

EXPERIMENTAL PRODUCTS SIZING GUIDE

We want you to have a great experience with the planning of your new Garmin G3X™ Touch panel or upgrade for your current avionics installation. Now that you've downloaded the PDF Sizing Guide file onto your computer, you can print out actual-size images of any of the products for use in visualizing how you want your experimental or amateur-built aircraft cockpit to look. Just make sure the printer scale is set to 100% before you hit the "print" button. Then mix-and-match the full-size printouts of your product choices to create the layout that perfectly fits your panel, your priorities, and your price range.
