# FLEET MANAGEMENT AND SCHEDULING

**FltPlan.com**
A Garmin Company

Flight departments, charter operators and other fleet managers face a lot of challenges today. Just keeping track of all the aircraft, pilot schedules, trip requests, maintenance intervals, training and other record-keeping requirements can be challenging to say the least. But fortunately there's technology from the FltPlan.com team at Garmin that can streamline, integrate and simplify all the functions and logistics that go into running a safe, efficient flight operation. FltPlan solutions give you the tools you need to make fleet management a lot more user friendly.

## FLEET MANAGEMENT SIMPLIFIED

FltPlan Manager is an integrated, web-based program that leverages the power and accuracy of FltPlan.com to offer insight into, and control of your fleet from a single administrative account.

Department heads, schedulers and dispatchers have immediate visibility to scheduled flights, including filing status, EDCT information, flight tracking data and more. Plus, they can access individual aircraft accounts when flight plan changes are required. The system's web-based platform makes it easy to access reliable, real-time data from any device at any time.

In addition, administrators can post messages, upload documents and live track their fleets, viewing details such as departure/arrival airports, aircraft type, time en route, and both filed and amended routes. Aircraft performance profiles, ICAO data, and weight and balance parameters are controlled at the administrative level to avoid potential errors and unauthorized changes. A unique FltPlan.com account is created for each aircraft. Pilots simply log into the aircraft account to which they are assigned for each trip.

## SMART FLIGHT SCHEDULING

Providing 360-degree coverage from initial trip requests to postflight reporting, the FltLogic scheduling program offers a comprehensive suite of features for scheduling and managing flights, aircraft flight plans, airport and FBO information, crew duty times, passenger manifests, trip expenses and more.

FltLogic is the only flight scheduling program that integrates with FltPlan.com. And it also integrates with FlightBridge™ services for hotel, rental car, limousine and catering reservations. It's never been so easy to access so many trip support resources from one trusted source.
