Getting Started

WARNING

See the Important Safety and Product Information guide in the product box for product warnings and other important information.

- Update the maps and software on your device (Updating Maps and Software with Garmin Express, page 1).
- Mount the device in your vehicle and connect it to power (Connecting the Device to Vehicle Power, page 2).
- Acquire GPS signals (Acquiring GPS Signals, page 2).
- Adjust the volume (Adjusting the Volume, page 3) and display brightness (Adjusting the Screen Brightness, page 3).
- Navigate to your destination (Starting a Route, page 4).

Product Updates

On your computer, install Garmin Express™ (www.garmin.com/express).

This provides easy access to these services for Garmin® devices:
- Software updates
- Map updates
- Product registration

Updating Maps and Software with Garmin Express

You can use Garmin Express software to download and install the latest map and software updates for your device. Map updates provide the latest available mapping data to ensure your device continues to calculate accurate and efficient routes to your destinations. Garmin Express is available for Windows® and Mac® computers.

1 On your computer, go to www.garmin.com/express.

2 Select an option:
   - To install on a Windows computer, select Download for Windows.
   - To install on a Mac computer, select Download for Mac.

3 Open the downloaded file, and follow the on-screen instructions to complete the installation.

4 Start Garmin Express.

5 Connect your Garmin device to your computer using a USB cable.

6 Click Add a Device.

The Garmin Express software detects your device.

7 Click Add Device.

8 Follow the on-screen instructions to add your device to the Garmin Express software.

9 Select an option:
   - To install all available updates, click Install All.
   - To install a single update, click View Details and select an update.

The Garmin Express software downloads and installs the updates onto your device. Map updates are very large, and this process may take a long time on slower Internet connections.

### Garmin DriveSmart 70 Device Overview

1. Power key
2. Mini-USB power and data port
3. Map and data memory card slot
4. Microphone for Voice Command or hands-free calling

### Connecting the Device to Vehicle Power

**WARNING**

This product contains a lithium-ion battery. To prevent the possibility of personal injury or product damage caused by battery exposure to extreme heat, store the device out of direct sunlight.

Before you use your device on battery power, you should charge it.

1. Plug the vehicle power cable 1 into the USB port on the device.

### Turning the Device On or Off

- To turn the device on, press the power key, or connect the device to power.
- To put the device in power saving mode, press the power key while the device is on.
  
  While in power saving mode, the screen is off and the device uses very little power, but it can wake instantly for use.
  
  **TIP:** You can charge your device faster by putting it in power saving mode while charging the battery.
- To turn off the device completely, hold the power key until a prompt appears on the screen, and select **Off**.
  
  The prompt appears after five seconds. If you release the power key before the prompt appears, the device enters power saving mode.

### Acquiring GPS Signals

When you turn on your navigation device, the GPS receiver must collect satellite data and establish the current location. In the status bar indicates the satellite signal strength. The time required to acquire satellite signals varies based on several factors, including how far you are from the location where you last used your navigation device, whether you have a clear view of the sky, and how long it has been since you last used your navigation device. The first time you turn on your navigation device, it may take several minutes to acquire satellite signals.

1. Turn on the device.
2. Wait while the device locates satellites.
3. If necessary, go outdoors to an open area, away from tall buildings and trees.

When the GPS signal status icon turns green, the device has acquired satellite signals and is ready for navigation.

### Status Bar Icons

The status bar is located at the top of the main menu. The status bar icons display information about features on the device. You can select some icons to change settings or view additional information.

<table>
<thead>

</tbody>
</table>
Adjusting the Volume
On-screen buttons allow you to navigate the pages, menus, and menu options on your device.

• Select \( \rightarrow \) to return to the previous menu screen.
• Hold \( \rightarrow \) to quickly return to the main menu.
• Select \( \uparrow \) or \( \downarrow \) to scroll through lists or menus.
• Hold \( \uparrow \) or \( \downarrow \) to scroll faster.
• Select \( \equiv \) to see a context-based menu of options for the current screen.

Enabling Automatic Volume
Your device can increase or decrease the volume automatically based on the level of background noise.

1 Select Volume.
2 Select an option:
   • Use the slider bar to adjust the volume.
   • Select \( \equiv \) to mute the device.
   • Select \( \equiv \) for additional options.

Using the Audio Mixer
You can use the audio mixer to set the volume levels for different audio types, such as navigation prompts or phone calls. The level for each audio type is a percentage of the master volume.

1 Select Volume > Audio Mixer.
2 Use the sliders to adjust the volume for each audio type.

Adjusting the Screen Brightness
1 Select Settings > Display > Brightness.
2 Use the slider bar to adjust the brightness.

Driver Awareness Features and Alerts

The driver alerts and speed limit features are for information only and do not replace your responsibility to abide by all posted speed limit signs and to use safe driving judgment at all times. Garmin is not responsible for any traffic fines or citations you receive for failing to follow all applicable traffic laws and signs.

Your device provides features that can help encourage safer driving and increase efficiency, even when you are driving in a familiar area. The device plays an audible tone or message and displays information for each alert. You can enable or disable the audible tone or message for each type of alert. Not all alerts are available in all areas.

School zone or nearby school: The device plays a tone and displays the distance to and speed limit (if available) for an upcoming school or school zone.

Speed limit reduction: The device plays a tone and displays the upcoming reduced speed limit so you can be prepared to reduce your speed.

Speed limit exceeded: The device plays a tone and displays a red border on the speed limit icon when you exceed the posted speed limit for the current road.

Wrong way on a one-way street: The device plays a message and displays a full-screen warning if you travel the wrong way on a one-way street. The edges of the screen appear red and an alert remains at the top of the screen until you leave the one-way street or correct your direction of travel.

Railroad crossing: The device plays a tone and displays the distance to an upcoming railroad crossing.

Animal crossing: The device plays a tone and displays the distance to an upcoming animal crossing area.

Curve: The device plays a tone and displays the distance to a curve in the road.

Slower traffic: The device plays a tone and displays the distance to slower traffic when you approach slower traffic at a higher speed. Your device must be receiving traffic information to use this feature. (Receiving Traffic Data Using a Traffic Receiver, page 11).

Fatigue warning: The device plays a tone and suggests upcoming rest stops after you have been driving for more than two hours without stopping.

Enabling or Disabling Audible Driver Alerts
You can turn off individual audible driver alerts. The visual alert appears even when the audible alert is disabled.

1 Select Settings > Map & Vehicle > Audible Driver Alerts.
2 Select or clear the check box next to each alert.

Red Light and Speed Cameras

NOTICE
Garmin is not responsible for the accuracy of or the consequences of using a red light or speed camera database.

NOTE: This feature is not available for all regions or product models.

Information about red light and speed camera locations is available in some areas for some product models. The device alerts you when you approach a reported speed or red light camera.

• Live red light and safety camera data is available as a subscription from Garmin Live Services using the Smartphone Link app. (Garmin Live Services, page 14).
• To maintain an updated database of red light and speed camera locations, your device must have an active subscription to download and store safety camera data. Go to garmin.com/speedcameras to check availability and compatibility, or to purchase a subscription or one-time update. You can purchase a new region or extend an existing subscription at any time.

NOTE: In some regions, some product bundles include pre-loaded red light and speed camera data with subscription-free updates.

• You can use the Garmin Express software (garmin.com /express) to update the camera database stored on your device. You should update your device frequently to receive the most up-to-date camera information.
Navigating to Your Destination

Routes
A route is a path from your current location to one or more destinations.

- The device calculates a recommended route to your destination based on the preferences you set, including the route calculation mode (*Changing the Route Calculation Mode, page 5*) and avoidances (*Avoiding Delays, Tolls, and Areas, page 6*).
- You can start navigating to your destination quickly using the recommended route, or you can select an alternate route (*Starting a Route, page 4*).
- If there are specific roads you need to use or avoid, you can customize the route (*Shaping Your Route, page 5*).
- You can add multiple destinations to a route (*Adding a Location to Your Route, page 4*).

Starting a Route
1 Select Where To?, and search for a location (*Finding and Saving Locations, page 7*).
2 Select a location.
3 Select an option:
   - To start navigating using the recommended route, select Go!.
   - To choose an alternate route, select ¥, and select a route. Alternate routes appear to the right of the map.
   - To edit the course of the route, select ¥ > Edit Route, and add shaping points to the route (*Shaping Your Route, page 5*).

The device calculates a route to the location and guides you using voice prompts and information on the map (*Your Route on the Map, page 4*). A preview of the major roads in your route appears at the edge of the map for several seconds.

If you need to stop at additional destinations, you can add the locations to your route (*Adding a Location to Your Route, page 4*).

Starting a Route by Using the Map
You can start route by selecting a location from the map.
1 Select View Map.
2 Drag and zoom the map to display the area to search.
3 If necessary, select Q to filter the displayed points of interest by category.
   Location markers ( or a blue dot) appear on the map.
4 Select an option:
   - Select a location marker.
   - Select a point, such as a street, intersection, or address location.
5 Select Go!.

Going Home
The first time you start a route home, the device prompts you to enter your home location.
1 Select Where To? > Go Home.
2 If necessary, enter your home location.

Editing Your Home Location
1 Select Where To? > > Set Home Location.
2 Enter your home location.

Your Route on the Map
As you travel, the device guides you to your destination using voice prompts and information on the map. Instructions for your next turn or exit, or other actions appear across the top of the map.

Active Lane Guidance
As you approach a turn while navigating a route, a detailed simulation of the road appears beside the map, if available. A colored line indicates the proper lane for the turn.

Viewing Turns and Directions
While navigating a route, you can view upcoming turns, lane changes, or other directions for your route.
1 From the map, select an option:
   - To view upcoming turns and directions as you navigate, select ¥ > Turns.
     The map tool displays the next four turns or directions beside the map. The list updates automatically as you navigate the route.
   - To view the complete list of turns and directions for the entire route, select the text bar at the top of the map.
2 Select a turn or direction (optional).
   Detailed information appears. An image of the junction may appear for junctions on major roadways, if available.

Viewing the Entire Route on the Map
1 While navigating a route, select anywhere on the map.
2 Select .

Adding a Location to Your Route
Before you can add a location to your route, you must be navigating a route (*Starting a Route, page 4*).
You can add locations to the middle or end of your route. For example, you can add a fuel station as the next destination in your route.

**TIP:** To create complex routes with multiple destinations or scheduled stops, you can use the trip planner to plan, schedule, and save a trip (*Planning a Trip*, page 5).

1. From the map, select > Where To?.
2. Search for a location (*Finding and Saving Locations*, page 7).
3. Select a location.
4. Select Go!
5. Select an option:
   - To add the location as the next destination in your route, select Add As Next Stop.
   - To add the location to the end of your route, select Add As Last Stop.
   - To add the location and edit the order of destinations in your route, select Add to Active Route.

The device re-calculates the route to include the added location and guides you to the destinations in order.

**Shaping Your Route**

Before you can shape your route, you must start a route (*Starting a Route*, page 4).

You can manually shape your route to change its course. This allows you to direct the route to use a certain road or go through a certain area without adding a destination to the route.

1. Touch anywhere on the map.
2. Select Ω.
   The device enters route shaping mode.
3. Select a location on the map.
   **TIP:** You can select ‼ to zoom in on the map and select a more precise location.
   The device recalculates the route to travel through the selected location.
4. If necessary, select an option:
   - To add more shaping points to the route, select additional locations on the map.
   - To remove a shaping point, select ⊎.
5. When you are finished shaping the route, select Go!

**Taking a Detour**

You can take a detour for a specified distance along your route or detour around specific roads. This is useful if you encounter construction zones, closed roads, or poor road conditions.

1. From the map, select ‖ > Change Route.
   **TIP:** If the Change Route tool is not in the map tools menu, you can add it (*Enabling Map Tools*, page 10).
2. Select an option:
   - To detour your route for a specific distance, select Detour by Distance.
   - To detour around a specific road on the route, select Detour by Road.
   - To find a new route, select Detour.

**Stopping the Route**

From the map, select ‖ > Stop.

**Changing the Route Calculation Mode**

2. Select an option:
   - Select Faster Time to calculate routes that are faster to drive but can be longer in distance.
   - Select Off Road to calculate point-to-point routes (without roads).
   - Select Shorter Distance to calculate routes that are shorter in distance but can take more time to drive.

**Trip Planner**

You can use the trip planner to create and save a trip, which you can navigate later. This can be useful for planning a delivery route, a vacation, or a road trip. You can edit a saved trip to further customize it, including reordering locations, optimizing the order of stops, adding scheduling information, and adding shaping points.

You can also use the trip planner to edit and save your active route.

**Planning a Trip**

A trip can include many destinations, and it must include at least a starting location and one destination. The starting location is the location from which you plan to start your trip. If you start navigating the trip from a different location, the device gives you the option to route to your starting location first. For a round trip, the starting location and final destination can be the same.

1. Select Apps > Trip Planner > ‖ > Create Trip.
2. Select Select Start Location.
3. Choose a location for your starting point, and select Select.
4. Select Select Destination.
5. Choose a location for a destination, and select Select.
6. Select Add Location to add more locations (optional).
7. After you have added all the necessary locations, select Next > Save.
8. Enter a name, and select Done.

**Navigating to a Saved Trip**

1. Select Apps > Trip Planner.
2. Select a saved trip.
3. Select Go!
4. Select the first location to navigate to, and select Start.
   The device calculates a route from your current location to the selected location and then guides you to the remaining trip destinations in order.

**Optimizing the Order of Destinations in a Trip**

The device can automatically optimize the order of destinations in your trip to create a shorter, more efficient route. The starting location and final destination are not changed when you optimize the order.

While editing a trip, select ‖ > Optimize Order.

**Editing and Reordering Locations in a Trip**

1. Select Apps > Trip Planner.
2. Select a saved trip.
3. Select a location.
4. Select an option:
   - To move the location up or down, select ‼, and drag the location to a new position in the trip.
   - To add a new location after the selected location, select ‡.
   - To remove the location, select ⊎.

**Editing and Saving Your Active Route**

If a route is active, you can use the trip planner to edit and save your route as a trip.

1. Select Apps > Trip Planner > My Active Route.
Avoiding Delays, Tolls, and Areas

Avoiding Traffic Delays on Your Route
Before you can avoid traffic delays, you must be receiving traffic information (Receiving Traffic Data Using a Traffic Receiver, page 11).

By default, the device optimizes your route to avoid traffic delays automatically. If you have disabled this option in the traffic settings (Traffic Settings, page 17), you can view and avoid traffic delays manually.

1 While navigating a route, select \(\,
\) > Traffic.

2 Select Alternate Route, if available.
3 Select Go!

Avoiding Toll Roads
Your device can avoid routing you through areas that require tolls, such as toll roads, toll bridges, or congestion areas. The device may still include a toll area in your route if no other reasonable routes are available.

1 Select Settings > Navigation.
2 Select an option:
   - Select Toll Roads.
   - Select Tolls and Fees > Toll Roads.
3 Select an option:
   - To be asked each time before routing through a toll area, select Always Ask.
   - To always avoid tolls, select Avoid.
   - To always allow tolls, select Allow.
4 Select Save.

Avoiding Toll Stickers
NOTE: This feature is not available in all areas.
The map data on your device may contain detailed toll sticker information for some countries. You can avoid or allow toll stickers for each country.

1 Select Settings > Navigation > Tolls and Fees > Toll Stickers.
2 Select a country.
3 Select an option:
   - To be asked each time before routing through a toll area, select Always Ask.
   - To always avoid tolls, select Avoid.
   - To always allow tolls, select Allow.
4 Select Save.

Avoiding Road Features
1 Select Settings > Navigation > Avoidances.
2 Select the road features to avoid on your routes, and select Save.

Avoiding Environmental Zones
Your device can avoid areas with environmental or emissions restrictions that may apply to your vehicle.

1 Select Settings > Navigation > Environmental Zones.
2 Select an option:
   - To be asked each time before routing through an environmental zone, select Always Ask.
   - To always avoid environmental zones, select Avoid.
   - To always allow environmental zones, select Allow.
3 Select Save.

Custom Avoidances
Custom avoidances allow you select specific areas or sections of road to avoid. When the device calculates a route, it avoids these areas and roads unless no other reasonable route is available.

Avoiding a Road
1 Select Settings > Navigation > Custom Avoidances.
2 Select Add Avoid Road.
3 Select the starting point of the section of road to avoid, and select Next.
4 Select the ending point of the road section, and select Next.
Finding and Saving Locations

The maps loaded in your device contain locations, such as restaurants, hotels, auto services, and detailed street information. The Where To? menu helps you find your destination by providing several methods to browse, search, and save this information.

- Enter search terms to quickly search all location information (Finding a Location Using the Search Bar, page 7).
- Browse or search pre-loaded points of interest by category (Points of Interest, page 7).
- Search and check into Foursquare® points of interest (Searching Foursquare Points of Interest, page 8).
- Use search tools to find specific locations, such as addresses, intersections, or geographic coordinates (Search Tools, page 8).
- Search near a different city or area (Changing the Search Area, page 7).
- Save your favorite locations to find them quickly in the future (Saving Locations, page 9).
- Return to recently found locations (Viewing Recently Found Locations, page 8).

Finding a Location Using the Search Bar
You can use the search bar to search for locations by entering a category, brand name, address, or city name.

1 Select Where To?.
2 Select Enter Search in the search bar.
3 Enter all or part of the search term.

Suggested search terms appear below the search bar.

4 Select an option:
- To search for a type of business, enter a category name (for example, “movie theaters”).
- To search for a business name, enter all or part of the name.
- To search for an address near you, enter the house number and street name.
- To search for an address in another city, enter the house number, street name, city, and state.
- To search for a city, enter the city and state.
- To search for coordinates, enter latitude and longitude coordinates.

5 Select an option:
- To search using a suggested search term, select the term.
- To search using the text you entered, select Q.

6 If necessary, select a location.

Viewing Search Results on the Map
You can view the results of a location search on the map instead of in a list.

1 From the location search results, select to.

The nearest location in your search results appears on the map. Indicates the locations of other search results.

2 Select one or more options:
- To view more search results, touch and drag the map.
- To select another location, select .
- To view details and routes for the selected location, select the location description at the bottom of the map.
- To start navigation to the selected location, select Go!

Changing the Search Area
By default, the device searches near your current location. You can also search other areas, such as near your destination, near another city, or along your active route.

1 Select Where To?.
2 Select Searching near:
3 Select an option.

Points of Interest
A point of interest is a place that you may find useful or interesting. Points of interest are organized by category and can include popular travel destinations such as gas stations, restaurants, hotels, and entertainment venues.

Finding a Location by Category
1 Select Where To?.
2 Select a category, or select Categories.
3 If necessary, select a subcategory.
4 Select a location.

Searching Within a Category
After you have performed a search for a point of interest, certain categories may display a Quick Search list that shows the last four destinations you selected.

1 Select Where To? > Categories.
2 Select a category.
3 Select an option:
- Select a destination from the quick search list on the right side of the screen.

The quick search list provides a list of recently found locations in the selected category.

Avoiding an Area
You can disable a custom avoidance without deleting it.

1 Select Settings > Navigation > Custom Avoidances.
2 Select an avoidance.
3 Select Disable.

Deleting Custom Avoidances
1 Select Settings > Navigation > Custom Avoidances.
2 Select an option:
- To delete all custom avoidances, select X.
- To delete one custom avoidance, select the avoidance, and select > Delete.

Navigating Off Road
If you are not following roadways as you navigate, you can use Off Road mode.

1 Select Settings > Navigation.
2 Select Calculation Mode > Off Road > Save.

The next route will be calculated as a straight line to the location.

Finding and Saving Locations
Navigating to Points of Interest Within a Venue

**NOTE:** This feature may not be available in all areas or for all product models.

You can create a route to a point of interest (POI) within a larger venue, such as a store in a shopping mall or a specific terminal in an airport.

1. Select Where To? > Enter Search.
2. Select an option:
   - To search for the venue, enter the name or address of the venue, select $Q$, and go to step 3.
   - To search for the POI, enter the name of the POI, select $Q$, and go to step 5.
3. Select the venue.
   A list of categories appears below the venue, such as restaurants, car rentals, or terminals.
4. Select a category.
5. Select the POI, and select Go!.

The device creates a route to the parking area or venue entrance closest to the POI. When you arrive at the destination, a checkered flag indicates the recommended parking area. A labeled point indicates the location of the POI within the venue.

Exploring a Venue

You can view a list of all points of interest located within each venue.

1. Select a venue.
2. Select $i$ > Explore this Venue.

Foursquare

Foursquare is a location-based social network. Your device includes pre-loaded Foursquare points of interest, which are indicated by the Foursquare logo in your location search results.

For additional features, you can connect to your Foursquare account using Smartphone Link on your compatible smartphone. When you connect to your Foursquare account using Smartphone Link, you can view Foursquare location details, check in to a location, and search for points of interest in the online Foursquare database.

Searching Foursquare Points of Interest

You can search for Foursquare points of interest loaded on your device. When you connect to your Foursquare account using Smartphone Link, the search provides the most up-to-date results from the online Foursquare database and customized results from your Foursquare user account.

Select Where To? > Categories > Foursquare®.

Connecting to Your Foursquare Account

1. Connect your device to Smartphone Link (Pairing with Your Phone and Connecting to Smartphone Link, page 12).
2. On your smartphone, open the Smartphone Link app.
3. Open the Smartphone Link app settings, and select Foursquare® > Login.
4. Enter your Foursquare login information.

Viewing Foursquare Location Details

Before you can view Foursquare location details, you must connect to a supported phone running Smartphone Link and log in to your Foursquare account.

You can view detailed Foursquare location information, such as user ratings, restaurant pricing information, and hours of operation.

1. From the location search results, select a Foursquare point of interest.
2. Select $i$.

Checking in with Foursquare

Before you can check in with Foursquare, you must connect to a supported phone running Smartphone Link and log in to your Foursquare account.

1. Select Apps > Foursquare® > Check In.
2. Select a point of interest.
3. Select $i$ > Check In.

Search Tools

Search tools allow you to search for specific types of locations by responding to on-screen prompts.

Finding an Address

NOTE: The order of the steps may change depending on the map data loaded on your device.

1. Select Where To?.
2. If necessary, select $\text{Searching near}$: to search near a different city or area.
3. Select Address.
4. Follow the on-screen instructions to enter address information.
5. Select the address.

Finding an Intersection

You can search for an intersection or junction between two streets, highways, or other roads.

2. Follow the on-screen instructions to enter street information.
3. Select the intersection.

Finding a City

2. Select an option:
   - Select a city from the list of nearby cities.
   - To search near another location, select $\text{Searching near}$: (Changing the Search Area, page 7).
   - To search for a city by name, select Enter Search, enter a city name, and select $Q$.

Finding a Location Using Coordinates

You can find a location using latitude and longitude coordinates. This can be helpful when geocaching.

2. If necessary, select $\wedge$, and change the coordinate format or datum.
3. Enter the latitude and longitude coordinates.
4. Select View on Map.

Viewing Recently Found Locations

Your device stores a history of the last 50 locations you have found.

1. Select Where To? > Recent.

Clearing the List of Recently Found Locations

Select Where To? > Recent $\rightarrow$ Clear $\rightarrow$ Yes.

Finding Your Last Parking Spot

When you disconnect the device from vehicle power while the device is on, your current location is saved as a parking spot.

Select Apps > Last Spot.
Finding Emergency Services and Fuel
You can use the Where Am I? page to find the nearest hospitals, police stations, and fuel stations.

1 From the map, select the vehicle.
2 Select Hospitals, Police Stations, Fuel, or Roadside Assist.

NOTE: Some service categories are not available in all areas.
A list of locations for the selected service appears, with the nearest locations at the top.

3 Select a location.
4 Select an option:
   • To navigate to the location, select Go!.
   • To view the phone number and other location details, select 📞.

Getting Directions to Your Current Location
If you need to tell another person how to get to your current location, your device can give you a list of directions.

1 From the map, select the vehicle.
2 Select 📍 > Directions to Me.
3 Select a starting location.
4 Select Select.

Adding a Shortcut
You can add shortcuts to the Where To? menu. A shortcut can point to a location, a category, or a search tool.
The Where To? menu can contain up to 36 shortcut icons.

1 Select Where To? > Add Shortcut.
2 Select an item.

Removing a Shortcut

1 Select Where To? > 📍 > Remove Shortcut(s).
2 Select a shortcut to remove.
3 Select the shortcut again to confirm.
4 Select Save.

Assigning Categories to a Saved Location
You can add custom categories to organize your saved locations.

NOTE: Categories appear in the saved locations menu after you have saved at least 12 locations.

1 Select Where To? > Saved.
2 Select a location.
3 Select 📚.
4 Select 📍 > Edit > Categories.
5 Enter one or more category names, separated by commas.
6 If necessary, select a suggested category.
7 Select Done.

Deleting a Saved Location
NOTE: Deleted locations cannot be recovered.

1 Select Where To? > Saved.
2 Select 📍 > Delete Saved Places.
3 Select the box next to the saved locations to delete, and select Delete.

Using the Map
You can use the map to navigate a route (Your Route on the Map, page 4) or to view a map of your surroundings when no route is active.

1 Select View Map.
2 Touch anywhere on the map.
3 Select an option:
   • Drag the map to pan left, right, up, or down.
   • To zoom in or out, select 🕵️
   • To switch between North Up and 3-D views, select 🌌.
   • To filter the displayed points of interest by category, select 📚.
   • To start a route, select a location on the map, and select Go! (Starting a Route by Using the Map, page 4).

Map Tools
Map tools provide quick access to information and device functions while you view the map. When you activate a map tool, it appears in a panel at the edge of the map.

Stop: Stops navigation of the active route.
Change Route: Allows you to take a detour or skip locations in your route.
Up Ahead: Displays upcoming locations along the route or the road on which you are traveling (Up Ahead, page 10).
Turns: Displays a list of upcoming turns in your route (Viewing Turns and Directions, page 4).
Trip Data: Displays customizable trip data, such as speed or mileage (Viewing Trip Data from the Map, page 10).
Volume: Adjusts the master audio volume.
Brightness: Adjusts the screen brightness.
Phone: Displays a list of recent phone calls from your connected phone, and displays in-call options while a phone call is active (Using In-Call Options, page 15).
Traffic: Displays traffic conditions along your route or in your area (Viewing Upcoming Traffic, page 10).
Weather: Displays weather conditions for your area.
photoLive: Displays live traffic cameras from your photoLive subscription (photoLive Traffic Cameras, page 16).
Report Camera: Allows you to report a speed or red light camera. This tool is available only when you have speed or red light camera data on your device and you have an active connection to the Smartphone Link app (Pairing With Your Phone and Connecting to Smartphone Link, page 12).

Customizing the Up Ahead Categories
You can change the location categories that appear in the Up Ahead tool.
1 From the map, select > Up Ahead.
2 Select a category.
3 Select the category.
4 Select an option:
   • To move a category up or down in the list, select and drag the arrow next to the category name.
   • To change a category, select the category.
   • To create a custom category, select a category, select Custom Search, and enter the name of a business or category.
5 Select Done.

Trip Information
Viewing Trip Data from the Map
Before you can view trip data on the map, you must add the tool to the map tools menu (Enabling Map Tools, page 10).
   From the map, select > Trip Data.
Customizing the Trip Data Fields
Before you can customize the data that appears in the trip data map tool, you must add the trip data tool to the map tools menu (Enabling Map Tools, page 10).
   1 From the map, select > Trip Data.
   2 Select a trip data field.
   3 Select an option.
      The new trip data field appears in the trip data map tool.

Viewing the Trip Information Page
The trip information page displays your speed and provides statistics about your trip.
NOTE: If you make frequent stops, leave the device turned on, so it can accurately measure elapsed time during the trip.
   From the map, select Speed.

Viewing the Trip Log
Your device keeps a trip log, which is a record of the path you have traveled.
   1 Select Settings > Map & Vehicle > Map Layers.
   2 Select the Trip Log check box.

Resetting Trip Information
1 From the map, select Speed.
2 Select > Reset Field(s).
3 Select an option:
   • When not navigating a route, select Select All to reset every data field except the speedometer, on the first page.
   • Select Reset Trip Data to reset the information on the trip computer.
   • Select Reset Max. Speed to reset the maximum speed.
   • Select Reset Trip B to reset the odometer.

Viewing Upcoming Traffic
You can view traffic incidents coming up along your route or along the road on which you are traveling.
   1 While navigating a route, select > Traffic.
      The nearest upcoming traffic incident appears in a panel on the right side of the map.
   2 Select the traffic incident to view additional details.

Viewing Traffic on the Map
The traffic map shows color-coded traffic flow and delays on nearby roads.
   1 From the main menu, select Apps > Traffic.
   2 If necessary, select > Legend to view the legend for the traffic map.

Searching for Traffic Incidents
   1 From the main menu, select Apps > Traffic.
   2 Select > Incidents.
   3 Select an item in the list.
4 If there is more than one incident, use the arrows to view additional incidents.

**Customizing the Map**

**Customizing the Map Layers**
You can customize which data appear on the map, such as icons for points of interest and road conditions.

1 Select **Settings > Map & Vehicle > Map Layers**.
2 Select the layers to include on the map, and select **Save**.

**Changing the Map Data Field**
1 From the map, select a data field.
   - **NOTE:** You cannot customize Speed.
2 Select a type of data to display.

**Changing the Map Perspective**
1 Select **Settings > Map & Vehicle > Driving Map View**.
2 Select an option:
   - Select **Track Up** to display the map in two dimensions (2-D), with your direction of travel at the top.
   - Select **North Up** to display the map in 2-D with north at the top.
   - Select **3-D** to display the map in three dimensions.
3 Select **Save**.

---

**Traffic Data**

**NOTICE**
Garmin is not responsible for the accuracy or timeliness of the traffic information.

Traffic data is not available in all areas or for all product models. For information about traffic receivers and coverage areas, go to [www.garmin.com/traffic](http://www.garmin.com/traffic).

To avoid traffic delays, your device must receive live traffic data.
- If your device includes a traffic receiver, it can receive traffic data from an over-the-air broadcast signal, where available.
- An FM traffic receiver is included in product models ending with LT or LMT.
- A digital traffic receiver is included in product models ending with LMT-D or LMTHD.

---

**Receiving Traffic Data Using a Traffic Receiver**

**NOTICE**
Heated (metallized) windshields could degrade the performance of the traffic receiver.

If your device includes a traffic receiver, it can receive traffic data from an over-the-air broadcast signal, where available. This feature is not available in all areas or for all product models.

**NOTE:** In some areas, traffic information may be received from FM radio stations using HD Radio™ technology.

1 Verify your device includes a traffic receiver.
   - An FM traffic receiver is included in product models ending with LT or LMT.

---

**Receiving Traffic Data Using Smartphone Link**
The Live Traffic service provides real-time traffic data.

1 Download Smartphone Link onto your compatible phone ([Downloading Smartphone Link](#), page 13).
2 Subscribe to the Live Traffic service ([Subscribing to Garmin Live Services](#), page 14).
3 Connect the device to the phone running Smartphone Link ([Pairing with Your Phone and Connecting to Smartphone Link](#), page 12).

**About Traffic Subscriptions**
You can purchase additional subscriptions or a renewal if your subscription expires. Go to [http://www.garmin.com/traffic](http://www.garmin.com/traffic).

**Viewing Traffic Subscriptions**
Select **Settings > Traffic > Subscriptions**.

**Adding a Subscription**
You can purchase traffic subscriptions for other regions or countries.

1 From the main menu, select **Traffic**.
2 Select **Subscriptions > +**.
3 Write down the FM traffic receiver unit ID.
4 Go to [www.garmin.com/fmtraffic](http://www.garmin.com/fmtraffic) to purchase a subscription and get a 25-character code.
5 Select **Next** on the device.
6 Enter the code.
7 Select **Done**.

**Enabling Traffic**
You can enable or disable traffic data.

1 Select **Settings > Traffic**.
2 Select the **Traffic** check box.

---

**Voice Command**

**NOTE:** Voice command is not available for all languages and regions, and may not be available on all models.

**NOTE:** Voice Activated Navigation may not achieve desired performance when in a noisy environment.

Voice command allows you to use your device by saying words and commands. The voice command menu provides voice prompts and a list of available commands.

**Setting the Wakeup Phrase**
The wakeup phrase is a word or phrase you can say to activate voice command. The default wakeup phrase is Voice Command.

**TIP:** You can reduce the chance of accidental voice command activation by using a strong wakeup phrase.
1 Select Apps > Voice Command > Wake Up Phrase.
2 Enter a new wakeup phrase.
   The device indicates the strength of the wakeup phrase as you enter the phrase.
3 Select Done.

**Activating Voice Command**
Say your wakeup phrase.
The voice command menu appears.

**Voice Command Tips**
• Speak in a normal voice directed at the device.
• Reduce background noise, such as voices, or the radio, to increase the accuracy of the voice recognition.
• Speak commands as they appear on the screen.
• Respond to voice prompts from the device as needed.
• Increase the length of your wakeup phrase to reduce the chance of accidental voice command activation.
• Listen for two tones to confirm when the device enters and exits voice command.

**Starting a Route Using Voice Command**
You can say the names of popular, well-known locations.
1 Say your wakeup phrase (Setting the Wakeup Phrase, page 11).
2 Say Find Place.
3 Listen for the voice prompt, and speak the name of the location.
4 Say the line number.
5 Say Navigate.

**Muting Instructions**
You can disable the voice prompts for voice command without muting the device.
1 Select Apps > Voice Command > Mute Instructions.
2 Select Mute Instructions > Enabled.

**Voice Control**
For regions where the Voice Command feature is unavailable, the Voice Control feature is activated. Voice Control allows you to use your voice to control the device. Before you can use the Voice Control feature, you must configure it for your voice.

**Configuring Voice Control**
The Voice Control feature must be configured for a single user's voice and does not work for other users.
1 Select Apps > Voice Control.
2 Follow the on-screen instructions to record commands for each voice control phrase.
   **NOTE:** You do not have to read the exact phrase on the screen. You may say an alternative command with the same meaning based on your preference.

To use a voice control feature, you must say the command you recorded for the feature.

**Using Voice Control**
1 Say the command you recorded for the Voice Control phrase.
   The voice control menu appears.
2 Follow the on-screen instructions.

**Voice Control Tips**
• Speak in a normal voice directed at the device.
• Reduce background noise, such as voices, or the radio, to increase the accuracy of the voice recognition.
• Speak commands as they appear on the screen.
• Listen for a tone to confirm when the device successfully receives a command.

**Bluetooth Connected Features**
The device has several Bluetooth connected features for your compatible smartphone. Some features require you to install the Smartphone Link app on your smartphone. Go to garmin.com/smartphonelink for more information.

**Hands-Free Calling:** Allows you to place and receive phone calls using your device, and allows you to use the device as a hands-free speaker phone. If the selected language supports the voice command feature, you can place calls using voice commands.

**Notifications:** Displays phone notifications and messages on your device. This feature is not available for all languages.

**Send Locations to Device:** Allows you to send locations from your smartphone to your navigation device.

**Foursquare Check In:** Allows you to check into Foursquare locations using your navigation device.

**Weather updates:** Sends real-time weather conditions and alerts to your device.

**Garmin Live Services:** Provides subscription-based services to view live data on your device, such as traffic conditions, parking, and advanced weather forecasts.

**Pairing with Your Phone and Connecting to Smartphone Link**
You must pair your Garmin DriveSmart device with your phone to use Bluetooth features. After the devices are paired, they connect automatically when they are turned on and within range.

Some features require the Smartphone Link app. You can connect to the Smartphone Link app during the pairing process or later.
1 From the app store on your phone, install the Smartphone Link app (optional).
2 Place the Garmin DriveSmart device and your phone within 3 m (10 ft.) of each other.
3 On the Garmin DriveSmart device, select Settings > Bluetooth, and fill the Bluetooth check box.
4 Select Search for Devices.
5 On your phone, enable Bluetooth wireless technology, and set the phone to be discoverable.
6 See your phone owner’s manual for more information.
7 Select your phone from the list, and select OK.
8 On your phone, confirm the pairing request.
9 On your phone, open the Smartphone Link app (optional).
   If you are pairing with an Apple® device, a security code appears on the Garmin DriveSmart screen.
10 If necessary, enter the security code on your phone within 30 seconds.

**Bluetooth Feature Status Icons**
Status icons appear in the Bluetooth settings next to each paired phone.
Select Settings > Bluetooth.
• A gray icon indicates the feature is disabled or disconnected for that phone.
• A colored icon indicates the feature is connected and active for that phone.

| Hands-free calling | Smart notifications | Smartphone Link features and services |

**Setting Up Bluetooth Features for Your Apple Device**

By default, all compatible Bluetooth features are enabled when you pair your phone. You can enable, disable, or customize certain features.

**Connecting to the Smartphone Link App on Your Apple Device**

Before you can connect to the Smartphone Link app, you must pair and connect your Garmin DriveSmart device with your phone.

If you did not connect to the Smartphone Link app during the pairing process, you can connect to it for additional Bluetooth features. The Smartphone Link app communicates with your phone using Bluetooth Smart technology. The first time you connect to the Smartphone Link app on an Apple device, you must enter a Bluetooth Smart security code.

1. From the app store on your phone, install the Smartphone Link app.
2. On your phone, open the Smartphone Link app.
   - A security code appears on the Garmin DriveSmart device screen.
3. On your phone, enter the code.

**Disabling Hands-Free Calling for Your Device**

You can disable hands-free calling and remain connected to your phone for hands-free calling.

1. Select **Settings > Bluetooth**.
2. Select the phone name used for hands-free calling.
   - **TIP:** Your phone may connect to hands-free calling and data using two different names. appears colored next to the phone name used for hands-free calling.
3. Clear the **Phone calls** check box.

**Disabling Smartphone Link Data and Smart Notifications for Your Apple Device**

You can disable Smartphone Link data and smart notifications and remain connected to your phone for hands-free calling.

1. Select **Settings > Bluetooth**.
2. Select the phone name connected to Smartphone Link data and notifications.
   - **TIP:** Your phone may connect to hands-free calling and data using two different names. and appear blue next to the phone name used for data and notifications.
3. Clear the **Smartphone Services** check box.

**Showing or Hiding Notification Categories for Your Apple Device**

You can filter the notifications shown on your device by showing or hiding categories.

1. Select **Settings > Bluetooth**.
2. Select the phone name connected to Smartphone Link data and notifications.
   - **TIP:** Your phone may connect to hands-free calling and data using two different names. and appear colored next to the phone name used for data and notifications.
3. Select **Smart Notifications**.
4. Select the check box next to each notification to show.

**Setting Up Bluetooth Features for Your Smartphone with Android™**

By default, all compatible Bluetooth features are enabled when you pair your phone. You can enable, disable, or customize certain features.

**Connecting to the Smartphone Link App on Your Android Smartphone**

Before you can connect to the Smartphone Link app, you must pair and connect your Garmin DriveSmart device with your phone.

If you did not connect to the Smartphone Link app during the pairing process, you can connect to it for additional Bluetooth features.

1. From the app store on your phone, install the Smartphone Link app.
2. On your phone, open the Smartphone Link app.

**Disabling Bluetooth Features for Your Smartphone with Android**

You can disable specific Bluetooth features and remain connected to other features.

1. Select **Settings > Bluetooth**.
2. Select the phone name.
3. Select an option:
   - To disable hands-free calling, clear the **Phone calls** check box.
   - To disable Smartphone Link data and smart notifications, clear the **Smartphone Link** check box.
   - To disable specific app notifications, use the settings in the Smartphone Link app.

**Showing or Hiding Notifications for Your Smartphone with Android**

You can use the Smartphone Link app to select which types of notifications appear on your Garmin DriveSmart device.

1. On your phone, open the Smartphone Link app.
2. Select ☰.
3. Verify the **Smart Notifications** check box is selected.
4. From the **Notifications** section, select **Settings**.
   - A list of notification categories and apps appears.
5. Select an option:
   - To enable or disable a notification, select the toggle switch next to the category or app name.
   - To add an app to the list, select ✪.

**Smartphone Link**

Smartphone Link is a phone application that allows you to synchronize location data with your phone and access live information using your phone data connection. Your device transfers data from Smartphone Link using Bluetooth wireless technology. Live information is available through free and subscription-based plans from Garmin Live Services (Garmin Live Services, page 14).

Saved locations and recently found locations are synchronized with your phone each time your device connects to Smartphone Link.

**Downloading Smartphone Link**

Smartphone Link is available for some smartphones. Go to www.garmin.com/smartphonelink or see the application store for your phone for compatibility and availability information.
Download Smartphone Link from the application store on your supported phone. 
See your phone owner's manual for information on downloading and installing applications.

Sending a Location from Your Phone to Your Device
Smartphone Link is registered as a navigation application on your phone.
1. From your phone, select the button to start navigating to a location (see the owner's manual for your phone).
2. From the application menu, select Smartphone Link. 
The next time you connect your device to your phone, the location is transferred to the recently found items on your device.

Garmin Live Services
Before you can use Garmin Live Services, your device must be connected to a supported phone running Smartphone Link (Pairing with Your Phone and Connecting to Smartphone Link, page 12).

Connecting to Smartphone Link provides access to Garmin Live Services. Garmin Live Services provides free and subscription-based plans to view live data on your device, such as traffic conditions and weather. Some services, like weather, are available as separate apps on your device. Other services, like traffic, enhance the existing navigation features on your device. Features that require access to Garmin Live Services display the Smartphone Link symbol and appear only when the device is connected to Smartphone Link.

Subscribing to Garmin Live Services
Before you can subscribe to Garmin Live Services, you must install the Smartphone Link app on your phone.
1. Start the Smartphone Link app on your phone (Pairing with Your Phone and Connecting to Smartphone Link, page 12).
2. Select My Account.
   A list of services and subscription prices appears.
3. Select a service.
4. Select the price.
5. Select Subscribe.
6. Follow the on-screen instructions.

Smart Notifications
While your device is connected to the Smartphone Link app, you can view notifications from your smartphone on your Garmin DriveSmart device, such as text messages, incoming calls, and calendar appointments.

NOTE: You may need to wait a few minutes to receive notifications on your navigation device after it connects to the Smartphone Link app. appears colored in the Bluetooth settings when smart notifications are connected and active (Bluetooth Feature Status Icons, page 12).

Receiving Notifications
NOTE: If you are viewing the map, notifications appear in a map tool.
• To ignore a notification, select OK.
   The popup closes, but the notification remains active on your phone.
• To view a notification, select View.
• To listen to the notification, select View > Play.
The device reads the notification using text-to-speech technology. This feature is not available for all languages.
• To perform additional actions, such as dismissing the notification from your phone, select View, and select an option.

NOTE: Additional actions are available for only some notification types and must be supported by the app generating the notification.

Receiving Notifications while Viewing the Map
NOTICE
Do not read or reply to notifications while driving.

Before your Garmin DriveSmart device can receive notifications, you must connect it to your smartphone and to the Smartphone Link app.

When you are viewing the map, new notifications appear in a map tool at the edge of the screen. If the device is moving, you must verify you are a passenger and not the driver before you can view notifications.
• To ignore a notification, select X.
   The popup closes, but the notification remains active on your phone.
• To view a notification, select the notification text.
• To listen to the notification, select Play Message.
The device reads the notification using text-to-speech technology. This feature is not available for all languages.
• To listen to the notification using a voice command, say Play Message.

NOTE: This option is available only when the selected language supports the voice command feature and appears in the map tool.
• To perform additional actions, such as dismissing the notification from your phone, select View, and select an option.

NOTE: Additional actions are available for only some notification types and must be supported by the app generating the notification.

Viewing the List of Notifications
You can view a list of all active notifications.
1. Select Apps > Smart Notifications.
   The list of notifications appears. Unread notifications appear black, and previously read notifications appear gray.
2. Select an option:
   • To view a notification, select the notification description.
   • To listen to a notification, select .
     The device reads the notification using text-to-speech technology. This feature is not available for all languages.

Hands-Free Calling
NOTE: While most phones are supported and can be used, it cannot be guaranteed that a particular phone can be used. All features may not be available for your phone.

Using Bluetooth wireless technology, your device can connect to your mobile phone to become a hands-free device. While connected, you can place or receive calls using your device.
Placing a Call

Dialing a Number
1. Select Apps > Phone > Dial.
2. Enter the number.
3. Select Dial.

Calling a Contact in Your Phone Book
Your phone book is loaded from your phone to the device each time your phone and the device connect. It may take a few minutes for the phone book to be available. Some phones do not support this feature.
1. Select Apps > Phone > Phone Book.
2. Select a contact.
3. Select Call.

Calling a Location
1. Select Apps > Phone > Browse Categories.
2. Select a point of interest.
3. Select Call.

Receiving a Call
When you receive a call, select Answer or Ignore.

Using the Call History
Your call history is loaded from your phone to the device each time your phone and the device connect. It may take a few minutes for the call history to be available. Some phones do not support this feature.
1. Select Apps > Phone > Call History.
2. Select a category.
   A list of calls appears, with the most recent calls at the top.
3. Select a call.

Using In-Call Options
While on a call, you can select in-call options from the map.
• To transfer audio to your phone, select ☎️.
  TIP: You can use this feature if you want to turn off your device and remain on the call, or if you need privacy.
• To use the dial pad, select ☎️.
  TIP: You can use this feature to use automated systems, such as voice mail.
• To mute the microphone, select ✪.
• To hang up, select ✦.

Saving a Home Phone Number
TIP: After you save a home number, you can edit the home number by editing “Home” in your list of saved locations (Editing a Saved Location, page 9).
1. Select Apps > Phone > ☎️ > Set Home Number.
2. Enter your phone number.
3. Select Done.

Calling Home
Before you can call home, you must enter a phone number for your home location.
Select Apps > Phone > Call Home.

Disconnecting a Bluetooth Device
You can temporarily disconnect a Bluetooth device without deleting it from the paired devices list. The Bluetooth device can connect to your Garmin DriveSmart device automatically in the future.
1. Select Settings > Bluetooth.
2. Select the device to disconnect.
3. Clear the check box next to the name of your paired device.

Deleting a Paired Phone
You can delete a paired phone to prevent it from automatically connecting to your device in the future.
1. Select Settings > Bluetooth.
2. Select the phone, and select Unpair device.

Using the Apps

Viewing Help Files
Select Apps > Help to view the full owner’s manual.

Searching Help Topics
Select Apps > Help > Q.

Viewing the Weather Forecast
Before you can use this feature, your device must be receiving weather data. You can connect your device to the Smartphone Link app to receive weather data (Pairing with Your Phone and Connecting to Smartphone Link, page 12). In some areas, product models that include a digital traffic receiver can receive area weather information from an over-the-air digital traffic signal (Traffic Data, page 11). Weather forecasts are not available in all areas.
1. Select Apps > Weather.
   The device shows the current weather conditions and a forecast for the next several days.
2. Select a day.
   The detailed forecast for that day appears.

Viewing Weather Near a Different City
1. Select Apps > Weather > Current City.
2. Select an option:
   • To view weather for a favorite city, select a city in the list.
   • To add a favorite city, select Add City, and enter a city name.

Viewing the Weather Radar
Before you can use this feature, you must purchase Advanced Weather service using Smartphone Link.

Viewing Weather Alerts
Before you can use this feature, you must purchase Advanced Weather service using Smartphone Link.

Checking Road Conditions
Before you can use this feature, you must purchase Advanced Weather service using Smartphone Link.
**Savings a Traffic Camera**

Before you can use this feature, you must subscribe to the photoLive service, and your device must be connected to a supported phone running Smartphone Link (Smartphone Link, page 13).

This feature is not available in all areas.

1. Select Apps > photoLive.
2. Select Touch to Add.
3. Select a road.
4. Select an intersection.
5. Select Save.

**Viewing a Traffic Camera**

Before you can view a traffic camera, you must save a traffic camera (Saving a Traffic Camera, page 16).

1. Select Apps > photoLive.
2. Select a camera.

**Viewing Previous Routes and Destinations**

Before you can use this feature, you must enable the travel history feature (Device and Privacy Settings, page 17).

You can view your previous routes and places you have stopped on the map.

- Select Apps > Where I've Been.

---

**Customizing the Device**

**Map and Vehicle Settings**

Select Settings > Map & Vehicle.

- Vehicle: Sets the icon that represents your position on the map.
- Driving Map View: Sets the perspective on the map.
- Map Detail: Sets the level of detail on the map. More detail may cause the map to draw slower.
- Map Theme: Changes the color of the map data.
- Map Tools: Sets the shortcuts that appear in the map tools menu.
- Map Layers: Sets the data that appears on the map page (Customizing the Map Layers, page 11).
- Auto Zoom: Automatically selects the zoom level for optimal use of your map. When disabled, you must zoom in or out manually.
- myMaps: Sets which installed maps the device uses.

**Enabling Maps**

You can enable map products installed on your device.

**Tip:** To purchase additional map products, go to http://buy.garmin.com.

2. Select a map.

**Navigation Settings**

Select Settings > Navigation.

- Route Preview: Shows a preview of the major roads in your route when you start navigation.
- Calculation Mode: Sets the route calculation method.
- Fatigue Warning: Alerts you when you have been driving for a long period without a break.

**Avoidances:** Sets road features to avoid on a route.

**Custom Avoidances:** Allows you to avoid specific roads or areas.

**Environmental Zones:** Sets the avoidance preferences for areas with environmental or emissions restrictions that may apply to your vehicle.

**Toll Roads:** Sets preferences for avoiding toll roads.

**Tolls and Fees:** Sets preferences for avoiding toll roads and toll stickers.

**NOTE:** This feature is not available in all areas.

**Restricted Mode:** Disables all functions that require significant operator attention and could become a distraction while driving.

**GPS Simulator:** Stops the device from receiving a GPS signal, and saves battery power.

**Calculation Mode Settings**

Select Settings > Navigation > Calculation Mode.

The route calculation is based on road speeds and vehicle acceleration data for a given route.

- Faster Time: Calculates routes that are faster to drive but can be longer in distance.
- Shorter Distance: Calculates routes that are shorter in distance but can take more time to drive.
- Off Road: Calculates a direct line from your location to your destination.

**Setting a Simulated Location**

If you are indoors or not receiving satellite signals, you can use the GPS to set a simulated location.

2. From the main menu, select View Map.
3. Tap the map twice to select an area.
   - The address of the location appears at the bottom of the screen.
4. Select the location description.
5. Select Set Location.

**Backup Camera Settings**

The backup camera settings allow you to manage paired Garmin backup cameras and camera settings. This menu appears on your navigation device only when the device is connected to a wireless camera receiver cable. See the owner's manual for your backup camera for detailed information about pairing cameras and camera settings. Go to garmin.com/babycam to purchase a Garmin backup camera.

Select Settings > Backup Camera, and select a paired camera.

**Unpair:** Removes the paired camera. You must pair the camera again before you can view it using this device and cable.

**Rename:** Allows you to rename the paired camera.

**Guidance Lines:** Shows or hides guidance lines and allows you to adjust the position of the guidance lines.

**babyCam Settings**

The babyCam settings allow you to manage paired Garmin babyCam™ cameras and camera settings. This menu appears on your navigation device only when the device is connected to a wireless camera receiver cable. See the owner's manual for your camera for detailed information about pairing cameras and camera settings. Go to garmin.com/babycam to purchase a Garmin babyCam camera.

Select Settings > babyCam, and select a paired camera.

**Power Settings:** Allows you to set the amount of time the video appears on the screen.
Flip Video: Allows you to flip or mirror the video.
Alignment: Displays the babyCam video to help you align the camera.
Check Seat Reminder: Enables a reminder to check for rear seat passengers before exiting the vehicle.
Unpair: Removes the paired camera.
Rename: Allows you to rename the paired camera.

**Bluetooth Settings**
Select Settings > Bluetooth.
Bluetooth: Enables Bluetooth wireless technology.
Search for Devices: Searches for nearby Bluetooth devices.
Friendly Name: Allows you to enter a friendly name that identifies your device on other devices with Bluetooth wireless technology.

Disabling Bluetooth
1. Select Settings > Bluetooth.
2. Select Bluetooth.

**Display Settings**
Select Settings > Display.
Orientation: Allows you to set the display to portrait (vertical) or landscape (horizontal).
Color Mode: Allows you to select day or night color mode. If you select the Auto option, the device automatically switches to day or night colors based on the time of day.
Brightness: Allows you to adjust the display brightness.
Display Timeout: Allows you to set the amount of idle time before your device enters sleep mode while using battery power.
Screenshot: Allows you to take a picture of the device screen. Screenshots are saved in the Screenshot folder of the device storage.

**Traffic Settings**
From the main menu, select Settings > Traffic.
Traffic: Enables traffic.
Current Provider: Sets the traffic provider to use for traffic data. The Auto option selects the best available traffic data automatically.
Subscriptions: Lists the current traffic subscriptions.
Optimize Route: Enables the device to use optimized alternate routes automatically or upon request (Avoiding Traffic Delays on Your Route, page 6).
Traffic Alerts: Sets the traffic delay severity for which the device displays a traffic alert.

**Units and Time Settings**
To open the Units and Time settings page, from the main menu, select Settings > Units & Time.
Current Time: Sets the device time.
Time Format: Allows you to select a 12-hour, 24-hour, or UTC display time.
Units: Sets the unit of measure used for distances.
Position Format: Sets the coordinate format and datum used for geographical coordinates.

**Setting the Time**
1. From the main menu, select the time.
2. Select an option:
   • To set the time automatically using GPS information, select Automatic.
   • To set the time manually, drag the numbers up or down.

**Language and Keyboard Settings**
To open the Language and Keyboard settings, from the main menu, select Settings > Language & Keyboard.
Voice Language: Sets the language for voice prompts.
Text Language: Sets all on-screen text to the selected language.
   NOTE: Changing the text language does not change the language of user-entered data or map data, such as street names.
Keyboard Language: Enables keyboard languages.

**Proximity Alerts Settings**
NOTE: You must have custom points of interest (POIs) loaded for proximity points alerts to display.
NOTE: This feature is not available in all areas.
Audio: Sets the type of alert that plays when you approach proximity points.

**Device and Privacy Settings**
To open the device settings, select Settings > Device.
About: Displays the software version number, the unit ID number, and information on several other software features.
EULAs: Displays the end-user license agreements.
   NOTE: You need this information when you update the system software or purchase additional map data.
Position Reporting: Enables keyboard languages.
Travel History: Allows the device to record information for the myTrends, Where I’ve Been, and Trip Log features.
Clear Travel History: Clears your travel history for the myTrends, Where I’ve Been, and Trip Log features.

**Restoring Settings**
You can restore a category of settings or all settings to the factory default values.
1. Select Settings.
2. If necessary, select a settings category.
3. Select > Restore.

**Device Information**

**Power Cables**
Your device can be powered various ways.
• Vehicle power cable
• USB cable
• AC adapter (optional accessory)
Charging the Device

NOTE: This Class III product shall be powered by an LPS power supply.
You can charge the battery in the device using any of these methods.
• Connect the device to vehicle power.
• Connect the device to a computer using a USB cable.
  The device may charge slowly when connected to a computer. Some portable computers may not charge the device.
• Connect the device to an optional power adapter accessory, such as a wall power adapter.
You can purchase an approved Garmin AC-DC adapter suitable for home or office use from a Garmin dealer or www.garmin.com.

Device Maintenance

Device Care

NOTICE
Avoid dropping your device.
Do not store the device where prolonged exposure to extreme temperatures can occur, because it can cause permanent damage.
Never use a hard or sharp object to operate the touchscreen, or damage may result.
Do not expose the device to water.

Cleaning the Outer Casing

NOTICE
Avoid chemical cleaners and solvents that can damage plastic components.

1 Clean the outer casing of the device (not the touchscreen) using a cloth dampened with a mild detergent solution.
2 Wipe the device dry.

Cleaning the Touchscreen

1 Use a soft, clean, lint-free cloth.
2 If necessary, lightly dampen the cloth with water.
3 If using a dampened cloth, turn off the device and disconnect the device from power.
4 Gently wipe the screen with the cloth.

Avoiding Theft
• Remove the device and mount from sight when not in use.
• Remove the residue left on the windshield by the suction cup.
• Do not keep your unit in the glove compartment.
• Register your device at http://my.garmin.com.

Resetting the Device
You can reset your device if it stops functioning.
Hold the power key for 12 seconds.

Removing the Device, Mount, and Suction Cup

Removing the Device from the Mount
1 Press the release tab or button on the mount.
2 Tilt the device forward.

Removing the Mount from the Suction Cup
1 Turn the device mount to the right or left.
2 Apply pressure until the socket on the mount releases the ball on the suction cup.

Removing the Suction Cup from the Windshield
1 Flip the lever on the suction cup toward you.
2 Pull the tab on the suction cup toward you.

Changing the Fuse in the Vehicle Power Cable

NOTICE
When replacing the fuse, do not lose any of the small pieces and make sure they are put back in the proper position. The vehicle power cable does not work unless it is assembled correctly.

If your device does not charge in your vehicle, you may need to replace the fuse located at the tip of the vehicle adapter.
1 Rotate the end piece 90 degrees counter clockwise to unlock it.

TIP: You may need to use a coin to remove the end piece.
2 Remove the end piece, the silver tip, and the fuse.
3 Insert a new fast-blow fuse that has the same current, such as 1 A or 2 A.
4 Place the silver tip in the end piece.
5 Push in the end piece and rotate it 90 degrees clockwise to lock it back into the vehicle power cable.

Troubleshooting

The suction cup will not stay on my windshield
1 Clean the suction cup and windshield with rubbing alcohol.
2 Dry with a clean, dry cloth.
3 Mount the suction cup (Connecting the Device to Vehicle Power, page 2).

My device is not acquiring satellite signals
• Verify the GPS simulator is turned off (Navigation Settings, page 16).
• Take your device out of parking garages and away from tall buildings and trees.
• Remain stationary for several minutes.

The device does not charge in my vehicle
• Check the fuse in the vehicle power cable (Changing the Fuse in the Vehicle Power Cable, page 18).
• Verify the vehicle is turned on and is supplying power to the power outlet.
• Verify the interior temperature of the vehicle is within the charging temperature range indicated in the specifications.
• Verify the fuse is not broken in the vehicle power outlet.

My battery does not stay charged for very long
• Decrease the screen brightness (Display Settings, page 17).
• Shorten the display timeout (Display Settings, page 17).
• Decrease the volume (Adjusting the Volume, page 3).
• Disable Bluetooth wireless technology (Disabling Bluetooth, page 17).
• Put the device in power saving mode when not in use (Turning the Device On or Off, page 2).
• Keep your device away from extreme temperatures.
• Do not leave your device in direct sunlight.

My device does not appear as a removable drive on my computer
On most Windows computers, the device connects using Media Transfer Protocol (MTP). In MTP mode, the device appears as a portable device and not as a removable drive. MTP mode is supported by Windows 7, Windows Vista®, and Windows XP Service Pack 3 with Windows Media Player 10.

My device does not appear as a portable device on my computer
On Mac computers and some Windows computers, the device connects using USB mass storage mode. In USB mass storage mode, the device appears as a removable drive or volume, and not as a portable device. Windows versions prior to Windows XP Service Pack 3 use USB mass storage mode.

My device does not appear as either a portable device or a removable drive or volume on my computer
1 Disconnect the USB cable from your computer.
2 Turn off the device.
3 Connect the USB cable to your device and to a USB port on your computer.
   TIP: The USB cable must connect to a USB port on your computer, not to a USB hub.
The device turns on automatically and goes into MTP mode or USB mass storage mode. A picture of the device connected to a computer appears on the device screen.

NOTE: If you have several network drives mapped on your computer, Windows may have trouble assigning drive letters to your Garmin drives. For information about assigning drive letters, see the help file for your operating system.

My phone will not connect to the device
• Select Settings > Bluetooth.
   The Bluetooth field must be set to Enabled.
• Enable Bluetooth wireless technology on your phone and bring your phone within 33 ft. (10 m) of the device.
• Go to www.garmin.com/bluetooth for more help.

Appendix
Installing a Memory Card for Maps and Data
You can install a memory card to increase the storage space for maps and other data on your device. You can purchase memory cards from an electronics supplier, or go to www.garmin.com/maps to purchase a memory card with pre-loaded Garmin mapping software. The device supports microSD™ memory cards from 4 to 32 GB.
1 Locate the map and data memory card slot on your device (Device Overviews, page 1).
2 Insert a memory card into the slot.
3 Press it in until it clicks.

Data Management
You can store files on your device. The device has a memory card slot for additional data storage.

NOTE: The device is not compatible with Windows 95, 98, Me, Windows NT®, and Mac OS 10.3 and earlier.

About Memory Cards
You can purchase memory cards from an electronics supplier, or purchase pre-loaded Garmin mapping software (www.garmin.com). In addition to map and data storage, the memory card can be used to store files such as maps, images, geocaches, routes, waypoints, and custom POIs.

Connecting the Device to Your Computer
You can connect the device to your computer using a USB cable.

1 Plug the small end of the USB cable into the port on the device.
2 Plug the larger end of the USB cable into a port on your computer.
   A picture of your device connected to a computer appears on the device screen.
   Depending on your computer operating system, the device appears as either a portable device, a removable drive, or a removable volume.

Transferring Data From Your Computer
1 Connect the device to your computer (Connecting the Device to Your Computer, page 19).
   Depending on your computer operating system, the device appears as either a portable device, a removable drive, or a removable volume.
2 On your computer, open the file browser.
3 Select a file.
4 Select Edit > Copy.
5 Browse to a folder on the device.
   NOTE: For a removable drive or volume, you should not place files in the Garmin folder.
6 Select Edit > Paste.

Disconnecting the USB Cable
If your device is connected to your computer as a removable drive or volume, you must safely disconnect your device from your computer to avoid data loss. If your device is connected to your Windows computer as a portable device, it is not necessary to safely disconnect.
1 Complete an action:
   • For Windows computers, select the Safely Remove Hardware icon in the system tray, and select your device.
   • For Mac computers, drag the volume icon to the trash.
2 Disconnect the cable from your computer.

Viewing GPS Signal Status
Hold for three seconds.

Purchasing Additional Maps
1 Go to your device product page at garmin.com.
2 Click the Maps tab.
3 Follow the on-screen instructions.

Purchasing Accessories
Go to garmin.com/accessories.
