

ChartView Feature Activation Instructions

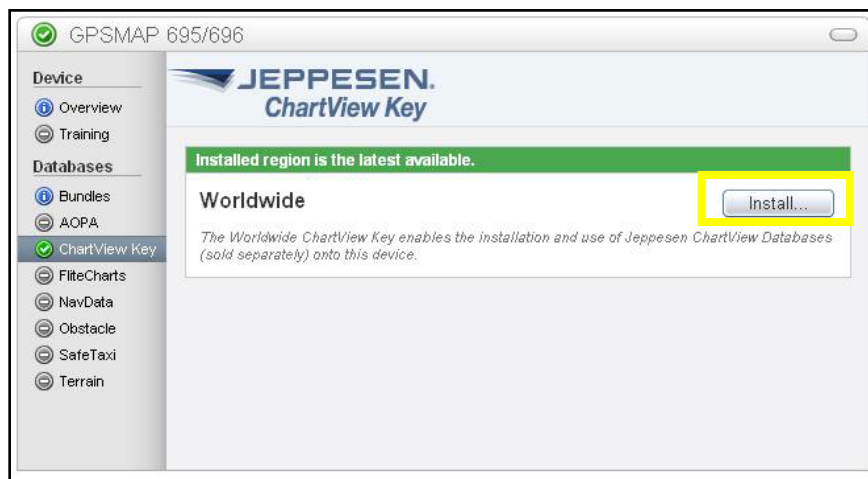

1. Update the 695/696 to software v4.0 or above using the WebUpdater using the instructions [here](#).
2. Login to fly.garmin.com. Select the Portables tab and “add a new portable device” or select the GPSMAP 695/696 to be updated if you are a returning customer.

3. Select the ChartView Key under the Databases heading and select the “Buy Feature” button.

4. After the feature has been purchased, turn on the GPSMAP 695/696, connect it to your computer and select the “Install...” button to load the ChartView configuration to your unit.

5. Navigate to the Jeppesen website to purchase the desired chart database.
