installation process will install the mapping and the MapSource® application to your computer. MapSource can then be used to send maps to either your device or a data card. Please note that LakeMaster mapping products in this format are unlocked to a single device and they are non-transferable. See www.garmin.com for compatible units.

microSD™ card with SD™ adapter: Pre-programmed data cards are immediately ready to use. Simply unpack the card and insert it into your compatible GPS device. These maps do not need to be unlocked to your device which allows you to move the card to multiple units if desired, however you will not have access to the maps on your computer. See www.garmin.com for compatible units.

Download: Maps purchased in this format can be downloaded directly from the Garmin website. This is the quickest method of getting mapping for your next trip. Downloaded maps can be sent to either your GPS unit or a blank data card. All maps in this format are unlocked to a specific device and they can only be used on the device that they were unlocked to. Similar to the pre-programmed data cards, this mapping is not available on your computer for use in planning routes.
