

Company Name: ABC Cutting Contractors, Inc.
Location: Indianapolis, Indiana
Industry: Cutting Contractor

ABC Concrete Cutting in Indianapolis uses Universal Tracking Solutions and Garmin to manage their fleet by keeping track of driver's positions, real-time, and verifying arrivals, departures, speeds, and idling. Additionally, drivers are dispatched easily by simply entering the stop destination into the web interface. The system then sends the destination directly in cab to the drivers Garmin Personal Navigation Device (PND), at which point the driver can accept the stop and begin navigating. All the while, the Garmin sends feedback to UTS including destination status and ETA. Also, dispatchers can communicate directly in cab to the driver(s) with 2-way messaging.

Universal Tracking Solutions (UTS) is an enterprise solutions based provider of telemetry and GPS fleet management systems. UTS and its partners provide state of the art Fleet Management Solutions to organizations of all kinds managing fleets from vehicles to heavy equipment to Trailers. The web based application is built to suit the needs of most organizations seeking to increase safety, and overall operational efficiencies. The application is ever growing and continues to be enhanced as new technologies arise. Universal Tracking Solutions is committed to providing second to none service and the most advanced GPS fleet management technology at an ultra competitive price.

- Fully Incorporated robust fleet management solution
- Estimated time of arrival capability

Testimonial
 "We have been using the Universal Tracking Solution and the Garmin PND's to not only keep track of our drivers but to also communicate in cab with the driver. The ability to send a destination to a driver remotely from the UTS website and then have the driver be routed instantly is extremely helpful. We have been able to reduce drive times and improve overall efficiency."
