Introduction

⚠ WARNING

See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.

Always consult your physician before you begin or modify any exercise program.

Device Overview

① Touchscreen

- Swipe up or down to scroll through widgets, features, and menus.
- Tap to select.
- Swipe right to go back to the previous screen.
- Swipe right to view the messaging app ([Sending a Message, page 2](#)).
- During an activity, swipe right to view the watch face and widgets.
- During an activity, double-tap to mark a new lap, start a new set of reps, or advance to the next stage of a workout.
- Hold to view a menu of device settings and options for the current screen.

② Key

- Press to turn on the device.
- Hold for 2 seconds to view the controls menu, including device power.
- Hold for 5 seconds to request assistance ([Safety and Tracking Features, page 6](#)).
- Press to return to the watch face from any screen, except during an activity.
- During an activity, press to pause the activity.

Touchscreen Tips

- Hold your finger on the touchscreen to view an options menu.
- Drag up or down to scroll through lists and menus.
- Swipe up or down to scroll quickly.
- Tap to select a button, a list item, or a menu item.
- From the watch face, swipe up or down to scroll through the widgets on the device.
- From a widget, tap to view additional widget screens, if available.
- During an activity, swipe up or down to view the next data screen.
- During an activity, swipe right to view the watch face and widgets, and swipe left to return to the activity data fields.
- Perform each menu selection as a separate action.

Locking and Unlocking the Touchscreen

You can lock the touchscreen to prevent inadvertent screen touches.

1 Hold the key.

2 Select .

The touchscreen locks and does not respond to touches until you unlock it.

3 Hold the key to unlock the touchscreen.

Using the Controls Menu

The controls menu contains customizable shortcuts, such as locking the touchscreen and turning the device off.

TIP: You can check the Verizon® network signal strength or Bluetooth® connection status.

NOTE: You can add, reorder, and remove the shortcuts in the controls menu ([Customizing the Controls Menu, page 17](#)).

1 From any screen, hold the key for 2 seconds.

2 Select an option.

Icons

A flashing icon means the device is searching for a signal. A solid icon means the signal was found or the sensor is connected.

GPS	GPS status
	Smartphone connection status
	4G LTE connection status
	Heart rate monitor status
	Foot pod status
	LiveTrack status
	Speed and cadence sensor status
	Varia™ bike light status
	Varia bike radar status
	tempe™ sensor status
VIRB	VIRB® camera status
	vivoactive alarm status

Connectivity Icons

On the controls menu, the Bluetooth phone icon  and the 4G LTE icon  change based on connectivity.

Bluetooth Status	Description	4G LTE Default Behavior
	A green icon indicates that your Bluetooth phone is connected.	When your phone is connected, the 4G LTE is on standby  .
	A white icon indicates that your Bluetooth phone is not connected. It is on standby.	When your phone is not connected, your vivoactive device searches for the 4G LTE network  .

Bluetooth Status	Description	4G LTE Default Behavior
	A flashing green icon indicates that your vívoactive device is searching for or trying to connect to your phone.	When you turn off 4G LTE, the icon is grey  , and the watch searches for your phone.
	A grey icon indicates that you have turned off the Bluetooth connection.	When you turn off the Bluetooth connection, the 4G LTE icon flashes. Solid green  indicates that your vívoactive device is connected to the 4G LTE network.

Smart Features

Setting Up Your Smartwatch Features

To take full advantage of the vívoactive 3 Music features, complete these tasks.

- Pair your smartphone with the Garmin Connect™ app ([Pairing Your Smartphone, page 2](#)).
- Activate your vívoactive 3 Music device ([Connecting with Verizon, page 2](#)).
- Add contacts ([Adding Contacts, page 2](#)).
- Send a message ([Sending a Message, page 2](#)).
- Set up safety features using the Garmin Connect app ([Safety and Tracking Features, page 6](#)).
- Download a music app using the Connect IQ™ store ([Connect IQ Features, page 4](#)), and download songs onto the watch ([Music, page 5](#)).
- Connect your Bluetooth headphones ([Connecting Bluetooth Headphones, page 6](#)).
- Set up your Garmin Pay™ wallet ([Setting Up Your Garmin Pay Wallet, page 4](#)).

TIP: You should check the battery life and charge the device before leaving on your first phone-free adventure ([Charging the Device, page 21](#)).

Pairing Your Smartphone

To set up the vívoactive device, it must be paired directly through the Garmin Connect app, instead of from the Bluetooth settings on your smartphone.

- 1 From the app store on your smartphone, install and open the  Garmin Connect app.
- 2 Select an option to enable pairing mode on your device:
 - If this is the first time you are setting up your device, press the key to turn on the device.
 - If you previously skipped the pairing process or paired your device with a different smartphone, hold the touchscreen, and select **Settings > Phone > Pair Phone** to manually enter pairing mode.
- 3 Select an option to add your device to your Garmin Connect account:
 - If this is the first device you have paired with the Garmin Connect app, follow the on-screen instructions.
 - If you have already paired another device with the Garmin Connect app, from the settings menu, select **Garmin Devices > Add Device**, and follow the on-screen instructions.

Connecting with Verizon

- 1 From the Garmin Connect app, select  or .
- 2 Select **Garmin Devices**, and select your vívoactive 3 Music device.
- 3 Select **Connect with Verizon**.

- 4 Follow the on-screen instructions.

Adding Contacts

You can add up to 50 contacts from the Garmin Connect app and sync them to your device. Three of these contacts can be used as emergency contacts ([Adding Emergency Contacts, page 6](#)). Contact emails can be used with the LiveTrack feature.

- 1 From the Garmin Connect app, select  or .
- 2 Select **Contacts**.
- 3 Follow the on-screen instructions.

After you add contacts, you must sync your data to apply the changes to your vívoactive 3 Music device ([Using the Garmin Connect App, page 17](#)).

Sending a Message

If you are a Verizon customer and you want to use your iPhone® phone number for messages, you must disable the iMessage® service.

NOTE: Your messaging experience may vary based on your smartphone operating system and how you set up the vívoactive 3 Music device to send messages ([Messaging Options and Behavior, page 2](#)).

- 1 From the watch face, swipe right.
- 2 If you have already set up text messaging, skip to step 6.
- 3 Select .
- 4 Follow the on-screen instructions to set up text messaging.
- 5 From the watch face, swipe right.
- 6 Select .
- 7 Select an option:
 - Enter a number, and select .
 - Select one or more contacts, and select **Done**.
- 8 Select an option:
 - Select and send a quick reply message.
You can customize the quick reply messages using your Garmin Connect account ([Device Settings on Your Garmin Connect Account, page 20](#)).
 - Select  to send your location.
 - Select  to select and send an emoji.
 - Select  to enter a message, and select **Send**.

NOTE: Messages are limited to 160 characters.

Messaging Options and Behavior

This section is provided to help you understand the messaging options and behavior based on your mobile carrier and smartphone operating system.

- [I'm a Verizon customer with an Android™ smartphone, page 2](#)
- [I'm a Verizon customer with an iPhone device, page 3](#)
- [I use a different carrier for my Android smartphone, page 3](#)
- [I use a different carrier for my iPhone device, page 3](#)

I'm a Verizon customer with an Android™ smartphone

Phone number: You can use your smartphone number as the phone number your vívoactive watch uses to send and receive text messages. Garmin® recommends this option for the most seamless experience. If you do not use your smartphone number, your watch will send and receive text messages using a separate watch phone number.

Text messages using your smartphone number: If you set up the vívoactive watch to send and receive messages using your smartphone number, messages are sent to both your phone and your watch (when your phone is in Bluetooth range or when your phone is outside Bluetooth range and

your watch is connected to 4G LTE). If you use the Verizon Messages+ app on your phone, the message read state syncs between your phone and watch.

Text messages using the watch phone number: If you set up your vívoactive watch to send and receive messages using the watch phone number, the experience is different. Messages sent to the watch phone number appear on the watch (when your phone is in Bluetooth range or when your phone is outside Bluetooth range and your watch is connected to 4G LTE). New messages or replies sent from the watch are sent from the watch phone number. Garmin recommends letting your friends and family know your watch phone number.

When your phone is in Bluetooth range and a message is sent to your smartphone number, your watch receives a smart notification, and you can use that smart notification to respond to the message from your smartphone number.

I'm a Verizon customer with an iPhone device

Phone number: You can use your iPhone number as the number your watch uses when sending and receiving text messages. Garmin recommends this option for the most seamless experience. If you do not want to turn off the iMessage service, Garmin recommends setting up your watch to send and receive text messages with a separate watch phone number.

Text messages using your iPhone number: If you set up the vívoactive watch to send and receive messages using your iPhone number, and you have turned off the iMessage service, messages are sent to both your phone and your watch (when your phone is in Bluetooth range or when your phone is outside Bluetooth range and your watch is connected to 4G LTE). If you use the Verizon Messages+ app on your phone, the message read state syncs between your phone and watch.

Text messages using the watch phone number: If you set up your vívoactive watch to send and receive messages using the watch phone number, the experience is different. Messages sent to the watch phone number appear on the watch (when your phone is in Bluetooth range or when your phone is outside Bluetooth range and your watch is connected to 4G LTE). New messages or replies sent from the watch are sent from the watch phone number. Garmin recommends letting your friends and family know your watch phone number.

When your phone is in Bluetooth range and a message is sent to your iPhone number, your watch receives a smart notification.

I use a different carrier for my Android smartphone

Phone number: Your vívoactive watch uses a separate Verizon phone number.

Text messages using the watch phone number: Messages sent to the watch phone number appear on the watch (when your phone is in Bluetooth range or when your phone is outside Bluetooth range and your watch is connected to 4G LTE). New messages or replies sent from the watch are sent from the watch phone number. Garmin recommends letting your friends and family know your watch phone number.

When your phone is in Bluetooth range and a message is sent to your smartphone number, your watch receives a smart notification, and you can use that smart notification to respond to the message from your smartphone number.

I use a different carrier for my iPhone device

Phone number: Your vívoactive watch uses a separate Verizon phone number.

Text messages using the watch phone number: Messages sent to the watch phone number appear on the watch (when your phone is in Bluetooth range or when your phone is

outside Bluetooth range and your watch is connected to 4G LTE). New messages or replies sent from the watch are sent from the watch phone number. Garmin recommends letting your friends and family know your watch phone number.

When your phone is in Bluetooth range and a message is sent to your smartphone number, your watch receives a smart notification, and you can use that smart notification to respond to the message from your smartphone number.

How do I use the onscreen keyboard?

The default touchscreen keyboard uses a predictive T9 keyboard. T9 stands for text on 9 keys.

You can hold the touchscreen for text entry and language options.

Connected Features

Connected features are available for your vívoactive device when you connect the device to a compatible smartphone using Bluetooth technology. Some features require you to install the Garmin Connect app on the connected smartphone. Go to www.garmin.com/apps for more information. Some features are also available when you connect your device to the 4G LTE network.

Phone notifications: Displays phone notifications and messages on your vívoactive device.

LiveTrack: Allows friends and family to follow your races and training activities in real time. You can invite followers using email or social media, allowing them to view your live data on a Garmin Connect tracking page.

Activity uploads to Garmin Connect: Automatically sends your activity to your Garmin Connect account as soon as you finish recording the activity.

Connect IQ: Allows you to extend your device features with new watch faces, widgets, apps, and data fields.

Software Updates: Allows you to update your device software.

Weather: Allows you to view current weather conditions and weather forecasts.

Bluetooth sensors: Allows you to connect Bluetooth compatible sensors, such as a heart rate monitor.

Find my phone: Locates your lost smartphone that is paired with your vívoactive device and currently within range.

Find my device: Locates your lost vívoactive device that is paired with your smartphone and currently within range.

Phone Notifications

Phone notifications require a compatible smartphone to be in range and paired with the device. When your phone receives messages, it sends notifications to your device.

Enabling Bluetooth Notifications

Before you can enable notifications, you must pair the vívoactive device with a compatible smartphone ([Pairing Your Smartphone](#), page 2).

- 1 Hold the touchscreen.
- 2 Select **Settings > Connectivity > Phone > Notifications**.
- 3 Select **During Activity** to set preferences for notifications that appear when recording an activity.
- 4 Select a notification preference.
- 5 Select **Not During Activity** to set preferences for notifications that appear when in watch mode.
- 6 Select a notification preference.
- 7 Select **Timeout**.
- 8 Select a timeout duration.

Viewing Notifications

- 1 From the watch face, swipe to view the notifications widget.

- 2 Select a notification.
- 3 Scroll to read the full notification.
- 4 Select an option:
 - To act on the notification, select an action, such as **Dismiss** or **Reply**.

The available actions depend on the type of notification and your phone operating system. When you dismiss a notification on your phone or the vívoactive device, it no longer appears in the widget.

- To return to the notification list, swipe right.

Receiving an Incoming Phone Call

When you receive a phone call on your connected smartphone, the vívoactive device displays the name or phone number of the caller.

- To accept the call, select .
- **NOTE:** To talk to the caller, you must use your connected smartphone.
- To decline the call, select .
- To decline the call and immediately send a text message reply, select , and select a message from the list.

NOTE: This feature is available only if your device is connected to an Android smartphone.

Managing Notifications

You can use your compatible smartphone to manage notifications that appear on your vívoactive device.

Select an option:

- If you are using an iPhone device, go to the notifications settings to select the items to show on the device.
- If you are using an Android smartphone, from the Garmin Connect app, select **Settings > Smart Notifications**.

Turning Off the Bluetooth Smartphone Connection

- 1 Hold the key to view the controls menu.
 - 2 Select  to turn off the Bluetooth smartphone connection on your vívoactive device.
- Refer to the owner's manual for your mobile device to turn off Bluetooth wireless technology on your mobile device.

Using Do Not Disturb Mode

You can use do not disturb mode to turn off vibrations and the backlight for alerts and notifications. For example, you can use this mode while sleeping or watching a movie.

- To manually turn on or off do not disturb mode, hold the key, and select .
- To automatically turn on do not disturb mode during your sleep hours, open the device settings in the Garmin Connect app, and select **Sounds & Alerts > Do Not Disturb During Sleep**.

Finding Your Phone

You can use this feature to help locate a lost smartphone that is paired using Bluetooth wireless technology and currently within range.

- 1 Hold the key.
 - 2 Select .
- Signal strength bars appear on the vívoactive screen, and an audible alert sounds on your smartphone. The bars increase as you move closer to your smartphone.
- 3 Press the key to stop searching.

Connect IQ Features

You can add Connect IQ features to your watch from Garmin and other providers using the Connect IQ app. You can customize your device with watch faces, data fields, widgets, and apps.

Watch Faces: Allow you to customize the appearance of the clock.

Data Fields: Allow you to download new data fields that present sensor, activity, and history data in new ways. You can add Connect IQ data fields to built-in features and pages.

Widgets: Provide information at a glance, including sensor data and notifications.

Apps: Add interactive features to your watch, such as new outdoor and fitness activity types.

Downloading Connect IQ Features

Before you can download features from the Connect IQ app, you must pair your vívoactive device with your smartphone ([Pairing Your Smartphone](#), page 2).

- 1 From the app store on your smartphone, install and open the Connect IQ app.
- 2 If necessary, select your device.
- 3 Select a Connect IQ feature.
- 4 Follow the on-screen instructions.

Downloading Connect IQ Features Using Your Computer

- 1 Connect the device to your computer using a USB cable.
- 2 Go to apps.garmin.com, and sign in.
- 3 Select a Connect IQ feature, and download it.
- 4 Follow the on-screen instructions.

Garmin Pay

The Garmin Pay feature allows you to use your watch to pay for purchases in participating stores using credit or debit cards from a participating financial institution.

Setting Up Your Garmin Pay Wallet

You can add one or more participating credit or debit cards to your Garmin Pay wallet. Go to garmin.com/garminpay/banks to find participating financial institutions.

- 1 From the Garmin Connect app, select  or .
- 2 Select **Garmin Devices**, and select your vívoactive 3 Music device.
- 3 Select **Garmin Pay > Create Your Wallet**.
- 4 Follow the on-screen instructions.

Paying for a Purchase Using Your Watch

Before you can use your watch to pay for purchases, you must set up at least one payment card.

You can use your watch to pay for purchases in a participating store.

- 1 Hold the key.
- 2 Select .
- 3 Enter your four-digit passcode.

NOTE: If you enter your passcode incorrectly three times, your wallet locks, and you must reset your passcode in the Garmin Connect app.

Your most recently used payment card appears.

- 4 If you have added multiple cards to your Garmin Pay wallet, swipe to change to another card (optional).
- 5 Within 60 seconds, hold your watch near the payment reader, with the watch facing the reader.
The watch vibrates and displays a check mark when it is finished communicating with the reader.
- 6 If necessary, follow the instructions on the card reader to complete the transaction.

TIP: After you successfully enter your passcode, you can make payments without a passcode for 24 hours while you continue to wear your watch. If you remove the watch from your wrist or disable heart rate monitoring, you must enter the passcode again before making a payment.

Adding a Card to Your Garmin Pay Wallet

You can add up to ten credit or debit cards to your Garmin Pay wallet.

- 1 From the vívoactive device page in the Garmin Connect app, select **Garmin Pay** > .
- 2 Follow the on-screen instructions to enter the card information and add the card to your wallet.

After the card is added, you can select the card on your watch when you make a payment.

Managing Your Garmin Pay Wallet

You can view detailed information about each of your payment cards, and you can suspend, activate, or delete a card. You can also suspend or delete your whole Garmin Pay wallet.

NOTE: In some countries, participating financial institutions may restrict the wallet features.

- 1 From the vívoactive device page in the Garmin Connect app, select **Garmin Pay** > **Manage Your Wallet**.
- 2 Select an option:
 - To suspend a specific card, select the card, and select **Suspend**.
The card must be active to make purchases using your vívoactive device.
 - To temporarily suspend all cards in your wallet, select **Suspend Wallet**.
You cannot pay using your vívoactive device until you unsuspend at least one card using the app.
 - To unsuspend your suspended wallet, select **Unsuspend Wallet**.
 - To delete a specific card, select the card, and select **Delete**.
The card is completely deleted from your wallet. If you want to add this card to your wallet in the future, you must enter the card information again.
 - To delete all cards in your wallet, select **Delete Wallet**.
Your Garmin Pay wallet and all the card information associated with it are deleted. You cannot pay using your vívoactive device until you create a new wallet and add a card.

Changing Your Garmin Pay Passcode

You must know your current passcode to change it. Your passcode cannot be recovered. If you forget your passcode, you must delete your wallet, create a new one, and reenter your card information.

You can change the passcode required to access your Garmin Pay wallet on your vívoactive device.

- 1 From the vívoactive device page in the Garmin Connect app, select **Garmin Pay** > **Reset Passcode**.
- 2 Follow the on-screen instructions.

The next time you pay using your vívoactive device, you must enter the new passcode.

Music

NOTE: This section is about three different music playback options.

- Third-party provider music
- Personal audio content
- Music stored on your phone

On a vívoactive 3 Music device, you can download audio content to your device from your computer or from a third-party provider, so you can listen when your smartphone is not nearby. To listen to audio content stored on your device, you must connect headphones with Bluetooth technology.

You can also control music playback on your paired smartphone using your device.

Connecting to a Third-Party Provider

Before you can download music or other audio files to your compatible watch from a supported third-party provider, you must connect to the provider using the Garmin Connect app.

- 1 From the Garmin Connect app, select  or .
- 2 Select **Garmin Devices**, and select your device.
- 3 Select **Music**.
- 4 Select an option:
 - To connect to an installed provider, select a provider, and follow the on-screen instructions.
 - To connect to a new provider, select **Get Music Apps**, locate a provider, and follow the on-screen instructions.

Downloading Audio Content from Spotify®

Before you can download audio content from Spotify, you must connect to the network ([Connecting with Verizon, page 2](#)).

You should check with your mobile service provider because downloading audio content impacts your data plan.

- 1 Open the music controls widget.
- 2 Select **Spotify** > **Add Music & Podcasts**.
- 3 Select a playlist or other item to download to the device.

NOTE: Downloading audio content can drain the battery. You may need to connect the device to an external power source if the remaining battery life is insufficient.

The selected playlists and other items are downloaded to the device.

Downloading Audio Content from a Third-Party Provider

Before you can download audio content, you must connect to the network ([Connecting with Verizon, page 2](#)).

You should check with your mobile service provider because downloading audio content impacts your data plan.

- 1 Open the music controls widget on the vívoactive device.
- 2 Hold the touchscreen.

- 3 Select **Music Providers**.
- 4 Select a connected provider, and follow the on-screen instructions.
- 5 Select a playlist or other item to download to the device.
- 6 Select **Done**.
- 7 Swipe right to exit the menu.
- 8 When you are prompted to sync with the service, select ✓. The selected playlists and other items are downloaded to the device.

NOTE: Downloading audio content can drain the battery. You may be required to connect the device to an external power source if the battery is low.

Disconnecting from a Third-Party Provider

- 1 From the Garmin Connect app, select ☰ or ⋮.
- 2 Select **Garmin Devices**, and select your device.
- 3 Select **Music**.
- 4 Select an installed third-party provider, and follow the on-screen instructions to disconnect the third-party provider from your device.

Downloading Personal Audio Content

Before you can send your personal music to your device, you must install the Garmin Express™ application on your computer (www.garmin.com/express).

You can load your personal audio files, such as .mp3 and .aac files, to a vívoactive 3 Music device from your computer.

- 1 Connect the device to your computer using the included USB cable.
- 2 On your computer, open the Garmin Express application, select your device, and select **Music**.
TIP: For Windows® computers, you can select  and browse to the folder with your audio files. For Apple® computers, the Garmin Express application uses your iTunes® library.
- 3 In the **My Music** or **iTunes Library** list, select an audio file category, such as songs or playlists.
- 4 Select the checkboxes for the audio files, and select **Send to Device**.
- 5 If necessary, in the vívoactive 3 Music list, select a category, select the checkboxes, and select **Remove From Device** to remove audio files.

Connecting Bluetooth Headphones

To listen to music loaded onto your vívoactive 3 Music device, you must connect headphones using Bluetooth technology.

- 1 Bring the headphones within 2 m (6.6 ft.) of your device.
- 2 Enable pairing mode on the headphones.
- 3 Hold the touchscreen.
- 4 Select **Settings > Sensors & Accessories > Add New > Headphones**.
- 5 Select your headphones to complete the pairing process.

Listening to Music

- 1 Open the music controls widget.
- 2 Connect your Bluetooth headphones ([Connecting Bluetooth Headphones, page 6](#)).
- 3 Hold the touchscreen to change the source.
- 4 Select an option:
 - To listen to music from a third-party provider, select the name of the provider.

- To listen to music downloaded to the watch from your computer, select **My Music** ([Downloading Personal Audio Content, page 6](#)).
- To listen to music from your smartphone, select **Control Music on Phone**.

- 5 Select ⋮ to open the music playback controls.

Music Playback Controls

⋮	Select to open the music playback controls. Hold to open the music menu.
🔊	Select to adjust the volume.
▶	Select to play and pause the current audio file.
▶	Select to skip to the next audio file in the playlist. Hold to fast forward through the current audio file.
◀	Select to restart the current audio file. Select twice to skip to the previous audio file in the playlist. Hold to rewind through the current audio file.
🔄	Select to change the repeat mode.
🎵	Select to change the shuffle mode.

Safety and Tracking Features

⚠ CAUTION

Incident detection and assistance are supplemental features and should not be relied on as a primary method to obtain emergency assistance. The Garmin Connect app does not contact emergency services on your behalf.

The vívoactive device has safety and tracking features that must be set up with the Garmin Connect app.

NOTICE

To use these features, you must be connected to the Garmin Connect app using Bluetooth technology. You can enter emergency contacts in your Garmin Connect account.

Assistance: Allows you to send an automated message with your name, LiveTrack link, and GPS location to your emergency contacts.

Incident detection: When the vívoactive device detects an incident during an outdoor walk, run, or bike activity, the device sends an automated message, LiveTrack link, and GPS location to your emergency contacts.

LiveTrack: Allows friends and family to follow your races and training activities in real time. You can invite followers using email or social media, allowing them to view your live data on a Garmin Connect tracking page.

Adding Emergency Contacts

Emergency contact phone numbers are used for the incident detection and assistance features.

- 1 From the Garmin Connect app, select ☰ or ⋮.
- 2 Select **Safety & Tracking > Incident Detection & Assistance > Add Emergency Contact**.
- 3 Follow the on-screen instructions.

Adding Contacts

You can add up to 50 contacts from the Garmin Connect app and sync them to your device. Three of these contacts can be used as emergency contacts ([Adding Emergency Contacts, page 6](#)). Contact emails can be used with the LiveTrack feature.

- 1 From the Garmin Connect app, select  or .
- 2 Select **Contacts**.
- 3 Follow the on-screen instructions.

After you add contacts, you must sync your data to apply the changes to your vívoactive 3 Music device ([Using the Garmin Connect App, page 17](#)).

Turning On LiveTrack for GPS Activities

Before you can start your first LiveTrack session, you must set up contacts in the Garmin Connect app.

- 1 Press the key.
- 2 Select an outdoor activity ([Outdoor Activities, page 12](#)).
- 3 Go outside, and wait while the device locates satellites.
- 4 Select **LiveTrack**.
- 5 Select an option:
 - Select **Auto Start** to start a LiveTrack session each time you start this type of activity.
 - Select **Extend LiveTrack** to extend viewing of the LiveTrack session for 24 hours.
 - Select **LiveTrack Recipients** to view the recipients that you added in the Garmin Connect app.
 - Select **One Time Invite** to select recipients for this activity only.
- 6 Press the key to start the activity timer.
- 7 Start your activity.

Recipients can view your live data on a Garmin Connect tracking page.

Turning Incident Detection On and Off

Before you can enable incident detection on your device, you must set up emergency contacts in the Garmin Connect app ([Adding Emergency Contacts, page 6](#)). Your paired smartphone or vívoactive with 4G LTE must be equipped with a data plan and be in an area of network coverage where data is available. Your emergency contacts must be able to receive text messages (standard text messaging rates may apply).

- 1 From the watch face, hold the touchscreen.
- 2 Select **Settings > Safety & Tracking > Incident Detection**.
- 3 Select an activity.

NOTE: Incident detection is available only for outdoor walk, run, and bike activities.

When an incident is detected by your vívoactive device with GPS enabled, the Garmin Connect app can send an automated text message and email with your name and GPS location to your emergency contacts. A message appears indicating your contacts will be informed after 30 seconds have elapsed. You can select **Cancel** before the countdown is complete to cancel the message.

Requesting Assistance

Before you can request assistance, you must set up emergency contacts ([Adding Emergency Contacts, page 6](#)).

- 1 Hold the key.
- 2 When you feel three vibrations, release the key to activate the assistance feature.

The countdown screen appears.

TIP: You can select **Cancel** before the countdown is complete to cancel the message.

- 3 If necessary, select **Send Now** to send the message immediately.

Heart Rate Features

The vívoactive device has a wrist-based heart rate monitor and is also compatible with chest heart rate monitors (sold separately). You can view heart rate data on the heart rate widget. If both wrist-based heart rate and chest heart rate data are available, your device uses the chest heart rate data.

Wrist-based Heart Rate

Wearing the Device

- Wear the device above your wrist bone.

NOTE: The device should be snug but comfortable. For more accurate heart rate readings, the device should not move while running or exercising.

NOTE: The optical sensor is located on the back of the device.

- See [Tips for Erratic Heart Rate Data, page 7](#) for more information about wrist-based heart rate.
- For more information about accuracy, go to garmin.com/ataccuracy.

Tips for Erratic Heart Rate Data

If the heart rate data is erratic or does not appear, you can try these tips.

- Clean and dry your arm before putting on the device.
- Avoid wearing sunscreen, lotion, and insect repellent under the device.
- Avoid scratching the heart rate sensor on the back of the device.
- Wear the device above your wrist bone. The device should be snug but comfortable.
- Wait until the ♥ icon is solid before starting your activity.
- Warm up for 5 to 10 minutes and get a heart rate reading before starting your activity.

NOTE: In cold environments, warm up indoors.

- Rinse the device with fresh water after each workout.

Viewing the Heart Rate Widget

The heart rate widget displays your current heart rate in beats per minute (bpm) and a graph of your heart rate. The graph shows your recent heart rate activity, high and low heart rate, and color-coded bars to indicate the time spent in each heart rate zone ([About Heart Rate Zones, page 8](#)).

- 1 From the watch face, swipe to view the heart rate widget.

- 2 Tap the touchscreen to view your average resting heart rate (RHR) values for the last 7 days.

Setting an Abnormal Heart Rate Alert

You can set the device to alert you when your heart rate exceeds a certain number of beats per minute (bpm) after a period of inactivity.

- 1 Hold the touchscreen.
- 2 Select **Settings > Sensors & Accessories > Heart Rate > Abnormal HR Alert > Alert Threshold**.
- 3 Select a heart rate threshold value.

Each time you exceed the custom value, a message appears and the device vibrates.

Broadcasting Heart Rate to Garmin Devices

You can broadcast your heart rate data from your vívoactive device and view it on paired Garmin devices. For example, you can broadcast your heart rate data to an Edge® device while cycling, or to a VIRB action camera during an activity.

NOTE: Broadcasting heart rate data decreases battery life.

- 1 Hold the touchscreen.
- 2 Select **Settings > Sensors & Accessories > Heart Rate**.
- 3 Select an option:
 - Select **Broadcast In Activity** to broadcast heart rate data during timed activities ([Starting an Activity, page 11](#)).
 - Select **Broadcast** to start broadcasting heart rate data now.
- 4 Pair your vívoactive device with your Garmin ANT+® compatible device.

NOTE: The pairing instructions differ for each Garmin compatible device. See your owner's manual.

Turning Off the Wrist-based Heart Rate Monitor

For the vívoactive device, the default value for the Heart Rate setting is Auto. The device automatically uses the wrist-based heart rate monitor unless you pair a chest heart rate monitor to the device.

NOTE: Disabling the wrist-based heart rate monitor also disables your VO2 max. estimate, intensity minutes, and the all-day stress feature.

NOTE: Disabling the wrist-based heart rate monitor also disables the on-wrist detection feature for Garmin Pay payments, and you must enter a passcode before making each payment ([Garmin Pay, page 4](#)).

- 1 Hold the touchscreen.
- 2 Select **Settings > Sensors & Accessories > Heart Rate > Off**.

About Heart Rate Zones

Many athletes use heart rate zones to measure and increase their cardiovascular strength and improve their level of fitness. A heart rate zone is a set range of heartbeats per minute. The five commonly accepted heart rate zones are numbered from 1 to 5 according to increasing intensity. Generally, heart rate zones are calculated based on percentages of your maximum heart rate.

Setting Your Heart Rate Zones

The device uses your user profile information from the initial setup to determine your default heart rate zones. The device has separate heart rate zones for running and cycling. For the most accurate calorie data during your activity, you should set your maximum heart rate. You can also set each heart rate zone. You can manually adjust your zones on the device or using your Garmin Connect account.

- 1 Hold the touchscreen.
- 2 Select **Settings > User Profile > Heart Rate Zones**.
- 3 Select **Default** to view the default values (optional).
The default values can be applied to running and cycling.
- 4 Select **Running** or **Cycling**.
- 5 Select **Preference > Set Custom**.
- 6 Select **Max. HR**, and enter your maximum heart rate.
- 7 Select a zone, and enter a value for each zone.

Heart Rate Zone Calculations

Zone	% of Maximum Heart Rate	Perceived Exertion	Benefits
1	50–60%	Relaxed, easy pace, rhythmic breathing	Beginning-level aerobic training, reduces stress
2	60–70%	Comfortable pace, slightly deeper breathing, conversation possible	Basic cardiovascular training, good recovery pace
3	70–80%	Moderate pace, more difficult to hold conversation	Improved aerobic capacity, optimal cardiovascular training
4	80–90%	Fast pace and a bit uncomfortable, breathing forceful	Improved anaerobic capacity and threshold, improved speed
5	90–100%	Sprinting pace, unsustainable for long period of time, labored breathing	Anaerobic and muscular endurance, increased power

About VO2 Max. Estimates

VO2 max. is the maximum volume of oxygen (in milliliters) you can consume per minute per kilogram of body weight at your maximum performance. In simple terms, VO2 max. is an indication of athletic performance and should increase as your level of fitness improves.

On the device, your VO2 max. estimate appears as a number and description. On your Garmin Connect account, you can view additional details about your VO2 max. estimate, including your fitness age. Your fitness age gives you an idea of how your fitness compares with a person of the same gender and different age. As you exercise, your fitness age can decrease over time.

VO2 max. data is provided by FirstBeat. VO2 max. analysis is provided with permission from The Cooper Institute®. For more information, see the appendix ([VO2 Max. Standard Ratings, page 25](#)), and go to www.CooperInstitute.org.

Getting Your VO2 Max. Estimate

The device requires heart rate data and a timed, (up to 15 minutes) brisk walk or run to display your VO2 max. estimate.

- 1 Hold the touchscreen.
- 2 Select **My Stats > VO2 Max**.

If you have already recorded a brisk walk or run outdoors, your VO2 max. estimate may appear. The device displays the date your VO2 max. estimate was last updated. The device updates your VO2 max. estimate each time you complete an outdoor walk or run of 15 minutes or longer. You

can manually start a VO2 max. test to get an updated estimate.

- 3 To start a VO2 max. test, swipe up, and select **Test Now**.
- 4 Follow the on-screen instructions to get your VO2 max. estimate.

A message appears when the test is complete.

Activity Tracking

The activity tracking feature records your daily step count, distance traveled, intensity minutes, floors climbed, calories burned, and sleep statistics for each recorded day. Your calories burned includes your base metabolism plus activity calories.

The number of steps taken during the day appears on the steps widget. The step count is updated periodically.

For more information about activity tracking and fitness metric accuracy, go to garmin.com/ataccuracy.

Auto Goal

Your device creates a daily step goal automatically, based on your previous activity levels. As you move during the day, the device shows your progress toward your daily goal ①.

If you choose not to use the auto goal feature, you can set a personalized step goal on your Garmin Connect account.

Using the Move Alert

Sitting for prolonged periods of time can trigger undesirable metabolic state changes. The move alert reminds you to keep moving. After one hour of inactivity, Move! and the red bar appear. Additional segments appear after every 15 minutes of inactivity. The device also vibrates if vibration is turned on ([System Settings, page 19](#)).

Go for a short walk (at least a couple of minutes) to reset the move alert.

Sleep Tracking

While you are sleeping, the device automatically detects your sleep and monitors your movement during your normal sleep hours. You can set your normal sleep hours in the user settings on your Garmin Connect account. Sleep statistics include total hours of sleep, sleep levels, and sleep movement. You can view your sleep statistics on your Garmin Connect account.

NOTE: Naps are not added to your sleep statistics. You can use do not disturb mode to turn off notifications and alerts, with the exception of alarms ([Using Do Not Disturb Mode, page 4](#)).

Intensity Minutes

To improve your health, organizations such as the World Health Organization recommend at least 150 minutes per week of moderate intensity activity, such as brisk walking, or 75 minutes per week of vigorous intensity activity, such as running.

The device monitors your activity intensity and tracks your time spent participating in moderate to vigorous intensity activities (heart rate data is required to quantify vigorous intensity). You can work toward achieving your weekly intensity minutes goal by participating in at least 10 consecutive minutes of moderate to vigorous intensity activities. The device adds the amount of

moderate activity minutes with the amount of vigorous activity minutes. Your total vigorous intensity minutes are doubled when added.

Earning Intensity Minutes

Your vivoactive device calculates intensity minutes by comparing your heart rate data to your average resting heart rate. If heart rate is turned off, the device calculates moderate intensity minutes by analyzing your steps per minute.

- Start a timed activity for the most accurate calculation of intensity minutes.
- Exercise for at least 10 consecutive minutes at a moderate or vigorous intensity level.
- Wear your device all day and night for the most accurate resting heart rate.

Garmin Move IQ™

When your movements match familiar exercise patterns, the Move IQ feature automatically detects the event and displays it in your timeline. The Move IQ events show activity type and duration, but they do not appear in your activities list or newsfeed.

The Move IQ feature can automatically start a timed activity for walking and running using time thresholds you set in the Garmin Connect app. These activities are added to your activities list.

Activity Tracking Settings

Hold the touchscreen, and select **Settings > Activity Tracking**.

Status: Turns off the activity tracking features.

Move Alert: Displays a message and the move bar on the digital watch face and steps screen. The device also vibrates to alert you.

Goal Alerts: Allows you to turn on and off goal alerts, or turn them off only during activities. Goal alerts appear for your daily steps goal, daily floors climbed goal, and weekly intensity minutes goal.

Auto Activity Start: Allows your device to create and save timed activities automatically when the Move IQ feature detects you are walking or running. You can set the minimum time threshold in the run or walk settings.

Intensity Minutes: Allows you to set a heart rate zone for moderate intensity minutes and a higher heart rate zone for vigorous intensity minutes. You can also use the default algorithm.

Turning Off Activity Tracking

When you turn off activity tracking, your steps, floors climbed, intensity minutes, sleep tracking, and Move IQ events are not recorded.

- 1 Hold the touchscreen.
- 2 Select **Settings > Activity Tracking > Status > Off**.

Menstrual Cycle Tracking

Your menstrual cycle is an important part of your health. You can learn more and set up this feature in the Health Stats settings of the Garmin Connect app.

- Menstrual cycle tracking and details
- Physical and emotional symptoms
- Period and fertility predictions
- Health and nutrition information

NOTE: If your vivoactive device doesn't have the menstrual cycle tracking widget, you can download it from the Connect IQ app.

Widgets

Your device comes preloaded with widgets that provide at-a-glance information. Some widgets require a Bluetooth connection to a compatible smartphone.

Some widgets are not visible by default. You can add them to the widget loop manually ([Customizing the Widget Loop](#), page 10).

Calendar: Displays upcoming meetings from your smartphone calendar.

Calories: Displays your calorie information for the current day.

Floors climbed: Tracks your floors climbed and progress toward your goal.

Garmin coach: Displays scheduled workouts when you select a Garmin coach training plan in your Garmin Connect account.

Golf: Displays golf information for your last round.

Heart rate: Displays your current heart rate in beats per minute (bpm) and a graph of your heart rate.

Intensity minutes: Tracks your time spent participating in moderate to vigorous activities, your weekly intensity minutes goal, and progress toward your goal.

Last sport: Displays a brief summary of your last recorded sport.

Menstrual cycle tracking: Displays your current cycle. You can view and log your daily symptoms.

Music controls: Provides music player controls for your smartphone or on-device music.

My day: Displays a dynamic summary of your activity today. The metrics include timed activities, intensity minutes, floors climbed, steps, calories burned, and more.

Notifications: Alerts you to incoming calls, texts, social network updates, and more, based on your smartphone notification settings.

Steps: Tracks your daily step count, step goal, and data for previous days.

Stress: Displays your current stress level and a graph of your stress level. You can do a breathing activity to help you relax.

VIRB controls: Provides camera controls when you have a VIRB device paired with your vívoactive device.

Weather: Displays the current temperature and weather forecast.

Viewing Widgets

From the watch face, swipe up or down.

Customizing the Widget Loop

- 1 Hold the touchscreen.
- 2 Select **Settings > Widgets**.
- 3 Select an option:
 - Select an item to show or hide it from the app list or rearrange the app list.
 - Select **Add** to add an item to the widget loop.

About My Day

The My Day widget is a daily snapshot of your activity. This is a dynamic summary that updates throughout the day. As soon as you climb a flight of stairs or record an activity, it appears in the widget. The metrics include recorded activities, intensity minutes for the week, floors climbed, steps, calories burned, and more. You can tap the touchscreen for an option to improve accuracy or to view additional metrics.

Viewing the Weather Widget

- 1 From the watch face, swipe to view the weather widget.
- 2 Tap the touchscreen to view hourly and daily weather data.
- 3 Scroll down to view daily weather data.

Heart Rate Variability and Stress Level

Your device analyzes your heart rate variability while you are inactive to determine your overall stress. Training, physical activity, sleep, nutrition, and general life stress all impact your stress level. The stress level range is from 0 to 100, where 0 to 25 is a resting state, 26 to 50 is low stress, 51 to 75 is medium stress, and 76 to 100 is a high stress state. Knowing your stress level can help you identify stressful moments throughout your day. For best results, you should wear the device while sleeping.

You can sync your device with your Garmin Connect account to view your all-day stress level, long-term trends, and additional details.

Using the Stress Level Widget

The stress level widget displays your current stress level and a graph of your stress level for the last several hours. It can also guide you through a breathing activity to help you relax.

- 1 While you are sitting or inactive, swipe to view the stress level widget.

TIP: If you are too active for the watch to determine your stress level, a message appears instead of a stress level number. You can check your stress level again after several minutes of inactivity.
- 2 Tap the touchscreen to view a graph of your stress level for the last four hours.

Blue bars indicate periods of rest. Yellow bars indicate periods of stress. Gray bars indicate times that you were too active to determine your stress level.
- 3 To start a breathing activity, swipe up, select **Yes**, and enter a duration for the breathing activity in minutes.

VIRB Remote

The VIRB remote function allows you to control your VIRB action camera using your device. Go to www.garmin.com/VIRB to purchase a VIRB action camera.

Controlling a VIRB Action Camera

Before you can use the VIRB remote function, you must enable the remote setting on your VIRB camera. See the *VIRB Series Owner's Manual* for more information. You must also set the VIRB widget to be shown in the widget loop ([Customizing the Widget Loop](#), page 10).

- 1 Turn on your VIRB camera.
- 2 On your vívoactive device, swipe to view the VIRB widget.
- 3 Wait while the device connects to your VIRB camera.
- 4 Select an option:
 - To record video, tap the touchscreen.

The video counter appears on the vívoactive screen.
 - To stop recording video, tap the touchscreen.
 - To take a photo, swipe right, and tap the touchscreen.

Apps and Activities

Your device includes a variety of preloaded apps and activities.

Apps: Apps provide interactive features for your device, such as navigating to saved locations.

Activities: Your device comes preloaded with indoor and outdoor activity apps, including running, cycling, strength training, golfing, and more. When you start an activity, the device displays and records sensor data, which you can save and share with the Garmin Connect community.

For more information about activity tracking and fitness metric accuracy, go to garmin.com/ataccuracy.

Connect IQ Apps: You can add features to your watch by installing apps from the Connect IQ mobile app ([Connect IQ Features](#), page 4).

Starting an Activity

When you start an activity, GPS turns on automatically (if required).

- 1 Press the key.
- 2 If this is the first time you have started an activity, select the checkbox next to each activity to add to your favorites, and select **Done**.
- 3 Select an option:
 - Select an activity from your favorites.
 - Select , and select an activity from the extended activity list.
- 4 If the activity requires GPS signals, go outside to an area with a clear view of the sky.

TIP: If **GPS** appears on a gray background, the activity does not require GPS signals.
- 5 Wait until **Ready** appears on the screen.

The device is ready after it establishes your heart rate, acquires GPS signals (if required), and connects to your wireless sensors (if required).
- 6 Press the key to start the activity timer.

The device records activity data only while the activity timer is running.

Tips for Recording Activities

- Charge the device before starting an activity ([Charging the Device](#), page 21).
- Swipe up or down to view additional data pages.

Stopping an Activity

- 1 Press the key.
- 2 Select **Done**.
- 3 Select an option:
 - To save the activity, select .
 - To discard the activity, select .

Adding a Custom Activity

You can create a custom activity and add it to the activity list.

- 1 Press the key.
- 2 Select  >  > **Create**.
- 3 Select an activity type.
- 4 If necessary, edit the activity app settings ([Activities and App Settings](#), page 17).
- 5 When you are finished editing, select **Done**.
- 6 Select an option:
 - To add the activity to your favorites list, select .
 - To add the activity to the  extended list, select .

Adding or Removing a Favorite Activity

The list of your favorite activities appears when you press the key from the watch face, and it provides quick access to the activities you use most. The first time you press the key to start an activity, the device prompts you to select your favorite activities. You can add or remove favorite activities at any time.

- 1 Hold the touchscreen.
- 2 Select **Settings > Activities & Apps**.

Your favorite activities appear at the top of the list with a white background. Other activities appear in the extended list with a black background.
- 3 Select an option:
 - To add a favorite activity, select the activity, and select **Add Favorite**.
 - To remove a favorite activity, select the activity, and select **Remove Favorite**.

Indoor Activities

The vivoactive device can be used for training indoors, such as running on an indoor track or using a stationary bike. GPS is turned off for indoor activities.

When running or walking with GPS turned off, speed, distance, and cadence are calculated using the accelerometer in the device. The accelerometer is self-calibrating. The accuracy of the speed, distance, and cadence data improves after a few outdoor runs or walks using GPS.

TIP: Holding the handrails of the treadmill reduces accuracy. You can use an optional foot pod to record pace, distance, and cadence.

When cycling with GPS turned off, speed and distance are not available unless you have an optional sensor that sends speed and distance data to the device (such as a speed or cadence sensor).

Recording a Strength Training Activity

You can record sets during a strength training activity. A set is multiple repetitions (reps) of a single move.

- 1 Press the key.
- 2 Select **Strength**.
- 3 Press the key to start the activity timer.
- 4 Start your first set.

The device counts your reps. Your rep count appears when you complete at least 6 reps.

TIP: The device can only count reps of a single move for each set. When you want to change moves, you should finish the set and start a new one.
- 5 Double tap the touchscreen to finish the set.

The watch displays the total reps for the set. After several seconds, the rest timer appears.
- 6 If necessary, hold the touchscreen, select **Edit Last Set**, and edit the number of reps.
- 7 When you are done resting, double tap the touchscreen to start your next set.
- 8 Repeat for each strength training set until your activity is complete.
- 9 After your last set, press the key to stop the timer.
- 10 Select **Done** >  to finish and save the activity.

Calibrating the Treadmill Distance

To record more accurate distances for your treadmill runs, you can calibrate the treadmill distance after you run at least 1.5 km (1 mi.) on a treadmill. If you use different treadmills, you can manually recalibrate the treadmill distance on each treadmill or after each run.

- 1 Start a treadmill activity ([Starting an Activity, page 11](#)).
- 2 Run on the treadmill until your vivoactive device records at least 1.5 km (1 mi.).
- 3 After you complete your run, press the key, and select **Done**.
- 4 Select an option:
 - To calibrate the treadmill distance the first time, select . The device prompts you to complete the treadmill calibration.
 - To manually recalibrate the treadmill distance after the first-time calibration, select **•••** > **Calibrate**.
- 5 Check the treadmill display for the distance traveled, and enter the distance on your device.

Outdoor Activities

The vivoactive device comes preloaded with apps for outdoor activities, such as running and biking. GPS is turned on for outdoor activities. You can add apps using default activities, such as cardio or rowing.

Going for a Run

Before you can use a wireless sensor for your run, you must pair the sensor with your device ([Pairing Your Wireless Sensors, page 20](#)).

- 1 Put on your wireless sensors, such as a foot pod or heart rate monitor (optional).
- 2 Press the key.
- 3 Select **Run**.
- 4 When using optional wireless sensors, wait while the device connects to the sensors.
- 5 Go outside, and wait while the device locates satellites.
- 6 Press the key to start the activity timer.
The device records activity data only while the activity timer is running.
- 7 Start your activity.
- 8 Swipe up or down to scroll through data screens.
- 9 After you complete your activity, press the key, and select to save the activity.

Going for a Ride

Before you can use a wireless sensor for your ride, you must pair the sensor with your device ([Pairing Your Wireless Sensors, page 20](#)).

- 1 Pair your wireless sensors, such as a heart rate monitor, speed sensor, or cadence sensor (optional).
- 2 Press the key.
- 3 Select **Bike**.
- 4 When using optional wireless sensors, wait while the device connects to the sensors.
- 5 Go outside, and wait while the device locates satellites.
- 6 Press the key to start the activity timer.
The device records activity data only while the activity timer is running.
- 7 Start your activity.
- 8 Swipe up or down to scroll through data screens.
- 9 After you complete your activity, press the key, and select to save the activity.

Viewing Your Ski Runs

Your device records the details of each downhill skiing or snowboarding run using the auto run feature. This feature is turned on by default for downhill skiing and snowboarding. It automatically records new ski runs based on your movement. The timer pauses when you stop moving downhill and when you are on a chairlift. The timer remains paused during the chairlift

ride. You can start moving downhill to restart the timer. You can view run details from the paused screen or while the timer is running.

- 1 Start a skiing or snowboarding activity.
- 2 Hold the touchscreen.
- 3 Select **View Runs**.
- 4 Select and to view details of your last run, your current run, and your total runs.
The run screens include time, distance traveled, maximum speed, average speed, and total descent.

Going for a Pool Swim

NOTE: Heart rate is not available while swimming.

- 1 Press the key.
- 2 Select **Pool Swim**.
- 3 Select your pool size, or enter a custom size.
- 4 Press the key to start the activity timer.
The device records activity data only while the activity timer is running.
- 5 Start your activity.
The device automatically records swim intervals and lengths.
- 6 Press the key when you rest.
The display inverts color, and the rest screen appears.
- 7 Press the key to restart the interval timer.
- 8 After you complete your activity, hold the key to stop the activity timer, and hold the key again to save the activity.

Setting the Pool Size

- 1 Press the key.
- 2 Select **Pool Swim** > **Pool Size**.
- 3 Select your pool size, or enter a custom size.

Swim Terminology

Length: One trip down the pool.

Interval: One or more consecutive lengths. A new interval starts after a rest.

Stroke: A stroke is counted every time your arm wearing the device completes a full cycle.

Swolf: Your swolf score is the sum of the time for one pool length and the number of strokes for that length. For example, 30 seconds plus 15 strokes equals a swolf score of 45. Swolf is a measurement of swimming efficiency and, like golf, a lower score is better.

Golfing

Downloading Golf Courses

Before you play a course for the first time, you must download it using the Garmin Connect app.

- 1 From the Garmin Connect app, select **Download Golf Courses** > .
- 2 Select a golf course.
- 3 Select **Download**.
After the course finishes downloading, it appears in the list of courses on your vivoactive device.

Playing Golf

Before you play a course for the first time, you must download it using your smartphone ([Downloading Golf Courses, page 12](#)). Downloaded courses are updated automatically. Before you play golf, you should charge the device ([Charging the Device, page 21](#)).

- 1 Press the key.

- 2 Select **Golf**.
- 3 Wait while the device locates satellites.
- 4 Select a course from the list of available courses.
- 5 Swipe up or down to scroll through the holes.

The device automatically transitions when you move to the next hole.

Hole Information

The device calculates the distance to the front and back of the green, and to the selected pin location ([Changing the Pin Location](#), page 13).

①	Current hole number
②	Distance to the back of the green
③	Distance to the selected pin location
④	Distance to the front of the green
⑤	Par for the hole
⑥	Map of the green

Changing the Pin Location

While playing a game, you can take a closer look at the green and move the pin location.

- 1 Select the map.

A larger view of the green appears.
- 2 Swipe up or down to scroll through the pin locations.

📌 indicates the selected pin location.
- 3 Press the key to accept the pin location.

The distances on the hole information screen are updated to reflect the new pin location. The pin location is saved for only the current round.

Viewing the Direction to the Pin

The PinPointer feature is a compass that provides directional assistance when you are unable to see the green. This feature can help you line up a shot even if you are in the woods or in a deep sand trap.

NOTE: Do not use the PinPointer feature while in a golf cart. Interference from the golf cart can affect the accuracy of the compass.

- 1 Press the key.
- 2 Select 📍.

The arrow points to the pin location.

Viewing Layout and Dogleg Distances

You can view a list of layout and dogleg distances for par 4 and 5 holes.

- 1 Press the key.
- 2 Select 📏.

NOTE: Distances and locations are removed from the list as you pass them.

Viewing Hazards

You can view distances to hazards along the fairway for par 4 and 5 holes. Hazards that affect shot selection are displayed

individually or in groups to help you determine the distance to layout or carry.

- 1 From the hole information screen, press the key, and select ⚠️.

- The distances to the front ① and back ② of the nearest hazard appear on the screen.
- The hazard type ③ is listed at the top of the screen.
- The green is represented as a half circle ④ at the top of the screen. The line below the green represents the center of the fairway.
- Hazards ⑤ are indicated by a letter signifying the order of the hazards on the hole, and are shown below the green in approximate locations relative to the fairway.

- 2 Swipe to view other hazards for the current hole.

Measuring a Shot with the Garmin AutoShot™ Feature

Your vivoactive device features automatic shot detection and recording. Each time you take a shot along the fairway, the device records your shot distance so you can view it later ([Viewing Your Shot History](#), page 14).

TIP: Automatic shot detection works best when you wear the device on your leading wrist and make good contact with the ball. Putts are not detected.

- 1 Begin playing a round.

When the device detects a shot, your distance from the shot location appears in the banner ① at the top of the screen.

TIP: You can tap the banner to hide it for 10 seconds.

- 2 Walk or drive to your ball.
- 3 Hit your next shot.

The device records the distance of your last shot.

Keeping Score

- 1 While playing golf, press the key.
- 2 Select 📝.
- 3 If necessary, hold the touchscreen to set up scoring or change par for the hole.
- 4 Swipe up or down to change holes.
- 5 Tap the center of the screen.
- 6 Select — or + to set the score.

Setting the Scoring Method

You can change the method the device uses to keep score.

- 1 From the scorecard, hold the touchscreen.
- 2 Select **Golf Settings** > **Scoring** > **Scoring Method**.
- 3 Select a scoring method.

About Stableford Scoring

When you select the Stableford scoring method ([Setting the Scoring Method, page 13](#)), points are awarded based on the number of strokes taken relative to par. At the end of a round, the highest score wins. The device awards points as specified by the United States Golf Association.

The scorecard for a Stableford scored game shows points instead of strokes.

Points	Strokes Taken Relative to Par
0	2 or more over
1	1 over
2	Par
3	1 under
4	2 under
5	3 under

Tracking Golf Statistics

When you enable statistics tracking on the device, you can view your statistics for the current round ([Viewing Your Round Summary, page 14](#)). You can compare rounds and track improvements using the Garmin Golf™ app.

- 1 From the scorecard, hold the touchscreen.
- 2 Select **Golf Settings > Scoring > Stat Tracking**.

Recording Golf Statistics

Before you can record statistics, you must enable statistics tracking ([Tracking Golf Statistics, page 14](#)).

- 1 From the scorecard, tap the center of the screen.
- 2 Set the number of strokes taken, and select **Next**.
- 3 Set the number of putts taken, and select **Done**.
- 4 Select an option:
 - If your ball hit the fairway, select .
 - If your ball missed the fairway, select  or .

Viewing Your Shot History

- 1 After playing a hole, press the key.
- 2 Select  to view information for your last shot.
- 3 Select  to view information about each shot for a hole.

Viewing Your Round Summary

During a round, you can view your score, statistics, and step information.

- 1 Press the key.
- 2 Select .

Ending a Round

- 1 Press the key.
- 2 Select **End**.
- 3 Select an option:
 - To view your statistics and round information, tap your score.
 - To save the round and return to watch mode, select **Save**.
 - To edit your scorecard, select **Edit Score**.
 - To discard the round and return to watch mode, select **Discard**.
 - To pause the round and resume it at a later time, select **Pause**.

Golf Settings

From the watch face, hold the touchscreen, and select **Settings > Activities & Apps > Golf > Golf Settings**.

Scoring: Allows you to set the scoring options ([Scoring Settings, page 14](#)).

Driver Distance: Sets the average distance the ball travels on your drive.

Big Numbers: Changes the size of the numbers on the hole view screen.

Scoring Settings

From the watch face, hold the touchscreen, and select **Settings > Activities & Apps > Golf > Golf Settings > Scoring**.

Status: Sets score keeping to on or off automatically when you start a round. The Always Ask option prompts you when you begin a round.

Stat Tracking: Enables statistics tracking for the number of putts, greens in regulation, and fairways hit while playing golf.

2 Players: Sets the scorecard to keep score for two players.

NOTE: This setting is only available during a round. You must enable this setting each time you begin a round.

Scoring Method: Changes the method the device uses to keep score.

Garmin Golf App

The Garmin Golf app allows you to upload scorecards from your compatible Garmin device to view detailed statistics and shot analyses. Golfers can compete with each other at different courses using the Garmin Golf app. More than 41,000 courses have leaderboards that anyone can join. You can set up a tournament event and invite players to compete.

The Garmin Golf app syncs your data with your Garmin Connect account. You can download the Garmin Golf app from the app store on your smartphone.

Training

Setting Up Your User Profile

You can update your gender, birth year, height, weight, wrist, and heart rate zone ([Setting Your Heart Rate Zones, page 8](#)) settings. The device uses this information to calculate accurate training data.

- 1 Hold the touchscreen.
- 2 Select **Settings > User Profile**.
- 3 Select an option.

Fitness Goals

Knowing your heart rate zones can help you measure and improve your fitness by understanding and applying these principles.

- Your heart rate is a good measure of exercise intensity.
- Training in certain heart rate zones can help you improve cardiovascular capacity and strength.

If you know your maximum heart rate, you can use the table ([Heart Rate Zone Calculations, page 8](#)) to determine the best heart rate zone for your fitness objectives.

If you do not know your maximum heart rate, use one of the calculators available on the Internet. Some gyms and health centers can provide a test that measures maximum heart rate. The default maximum heart rate is 220 minus your age.

Workouts

Your device can guide you through multiple-step workouts that include goals for each workout step, such as distance, time, reps, or other metrics. Your device includes several preloaded workouts for multiple activities, including strength, cardio, running, and biking. You can create and find more workouts and training plans using Garmin Connect and transfer them to your device.

You can create a scheduled training plan using the calendar in Garmin Connect and send the scheduled workouts to your device.

Following a Workout

Your device can guide you through multiple steps in a workout.

- 1 Press the key.
- 2 Select an activity.
- 3 Select **Workouts**.
NOTE: This option appears only when you have workouts loaded on your device for the selected activity.
- 4 Select a workout.
- 5 Select **Do Workout**.
- 6 Press the key to start the activity timer.
The device briefly displays the goals for the first step of your workout.
- 7 After you complete the workout step, double-tap the touchscreen to start the next step.
A summary of the workout step appears. After several seconds, the rest timer and the goals for the next step appear.
- 8 While resting, swipe down to view notes and additional details about the next workout step (optional).
- 9 Double-tap the touchscreen to start the next step.
- 10 Repeat steps 6 through 9 until you complete all of the steps in the workout.
TIP: If you want to stop the workout early, you can press the key to stop the activity timer.
- 11 If necessary, select ➡ to end the cool down step.
- 12 After you complete your activity, press the key, and select ☑ to save the activity.

Using Garmin Connect Training Plans

Before you can download and use a training plan from Garmin Connect, you must have a Garmin Connect account ([Garmin Connect](#), page 16), and you must pair the vivoactive device with a compatible smartphone.

- 1 From the Garmin Connect app, select ☰ or ⋮.
- 2 Select **Training > Training Plans**.
- 3 Select and schedule a training plan.
- 4 Follow the on-screen instructions.
- 5 Review the training plan in your calendar.

Starting Today's Workout

After you send a training plan to your device, the Garmin Coach widget appears in your widget loop.

- 1 From the watch face, swipe to view the Garmin Coach widget.
If a workout for this activity is scheduled for today, the device shows the workout name and prompts you to start it.
- 2 Select a workout.
- 3 Select **View** to view the workout steps, and swipe right when you are finished viewing the steps (optional).
- 4 Select **Do Workout**.
- 5 Follow the on-screen instructions.

Viewing Scheduled Workouts

You can view workouts scheduled in your training calendar and start a workout.

- 1 Press the key.
- 2 Select an activity.
- 3 Select **Workouts > Training Calendar**.
Your scheduled workouts appear, sorted by date.

- 4 Select a workout.
- 5 Select an option:
 - To view the steps for the workout, select **View**.
 - To start the workout, select **Do Workout**.

Adaptive Training Plans

Your Garmin Connect account has an adaptive training plan and Garmin coach to fit your training goals. For example, you can answer a few questions and find a plan to help you complete a 5 km race. The plan adjusts to your current level of fitness, coaching and schedule preferences, and race date. When you start a plan, the Garmin Coach widget is added to the widget loop on your vivoactive device.

Personal Records

When you complete an activity, the device displays any new personal records you achieved during that activity. Personal records include your fastest time over several typical race distances and longest run or ride.

Viewing Your Personal Records

- 1 Hold the touchscreen.
- 2 Select **My Stats > Records**.
- 3 Select a sport.
- 4 Select a record.
- 5 Select **View Record**.

Restoring a Personal Record

You can set each personal record back to the one previously recorded.

- 1 Hold the touchscreen.
- 2 Select **My Stats > Records**.
- 3 Select a sport.
- 4 Select a record to restore.
- 5 Select **Previous > Yes**.

NOTE: This does not delete any saved activities.

Clearing a Personal Record

- 1 Hold the touchscreen.
- 2 Select **My Stats > Records**.
- 3 Select a sport.
- 4 Select a record to delete.
- 5 Select **Clear Record > Yes**.

NOTE: This does not delete any saved activities.

Clearing All Personal Records

- 1 Hold the touchscreen.
- 2 Select **My Stats > Records**.
- 3 Select a sport.
- 4 Select **Clear All Records > Yes**.

The records are deleted for that sport only.

Navigation

You can use the GPS navigation features on your device to save locations, navigate to locations, and find your way home.

Saving Your Location

Before you can navigate to a saved location, your device must locate satellites.

A location is a point that you record and store in the device. If you want to remember landmarks or return to a certain spot, you can mark a location.

- 1 Go to the place where you want to mark a location.
- 2 Press the key.
- 3 Select **Navigate > Save Location**.
After the device acquires GPS signals, the location information appears.
- 4 Select **Save**.
- 5 Select an icon.

Deleting a Location

- 1 Press the key.
- 2 Select **Navigate > Saved Locations**.
- 3 Select a location.
- 4 Select **Delete > Yes**.

Navigating to a Saved Location

Before you can navigate to a saved location, your device must locate satellites.

- 1 Press the key.
- 2 Select **Navigate > Saved Locations**.
- 3 Select a location, and select **Go To**.
- 4 Press the key to start the activity timer.
- 5 Move forward.

The compass appears. The compass arrow points toward the saved location.

TIP: For more accurate navigation, orient the top of the screen toward the direction in which you are moving.

Navigating Back to Start

Before you can navigate back to start, you must locate satellites, start the timer, and start your activity.

At any time during your activity, you can return to your starting location. For example, if you are running in a new city, and you are unsure how to get back to the trail head or hotel, you can navigate back to your starting location. This feature is not available for all activities.

- 1 Hold the touchscreen.
- 2 Select **Navigation > Back to Start**.
The compass appears.
- 3 Move forward.

The compass arrow points toward your starting point.

TIP: For more accurate navigation, orient your device toward the direction in which you are navigating.

Stopping Navigation

- To stop navigation and continue your activity, hold the touchscreen, and select **Stop Navigation**.
- To stop navigation and end your activity, press the key, and select **Done**.

Compass

The device has a 3-axis compass with automatic calibration. The compass features and appearance change depending on your activity, whether GPS is enabled, and whether you are navigating to a destination.

Calibrating the Compass Manually

NOTICE

Calibrate the electronic compass outdoors. To improve heading accuracy, do not stand near objects that influence magnetic fields, such as vehicles, buildings, and overhead power lines.

Your device was already calibrated at the factory, and the device uses automatic calibration by default. If you experience

irregular compass behavior, for example, after moving long distances or after extreme temperature changes, you can manually calibrate the compass.

- 1 Hold the touchscreen.
- 2 Select **Settings > Sensors & Accessories > Compass > Calibrate > Start**.
- 3 Follow the on-screen instructions.

TIP: Move your wrist in a small figure eight motion until a message appears.

History

Your device stores up to 14 days of activity tracking and heart rate monitoring data, and up to seven timed activities. You can view your last seven timed activities on your device. You can synchronize your data to view unlimited activities, activity tracking data, and heart rate monitoring data on your Garmin Connect account ([Using the Garmin Connect App, page 17](#)) ([Using Garmin Connect on Your Computer, page 17](#)).

When the device memory is full, your oldest data is overwritten.

Using History

- 1 Hold the touchscreen.
- 2 Select **History > Activities**.
- 3 Select an activity.
- 4 Select an option:
 - Scroll to view additional information about the activity.
 - Select **Laps** to view additional information about each lap.
 - Select **Sets** to view additional information about each weight lifting set.
 - Select **Intervals** to view additional information about each swim interval.
 - Select **HR Zones** to view your time in each heart rate zone.
 - Select **Delete** to delete the selected activity.

Viewing Your Time in Each Heart Rate Zone

Before you can view heart rate zone data, you must complete an activity with heart rate and save the activity.

Viewing your time in each heart rate zone can help you adjust your training intensity.

- 1 Hold the touchscreen.
- 2 Select **History > Activities**.
- 3 Select an activity.
- 4 Select **HR Zones**.

Garmin Connect

Your Garmin Connect account allows you to track your performance and connect with your friends. It gives you the tools to track, analyze, share, and encourage each other. You can record the events of your active lifestyle, including runs, walks, rides, swims, hikes, golf games, and more.

You can create your free Garmin Connect account when you pair your device with your phone using the Garmin Connect app. You can also create an account when you set up the Garmin Express application (www.garmin.com/express).

Store your activities: After you complete and save a timed activity with your device, you can upload that activity to your Garmin Connect account and keep it as long as you want.

Analyze your data: You can view more detailed information about your fitness and outdoor activities, including time, distance, heart rate, calories burned, cadence, an overhead map view, and pace and speed charts. You can view more detailed information about your golf games, including

scorecards, statistics, and course information. You can also view customizable reports.

NOTE: To view some data, you must pair an optional wireless sensor with your device ([Pairing Your Wireless Sensors](#), page 20).

Track your progress: You can track your daily steps, join a friendly competition with your connections, and meet your goals.

Share your activities: You can connect with friends to follow each other's activities or post links to your activities on your favorite social networking sites.

Manage your settings: You can customize your device and user settings on your Garmin Connect account.

Using the Garmin Connect App

After you pair your device with your smartphone ([Pairing Your Smartphone](#), page 2), you can use the Garmin Connect app to upload all of your activity data to your Garmin Connect account.

- 1 Verify the Garmin Connect app is running on your smartphone.
- 2 Bring your device within 10 m (30 ft.) of your smartphone. Your device automatically syncs your data with the Garmin Connect app and your **Garmin Connect** account.

Using Garmin Connect on Your Computer

The Garmin Express application connects your device to your Garmin Connect account using a computer. You can use the Garmin Express application to upload your activity data to your Garmin Connect account and to send data, such as workouts or training plans, from Garmin Connect website to your device. You can also install device software updates and manage your Connect IQ apps.

- 1 Connect the device to your computer using the USB cable.
- 2 Go to www.garmin.com/express.
- 3 Download and install the Garmin Express application.
- 4 Open the Garmin Express application, and select **Add Device**.
- 5 Follow the on-screen instructions.

Customizing Your Device

Changing the Watch Face

You can choose from several preloaded watch faces or use a Connect IQ watch face that is downloaded to your device ([Connect IQ Features](#), page 4). You can also customize a preloaded watch face or create a new one ([Creating a Custom Watch Face](#), page 17).

- 1 From the watch face, hold the touchscreen.
- 2 Select **Watch Face**.
- 3 Swipe up or down to scroll through the available watch faces.

- 4 Tap the screen to select the watch face.
- 5 Select **Apply** to activate the displayed watch face.

Creating a Custom Watch Face

You can customize the style and data fields for the watch face.

- 1 From the watch face, hold the touchscreen.
- 2 Select **Watch Face**.
- 3 Select an option:
 - To customize an existing watch face, select the watch face, and select **Customize**.
 - To create a new watch face, swipe to the bottom of the watch face list, and select **Create New**.
- 4 Swipe up or down to scroll through the analog and digital dials, and tap the screen to select the displayed dial.
- 5 Select each data field you want to customize, and select the data to display in it.

A green border indicates the customizable data fields for this dial.
- 6 Swipe left to customize the watch face hands.

NOTE: This option is available only for analog dials.
- 7 Swipe up or down to scroll through the hand styles, and tap the screen to select the displayed hands.
- 8 Swipe left, and select an accent color.
- 9 Select ✓.
- 10 Select **Done**.

The device sets the new watch face as your active watch face.

Customizing the Controls Menu

You can add, remove, and change the order of the shortcut menu options in the controls menu ([Using the Controls Menu](#), page 1).

- 1 Hold the key.

The controls menu appears.
- 2 Hold the touchscreen.

The controls menu switches to edit mode.
- 3 Select the shortcut you want to customize.
- 4 Select an option:
 - To change the location of the shortcut in the controls menu, select the location where you want it to appear, or drag the shortcut to a new location.
 - To remove the shortcut from the controls menu, select .
- 5 If necessary, select **+** to add a shortcut to the controls menu.

NOTE: This option is available only after you remove at least one shortcut from the menu.

Activities and App Settings

These settings allow you to customize each preloaded activity app based on your needs. For example, you can customize data pages and enable alerts and training features. Not all settings are available for all activity types.

Press the key, select an activity, and select Settings.

Accent Color: Sets the accent color of each activity to help identify which activity is active.

Alerts: Sets the training alerts for the activity ([Alerts](#), page 18).

Auto Activity Start: Sets the minimum time threshold for automatically detecting and recording a timed activity. This feature is available for walking and running only.

Auto Pause: Sets the device to stop recording data when you stop moving or when you drop below a specified speed ([Using Auto Pause](#), page 18).

Auto Run: Enables the device to detect ski runs automatically using the built-in accelerometer.

Auto Scroll: Enables you to move through all of the activity data screens automatically while the timer is running ([Using Auto Scroll, page 19](#)).

Background: Sets the background color of each activity to black or white.

Data Screens: Enables you to customize data screens and add new data screens for the activity ([Customizing the Data Screens, page 18](#)).

GPS: Sets the mode for the GPS antenna. Using the GPS + GLONASS or GPS + GALILEO options provides increased performance in challenging environments and faster position acquisition. Using the GPS and another satellite together can reduce battery life more than using the GPS option only.

Laps: Sets the options for the Auto Lap® feature ([Marking Laps Using the Auto Lap Feature, page 18](#)), and turns on the manual lap function ([Turning On the Manual Lap Function, page 18](#)).

Pool Size: Sets the pool length for pool swimming.

Customizing the Data Screens

You can customize data screens based on your training goals or optional accessories. For example, you can customize one of the data screens to display your lap pace or heart rate zone.

- 1 Press the key.
- 2 Select an activity.
- 3 Select **Settings > Data Screens**.
- 4 Select one or more options:
 - To adjust the style and number of data fields on each data screen, select **Layout**.
 - To customize the fields on a data screen, select the screen, and select **Edit Data Fields**.
 - To show or hide a data screen, select the toggle switch next to the screen.
 - To show or hide the heart rate zone gauge screen, select **HR Zone Gauge**.

Alerts

You can set alerts for each activity, which can help you to train toward specific goals. Some alerts are available only for specific activities. Some alerts require optional accessories, such as a heart rate monitor or cadence sensor. There are three types of alerts: event alerts, range alerts, and recurring alerts.

Event alert: An event alert notifies you once. The event is a specific value. For example, you can set the device to alert you when you burn a specified number of calories.

Range alert: A range alert notifies you each time the device is above or below a specified range of values. For example, you can set the device to alert you when your heart rate is below 60 beats per minute (bpm) and over 210 bpm.

Recurring alert: A recurring alert notifies you each time the device records a specified value or interval. For example, you can set the device to alert you every 30 minutes.

Alert Name	Alert Type	Description
Cadence	Range	You can set minimum and maximum cadence values.
Calories	Event, recurring	You can set the number of calories.
Custom	Recurring	You can select an existing message or create a custom message and select an alert type.
Distance	Recurring	You can set a distance interval.
Heart Rate	Range	You can set minimum and maximum heart rate values or select zone changes.

Alert Name	Alert Type	Description
Pace	Range	You can set minimum and maximum pace values.
Run/Walk	Recurring	You can set timed walking breaks at regular intervals.
Speed	Range	You can set minimum and maximum speed values.
Stroke Rate	Range	You can set high or low strokes per minute.
Time	Event, recurring	You can set a time interval.

Setting an Alert

- 1 Press the key.
NOTE: This feature is not available for all activities.
- 2 Select an activity.
- 3 Select **Settings > Alerts**.
- 4 Select an option:
 - To add a new alert for the activity, select **Add New**.
 - To edit an existing alert, select the alert name.
- 5 If necessary, select the type of alert.
- 6 Select a zone, enter the minimum and maximum values, or enter a custom value for the alert.
- 7 If necessary, turn on the alert.

For event and recurring alerts, a message appears each time you reach the alert value ([Alerts, page 18](#)). For range alerts, a message appears each time you exceed or drop below the specified range (minimum and maximum values).

Auto Lap

Marking Laps Using the Auto Lap Feature

You can set your device to use the Auto Lap feature to mark a lap at a specific distance automatically. This feature is helpful for comparing your performance over different parts of an activity (for example, every 1 mile or 5 kilometers).

- 1 Press the key.
- 2 Select an activity.
NOTE: This feature is not available for all activities.
- 3 Select **Settings > Laps**.
- 4 Select an option:
 - To turn the Auto Lap feature on or off, select the toggle switch.
 - To adjust the distance between laps, select **Auto Lap**.

Each time you complete a lap, a message appears that displays the time for that lap. The device also vibrates if vibration is turned on ([System Settings, page 19](#)).

Turning On the Manual Lap Function

You can mark laps at any time or distance by double tapping the touchscreen during timed activities such as running and biking.

- 1 Press the key.
- 2 Select an activity.
NOTE: This feature is not available for all activities.
- 3 Select **Settings > Laps > Manual Lap**.

Each time you mark a lap, a message appears that displays the time for that lap. The device also vibrates if vibration is turned on ([System Settings, page 19](#)).

The lap function stays on for the selected activity until you turn off the lap function.

Using Auto Pause®

You can use the Auto Pause feature to pause the timer automatically when you stop moving or when your pace or speed drops below a specified value. This feature is helpful if

your activity includes stop lights or other places where you need to slow down or stop.

NOTE: The device does not record activity data while the timer is stopped or paused.

- 1 Press the key.
- 2 Select an activity.
- 3 Select **Settings > Auto Pause**.

NOTE: This feature is not available for all activities.

- 4 Select an option:

NOTE: Not all options are available for all activities.

- To pause the timer automatically when you stop moving, select **When Stopped**.
- To pause the timer automatically when your pace drops below a specified value, select **Pace**.
- To pause the timer automatically when your speed drops below a specified value, select **Speed**.

Using Auto Scroll

You can use the auto scroll feature to cycle through all of the data screens automatically while the timer is running.

- 1 Press the key.
- 2 Select an activity.
- 3 Select **Settings > Auto Scroll**.

NOTE: This feature is not available for all activities.

- 4 Select a display speed.

Phone and Bluetooth Settings

Hold the touchscreen, and select **Settings > Connectivity > Phone**.

Status: Displays the current Bluetooth connection status and allows you to turn Bluetooth technology on or off.

Notifications: The device turns smart notifications on and off automatically based on your selections ([Enabling Bluetooth Notifications, page 3](#)).

Pair Phone: Connects your device with a compatible smartphone equipped with Bluetooth technology.

Connected Alerts: Alerts you when your paired smartphone connects and disconnects.

Stop LiveTrack: Allows you to stop a LiveTrack session while one is in progress.

4G LTE Settings

Hold the touchscreen, and select **Settings > Connectivity > 4G LTE**.

Status: Displays the current 4G LTE connection status and allows you to turn 4G LTE on or off.

Connected Alerts: Alerts you when 4G LTE connects and disconnects.

System Settings

Hold the touchscreen, and select **Settings > System**.

Auto Lock: Automatically locks the touchscreen to prevent inadvertent screen touches. You can press the key to unlock the touchscreen.

Language: Sets the language of the device interface.

Time: Sets the time format and source for local time ([Time Settings, page 19](#)).

Date: Allows you to manually set the date and date format.

Physio TrueUp: Allows your device to sync activities, history, and data from other Garmin devices.

Backlight: Sets the backlight mode, timeout, and brightness ([Backlight Settings, page 20](#)).

Vibration: Turns vibration on or off and sets the vibration intensity.

Do Not Disturb: Turns on or off do not disturb mode.

Units: Sets the measurement units used to display data ([Changing the Units of Measure, page 20](#)).

Data Recording: Sets how the device records activity data. The Smart recording option (default) allows for longer activity recordings. The Every Second recording option provides more detailed activity recordings, but may require you to charge the battery more frequently.

USB Mode: Sets the device to use media transfer mode or Garmin mode when connected to a computer.

Reset: Allows you to reset the default settings or delete personal data and reset the settings ([Restoring All Default Settings, page 23](#)).

NOTE: If you have set up a Garmin Pay wallet, restoring default settings also deletes the wallet from your device.

Software Update: Allows you to check for software updates.

About: Displays the unit ID, software version, regulatory information, and license agreement.

Time Settings

Hold the touchscreen, and select **Settings > System > Time**.

Time Format: Sets the device to show time in a 12-hour or a 24-hour format.

Time Source: Allows you to set the time manually or automatically based on your paired mobile device.

Set Time with GPS: Allows the device to set the time of day automatically based on your GPS position.

Time Zones

Each time you turn on the device and acquire satellites or sync with your smartphone, the device automatically detects your time zone and the current time of day.

Setting the Time Manually

By default, the time is set automatically when the vivoactive device is paired with a mobile device.

- 1 Hold the touchscreen.
- 2 Select **Settings > System > Time > Time Source > Manual**.
- 3 Select **Time**, and enter the time of day.

Setting the Alarm

- 1 Hold the touchscreen.
- 2 Select **Clocks > Alarms > Add New**.
- 3 Select **Time**, and enter a time.
- 4 Select **Repeat**, and select an option.

Deleting an Alarm

- 1 Hold the touchscreen.
- 2 Select **Clocks > Alarms**.
- 3 Select an alarm, and select **Remove**.

Starting the Countdown Timer

- 1 Hold the touchscreen.
- 2 Select **Clocks > Timer**.
- 3 Enter the time.
- 4 Select **Start**.
- 5 If necessary, select the touchscreen for more options.

Using the Stopwatch

- 1 Hold the touchscreen.
- 2 Select **Clocks > Stopwatch**.
- 3 Press the key.

Backlight Settings

Hold the touchscreen, and select **Settings > System > Backlight**.

Mode: Sets the backlight to turn on when you interact with the device, which includes receiving a notification or using the key or touchscreen.

Gesture: Sets the backlight to turn on when you rotate your wrist toward your body to view the device. You can use the Only During Activity option to use this feature only during timed activities.

Timeout: Sets the length of time before the backlight turns off.

Brightness: Sets the brightness level of the backlight. During an activity, the backlight uses the brightest setting.

Changing the Units of Measure

You can customize units of measure for distance, pace and speed, elevation, weight, height, and temperature.

- 1 Hold the touchscreen.
- 2 Select **Settings > System > Units**.
- 3 Select a measurement type.
- 4 Select a unit of measure.

Garmin Connect Settings

You can change your device settings from your Garmin Connect account, using either the Garmin Connect app or the Garmin Connect website. Some settings are available only using your Garmin Connect account and cannot be changed on your device.

- In the Garmin Connect app, select the image of your device, and select **Device Settings**.
- On the Garmin Connect website, from the devices widget, select **Device Settings**.

After customizing settings, sync your data to apply the changes to your device (*Using the Garmin Connect App, page 17*, *Using Garmin Connect on Your Computer, page 17*).

Device Settings on Your Garmin Connect Account

From your Garmin Connect account, select your device to view the device settings.

NOTE: Some settings appear in a subcategory in the settings menu. App or website updates may change these settings menus.

Activity Tracking: Turns activity tracking features on and off.

Appearance: Allows you to change the watch face, widgets, and shortcuts that appear in the controls menu (*Customizing the Controls Menu, page 17*).

Auto Activity Start: Allows your device to create and save timed activities automatically when the Move IQ feature detects you have been walking or running for a minimum time threshold. You can set the minimum time threshold for running and walking.

Automatic App Updates: Allows your device to receive Connect IQ app updates automatically.

Data Recording: Sets how the device records activity data. The Smart recording option (default) allows for longer activity recordings. The Every Second recording option provides more detailed activity recordings, but may require you to charge the battery more frequently.

Date Format: Sets the month and day format.

Distance: Sets the device to display the distance traveled in kilometers or miles.

Goals: Allows you to set a custom goal for daily steps and floors climbed. You can use the Auto Goal setting to allow your device to determine your step goal automatically. You can also set the weekly intensity minutes goal.

Goal Animations: Allows you to turn on and off goal animations, or turn them off only during activities. Goal animations appear for your daily steps goal, daily floors climbed goal, and weekly intensity minutes goal.

Heart Rate Zones: Allows you to estimate your maximum heart rate and determine custom heart rate zones.

Language: Sets the language of the device interface.

Move Alert: Displays a message and the move bar on the digital watch face and steps screen. The device also vibrates if vibrations are turned on.

Move IQ: Allows you to turn on and off Move IQ events. The Move IQ feature automatically detects activity patterns, such as walking, running, cycling, swimming, and elliptical training.

Preferred Activity Tracker: Sets this device to be your primary activity tracking device when more than one device is connected to the app.

Sounds & Alerts: Allows you to customize alarms and phone notifications. You can also turn on and off the Do Not Disturb During Sleep feature.

Text Responses: Allows you to customize the list of automatic text message responses. Based on your messaging setup, this feature may not be available (*Messaging Options and Behavior, page 2*).

Time Format: Sets the device to display time in a 12-hour or 24-hour format.

Wrist Worn On: Allows you to customize which wrist the device is worn on.

NOTE: This setting is used for strength training and gestures.

User Settings on Your Garmin Connect Account

From your Garmin Connect account, select **Settings > User Settings**.

TIP: Some user settings are available in the vivoactive Device Settings menu.

Personal Information: Allows you to enter your personal details, such as birth date, gender, height, and weight.

Sleep: Allows you to enter your normal sleep hours.

Stride Length: Allows your device to more accurately calculate the distance traveled using your custom step length for walking and running. You can enter a known distance and the number of steps it takes to cover the distance, and Garmin Connect can calculate your step length.

Units: Allows you to set statute or metric units of measure.

Wireless Sensors

Your device can be used with wireless ANT+ or Bluetooth sensors. For more information about compatibility and purchasing optional sensors, go to buy.garmin.com.

Pairing Your Wireless Sensors

The first time you connect a wireless ANT+ or Bluetooth sensor to your Garmin device, you must pair the device and sensor. After they are paired, the device connects to the sensor automatically when you start an activity and the sensor is active and within range.

TIP: Some ANT+ sensors pair with your device automatically when you start an activity with the sensor turned on and near the device.

- 1 Move at least 10 m (33 ft.) away from other wireless sensors.
- 2 If you are pairing a heart rate monitor, put on the heart rate monitor.
The heart rate monitor does not send or receive data until you put it on.
- 3 Hold the touchscreen.

4 Select **Settings > Sensors & Accessories > Add New**.

5 Bring the device within 3 m (10 ft.) of the sensor, and wait while the device pairs with the sensor.

After the device connects to the sensor, an icon appears at the top of the screen.

Foot Pod

Your device is compatible with the foot pod. You can use the foot pod to record pace and distance instead of using GPS when you are training indoors or when your GPS signal is weak. The foot pod is on standby and ready to send data (like the heart rate monitor).

After 30 minutes of inactivity, the foot pod powers off to conserve the battery. When the battery is low, a message appears on your device. Approximately five hours of battery life remain.

Calibrating Your Foot Pod

Before you can calibrate your foot pod, you must pair your device with the foot pod ([Pairing Your Wireless Sensors, page 20](#)).

Manual calibration is recommended if you know your calibration factor. If you have calibrated a foot pod with another Garmin product, you may know your calibration factor.

- 1 Hold the touchscreen.
- 2 Select **Settings > Sensors & Accessories > Foot Pod > Calib. Factor**.
- 3 Adjust the calibration factor:
 - Increase the calibration factor if your distance is too low.
 - Decrease the calibration factor if your distance is too high.

Improving Foot Pod Calibration

Before you can calibrate your device, you must acquire GPS signals and pair your device with the foot pod ([Pairing Your Wireless Sensors, page 20](#)).

The foot pod is self-calibrating, but you can improve the accuracy of the speed and distance data with a few outdoor runs using GPS.

- 1 Stand outside for 5 minutes with a clear view of the sky.
- 2 Start a running activity.
- 3 Run on a track without stopping for 10 minutes.
- 4 Stop your activity, and save it.

Based on the recorded data, the foot pod calibration value changes, if necessary. You should not need to calibrate the foot pod again unless your running style changes.

Using an Optional Bike Speed or Cadence Sensor

You can use a compatible bike speed or cadence sensor to send data to your device.

- Pair the sensor with your device ([Pairing Your Wireless Sensors, page 20](#)).
- Set your wheel size ([Calibrating Your Speed Sensor, page 21](#)).
- Go for a ride ([Going for a Ride, page 12](#)).

Calibrating Your Speed Sensor

Before you can calibrate your speed sensor, you must pair your device with a compatible speed sensor ([Pairing Your Wireless Sensors, page 20](#)).

Manual calibration is optional and can improve accuracy.

- 1 Hold the touchscreen.
- 2 Select **Settings > Sensors & Accessories > Speed/Cadence > Wheel Size**.
- 3 Select an option:

- Select **Auto** to automatically calculate your wheel size and calibrate your speed sensor.
- Select **Manual**, and enter your wheel size to manually calibrate your speed sensor ([Wheel Size and Circumference, page 25](#)).

Situational Awareness

Your vívoactive device can be used with Varia smart bike lights and rearview radar to improve situational awareness. See the owner's manual for your Varia device for more information.

NOTE: You may need to update the vívoactive software before pairing Varia devices ([Updating the Software Using the Garmin Connect App, page 21](#)).

tempe

The tempe is an ANT+ wireless temperature sensor. You can attach the sensor to a secure strap or loop where it is exposed to ambient air, and therefore, provides a consistent source of accurate temperature data. You must pair the tempe with your device to display temperature data from the tempe.

Device Information

Charging the Device

⚠ WARNING

This device contains a lithium-ion battery. See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.

NOTICE

To prevent corrosion, thoroughly clean and dry the contacts and the surrounding area before charging or connecting to a computer. Refer to the cleaning instructions in the appendix.

- 1 Plug the small end of the USB cable into the charging port on your device.

- 2 Plug the large end of the USB cable into a USB charging port.
- 3 Charge the device completely.

Product Updates

On your computer, install Garmin Express (www.garmin.com/express). On your smartphone, install the Garmin Connect app. This provides easy access to these services for Garmin devices:

- Software updates
- Course updates
- Data uploads to Garmin Connect
- Product registration

Updating the Software Using the Garmin Connect App

Before you can update your device software using the Garmin Connect app, you must have a Garmin Connect account, and

you must pair the device with a compatible smartphone ([Pairing Your Smartphone](#), page 2).

Sync your device with the Garmin Connect app ([Using the Garmin Connect App](#), page 17).

When new software is available, the Garmin Connect app automatically sends the update to your device. The update is applied when you are not actively using the device. When the update is complete, your device restarts.

Updating the Software Using Garmin Express

Before you can update your device software, you must download and install the Garmin Express application and add your device ([Using Garmin Connect on Your Computer](#), page 17).

- 1 Connect the device to your computer using the USB cable.

When new software is available, the Garmin Express application sends it to your device.

- 2 After the Garmin Express application finishes sending the update, disconnect the device from your computer.

Your device installs the update.

Viewing Device Information

You can view the unit ID, software version, regulatory information, and license agreement.

- 1 Hold the touchscreen.
- 2 Select **Settings** > **System** > **About**.

Viewing E-label Regulatory and Compliance Information

The label for this device is provided electronically. The e-label may provide regulatory information, such as identification numbers provided by the FCC or regional compliance markings, as well as applicable product and licensing information.

- 1 Hold the touchscreen.
- 2 Select **Settings** > **System** > **About**.

Specifications

Battery type	Rechargeable, built-in lithium-polymer battery
Battery life	Up to 5 days in smartwatch mode Up to 4 hr. with GPS, music, and 4G LTE
Operating temperature range	From 0° to 60°C (from 32° to 140°F)
Charging temperature range	From 0° to 45°C (from 32° to 113°F)
Wireless frequencies/protocols	2.4 GHz @ 8 dBm nominal 782 MHz @ 23 dBm nominal 1732 MHz @ 23 dBm nominal
Water rating	Swim, 5 ATM ¹

Device Care

NOTICE

Avoid extreme shock and harsh treatment, because it can degrade the life of the product.

Avoid pressing the keys under water.

Do not use a sharp object to clean the device.

Never use a hard or sharp object to operate the touchscreen, or damage may result.

Avoid chemical cleaners, solvents, and insect repellents that can damage plastic components and finishes.

Thoroughly rinse the device with fresh water after exposure to chlorine, salt water, sunscreen, cosmetics, alcohol, or other

harsh chemicals. Prolonged exposure to these substances can damage the case.

Do not store the device where prolonged exposure to extreme temperatures can occur, because it can cause permanent damage.

Cleaning the Device

NOTICE

Even small amounts of sweat or moisture can cause corrosion of the electrical contacts when connected to a charger. Corrosion can prevent charging and data transfer.

- 1 Wipe the device using a cloth dampened with a mild detergent solution.
- 2 Wipe it dry.

After cleaning, allow the device to dry completely.

TIP: For more information, go to www.garmin.com/fitandcare.

Changing the Bands

The device is compatible with 20 mm wide, standard, quick-release bands.

- 1 Slide the quick-release pin on the spring bar to remove the band.

- 2 Insert one side of the spring bar for the new band into the device.
- 3 Slide the quick-release pin, and align the spring bar with the opposite side of the device.
- 4 Repeat steps 1 through 3 to change the other band.

Troubleshooting

Is my smartphone compatible with my device?

The vívoactive device is compatible with smartphones using Bluetooth wireless technology.

Go to www.garmin.com/ble for compatibility information.

My phone will not connect to the device

If your phone will not connect to the device, you can try these tips.

- Turn off your smartphone and your device, and turn them back on again.
- Enable Bluetooth technology on your smartphone.
- Update the Garmin Connect app to the latest version.
- Remove your device from the Garmin Connect app and the Bluetooth settings on your smartphone to retry the pairing process.
- If you bought a new smartphone, remove your device from the Garmin Connect app on the smartphone you intend to stop using.
- Bring your smartphone within 10 m (33 ft.) of the device.
- On your smartphone, open the Garmin Connect app, select  or , and select **Garmin Devices** > **Add Device** to enter pairing mode.

¹ *The device withstands pressure equivalent to a depth of 50 m. For more information, go to www.garmin.com/waterrating.

- Hold the touchscreen, and select **Settings > Connectivity > Phone > Pair Phone**.

My headphones will not connect to the device

If your headphones were previously connected to your smartphone using Bluetooth technology, they may connect to your smartphone before connecting to your device. You can try these tips.

- Turn off Bluetooth technology on your smartphone.
Refer to the owner's manual for your smartphone for more information.
- Stay 10 m (33 ft.) away from your smartphone while connecting headphones to your device.
- Pair your headphones with your device ([Connecting Bluetooth Headphones](#), page 6).

My music cuts out or my headphones do not stay connected

When using a vivoactive 3 Music device connected to headphones using Bluetooth technology, the signal is strongest when there is a direct line of sight between the device and the antenna on the headphones.

- If the signal passes through your body, you may experience signal loss or your headphones may become disconnected.
- It is recommended to wear your headphones with the antenna on the same side of your body as your vivoactive 3 Music device.

My device is in the wrong language

You can change the device language selection if you have accidentally selected the wrong language on the device.

- 1 Hold the touchscreen.
- 2 Scroll down to the last item in the list, and select it.
- 3 Scroll down to the last item in the list, and select it.
- 4 Scroll down to the second item in the list, and select it.
- 5 Select your language.

My device does not display the correct time

The device updates the time and date when it syncs with your smartphone or when the device acquires GPS signals. You should sync your device to receive the correct time when you change time zones, and to update for daylight saving time.

- 1 Hold the touchscreen, and select **Settings > System > Time**.
- 2 Verify the **Auto** option is enabled.
- 3 Select an option:
 - Confirm that your smartphone displays the correct local time, and sync your device to the smartphone ([Using the Garmin Connect App](#), page 17).
 - Select **Set Time with GPS**, go outdoors to an open area with a clear view of the sky, and wait while the device acquires satellite signals.

The time and date are updated automatically.

Maximizing Battery Life

You can do several things to extend the life of the battery.

- Reduce the backlight timeout ([Backlight Settings](#), page 20).
- Reduce the backlight brightness ([Backlight Settings](#), page 20).
- Turn off Bluetooth technology when you are not using connected features ([Turning Off the Bluetooth Smartphone Connection](#), page 4).

- Turn off 4G LTE when you are not using the features ([Using the Controls Menu](#), page 1).
- Turn off activity tracking ([Activity Tracking](#), page 9).
- Limit the smartphone notifications the device displays ([Managing Notifications](#), page 4).
- Stop broadcasting heart rate data to paired Garmin devices ([Broadcasting Heart Rate to Garmin Devices](#), page 8).
- Turn off wrist-based heart rate monitoring ([Turning Off the Wrist-based Heart Rate Monitor](#), page 8).

Restarting the Device

If the device stops responding, you may need to restart it.

NOTE: Restarting the device may erase your data or settings.

- 1 Hold the key for 15 seconds.
The device turns off.
- 2 Hold the key for one second to turn on the device.

Restoring All Default Settings

You can reset all of the device settings to the factory default values. You should sync your device with the Garmin Connect app to upload your activity data before you reset the device.

- 1 Hold the touchscreen.
- 2 Select **Settings > System > Reset**.
- 3 Select an option:
 - To reset all of the device settings to the factory default values and delete all user-entered information and activity history, select **Delete Data and Reset Settings**.
NOTE: If you have set up a Garmin Pay wallet, this option deletes the wallet from your device. If you have music stored on your device, this option deletes your stored music.
 - To reset all of the device settings to the factory default values and save all user-entered information and activity history, select **Reset Default Settings**.

Acquiring Satellite Signals

The device may need a clear view of the sky to acquire satellite signals.

- 1 Go outdoors to an open area.
The front of the device should be oriented toward the sky.
- 2 Wait while the device locates satellites.
It may take 30–60 seconds to locate satellite signals.

Improving GPS Satellite Reception

- Frequently sync the device to your Garmin Connect account:
 - Connect your device to a computer using the USB cable and the Garmin Express application.
 - Sync your device to the Garmin Connect app using your Bluetooth enabled smartphone.

While connected to your Garmin Connect account, the device downloads several days of satellite data, allowing it to quickly locate satellite signals.

- Take your device outside to an open area away from tall buildings and trees.
- Remain stationary for a few minutes.

Activity Tracking

For more information about activity tracking accuracy, go to garmin.com/ataccuracy.

My step count does not seem accurate

If your step count does not seem accurate, you can try these tips.

- Wear the device on your non-dominant wrist.
- Carry the device in your pocket when pushing a stroller or lawn mower.
- Carry the device in your pocket when actively using your hands or arms only.

NOTE: The device may interpret some repetitive motions, such as washing dishes, folding laundry, or clapping your hands, as steps.

The floors climbed amount does not seem accurate

Your device uses an internal barometer to measure elevation changes as you climb floors. A floor climbed is equal to 3 m (10 ft.).

- Avoid holding handrails or skipping steps while climbing stairs.
- In windy environments, cover the device with your sleeve or jacket as strong gusts can cause erratic readings.

Improving the Accuracy of Intensity Minutes and Calories

You can improve the accuracy of these estimates by walking or running outside for 15 minutes.

- 1 From the watch face, swipe to view the **My Day** widget.
- 2 Select ①.
- 3 Follow the on-screen instructions.

The temperature reading is not accurate

Your body temperature affects the temperature reading for the internal temperature sensor. To get the most accurate temperature reading, you should remove the watch from your wrist and wait 20 to 30 minutes.

You can also use an optional external temperature sensor to view accurate ambient temperature readings while wearing the watch.

Getting More Information

- Go to support.garmin.com for additional manuals, articles, and software updates.
- Go to buy.garmin.com, or contact your Garmin dealer for information about optional accessories and replacement parts.

Appendix

Data Fields

Some data fields require ANT+ accessories to display data.

24-Hour Max.: The maximum temperature recorded in the last 24 hours.

24-Hour Min.: The minimum temperature recorded in the last 24 hours.

30s Avg. Vertical Speed: The 30-second moving average of vertical speed.

500m Pace: The current rowing pace per 500 meters.

Average Cadence: Cycling. The average cadence for the current activity.

Average Cadence: Running. The average cadence for the current activity.

Average Distance Per Stroke: The average distance traveled per stroke during the current activity.

Average HR: The average heart rate for the current activity.

Average HR %Max.: The average percentage of maximum heart rate for the current activity.

Average Lap Time: The average lap time for the current activity.

Average Pace: The average pace for the current activity.

Average Speed: The average speed for the current activity.

Average Stroke Rate: The average number of strokes per minute (spm) during the current activity.

Average Strokes/Length: The average number of strokes per length during the current activity.

Average SWOLF: The average swolf score for the current activity. Your swolf score is the sum of the time for one length plus the number of strokes for that length ([Swim Terminology](#), page 12).

Avg. 500m Pace: The average rowing pace per 500 meters for the current activity.

Cadence: Cycling. The number of revolutions of the crank arm. Your device must be connected to a cadence accessory for this data to appear.

Cadence: Running. The steps per minute (right and left).

Calories: The amount of total calories burned.

Distance: The distance traveled for the current track or activity.

Distance Per Stroke: The distance traveled per stroke.

Elapsed Time: The total time recorded. For example, if you start the timer and run for 10 minutes, then stop the timer for 5 minutes, then start the timer and run for 20 minutes, your elapsed time is 35 minutes.

Elevation: The altitude of your current location above or below sea level.

Floors Climbed: The total number of floors climbed up for the day.

Floors Descended: The total number of floors climbed down for the day.

Floors per Minute: The number of floors climbed up per minute.

Heading: The direction you are moving.

Heart Rate: Your heart rate in beats per minute (bpm). Your device must be connected to a compatible heart rate monitor.

HR %Max.: The percentage of maximum heart rate.

HR Zone: The current range of your heart rate (1 to 5). The default zones are based on your user profile and maximum heart rate (220 minus your age).

Interval Distance: The distance traveled for the current interval.

Interval Distance Per Stroke: The average distance traveled per stroke during the current interval.

Interval Lengths: The number of pool lengths completed during the current interval.

Interval Pace: The average pace for the current interval.

Interval Stroke Rate: The average number of strokes per minute (spm) during the current interval.

Interval Strokes: The total number of strokes for the current interval.

Interval Strokes/Length: The average number of strokes per length during the current interval.

Interval SWOLF: The average swolf score for the current interval.

Interval Time: The stopwatch time for the current interval.

Lap 500m Pace: The average rowing pace per 500 meters for the current lap.

Lap Cadence: Cycling. The average cadence for the current lap.

Lap Cadence: Running. The average cadence for the current lap.

Lap Distance: The distance traveled for the current lap.

Lap HR: The average heart rate for the current lap.

Lap HR %Max.: The average percentage of maximum heart rate for the current lap.

Lap Pace: The average pace for the current lap.

Laps: The number of laps completed for the current activity.

Lap Speed: The average speed for the current lap.

Lap Steps: The number of steps during the current lap.

Lap Time: The stopwatch time for the current lap.

Last Interval Distance Per Stroke: The average distance traveled per stroke during the last completed interval.

Last Interval Stroke Rate: The average number of strokes per minute (spm) during the last completed interval.

Last Interval Strokes: The total number of strokes for the last completed interval.

Last Lap 500m Pace: The average rowing pace per 500 meters for the last lap.

Last Lap Cadence: Cycling. The average cadence for the last completed lap.

Last Lap Cadence: Running. The average cadence for the last completed lap.

Last Lap Distance: The distance traveled for the last completed lap.

Last Lap Pace: The average pace for the last completed lap.

Last Lap Speed: The average speed for the last completed lap.

Last Lap Time: The stopwatch time for the last completed lap.

Last Length Pace: The average pace for your last completed pool length.

Last Length Stroke Rate: The average number of strokes per minute (spm) during the last completed pool length.

Last Length Strokes: The total number of strokes for the last completed pool length.

Last Length SWOLF: The swolf score for the last completed pool length.

Lengths: The number of pool lengths completed during the current activity.

Maximum Speed: The top speed for the current activity.

Pace: The current pace.

Speed: The current rate of travel.

Steps: The number of steps during the current activity.

Stroke Rate: The number of strokes per minute (spm).

Strokes: The total number of strokes for the current activity.

Sunrise: The time of sunrise based on your GPS position.

Sunset: The time of sunset based on your GPS position.

Temperature: The temperature of the air. Your body temperature affects the temperature sensor.

Time in Zone: The time elapsed in each heart rate or power zone.

Time of Day: The time of day based on your current location and time settings (format, time zone, daylight saving time).

Timer: The stopwatch time for the current activity.

Total Ascent: The total elevation distance ascended during the activity or since the last reset.

Total Descent: The total elevation distance descended during the activity or since the last reset.

Vertical Speed: The rate of ascent or descent over time.

VO2 Max. Standard Ratings

These tables include standardized classifications for VO2 max. estimates by age and gender.

Males	Percentile	20–29	30–39	40–49	50–59	60–69	70–79
Superior	95	55.4	54	52.5	48.9	45.7	42.1
Excellent	80	51.1	48.3	46.4	43.4	39.5	36.7
Good	60	45.4	44	42.4	39.2	35.5	32.3
Fair	40	41.7	40.5	38.5	35.6	32.3	29.4
Poor	0–40	<41.7	<40.5	<38.5	<35.6	<32.3	<29.4

Females	Percentile	20–29	30–39	40–49	50–59	60–69	70–79
Superior	95	49.6	47.4	45.3	41.1	37.8	36.7
Excellent	80	43.9	42.4	39.7	36.7	33	30.9
Good	60	39.5	37.8	36.3	33	30	28.1
Fair	40	36.1	34.4	33	30.1	27.5	25.9
Poor	0–40	<36.1	<34.4	<33	<30.1	<27.5	<25.9

Data reprinted with permission from The Cooper Institute. For more information, go to www.CooperInstitute.org.

Wheel Size and Circumference

Your speed sensor automatically detects your wheel size. If necessary, you can manually enter your wheel circumference in the speed sensor settings.

The tire size is marked on both sides of the tire. This is not a comprehensive list. You can also measure the circumference of your wheel or use one of the calculators available on the internet.

Tire Size	Wheel Circumference (mm)
20 × 1.75	1515
20 × 1-3/8	1615
22 × 1-3/8	1770
22 × 1-1/2	1785
24 × 1	1753
24 × 3/4 Tubular	1785
24 × 1-1/8	1795

Tire Size	Wheel Circumference (mm)
24 × 1.75	1890
24 × 1-1/4	1905
24 × 2.00	1925
24 × 2.125	1965
26 × 7/8	1920
26 × 1-1.0	1913
26 × 1	1952
26 × 1.25	1953
26 × 1-1/8	1970
26 × 1.40	2005
26 × 1.50	2010
26 × 1.75	2023
26 × 1.95	2050
26 × 2.00	2055

Tire Size	Wheel Circumference (mm)
26 × 1-3/8	2068
26 × 2.10	2068
26 × 2.125	2070
26 × 2.35	2083
26 × 1-1/2	2100
26 × 3.00	2170
27 × 1	2145
27 × 1-1/8	2155
27 × 1-1/4	2161
27 × 1-3/8	2169
29 x 2.1	2288
29 x 2.2	2298
29 x 2.3	2326
650 x 20C	1938
650 x 23C	1944
650 × 35A	2090
650 × 38B	2105
650 × 38A	2125
700 × 18C	2070
700 × 19C	2080
700 × 20C	2086
700 × 23C	2096
700 × 25C	2105
700C Tubular	2130
700 × 28C	2136
700 × 30C	2146
700 × 32C	2155
700 × 35C	2168
700 × 38C	2180
700 × 40C	2200

Index

A

- accessories 20, 24
- activities 11, 12, 17
 - adding 11
 - custom 11
 - favorites 11
 - saving 11
 - starting 11
- activity tracking 9
- alarms 18, 19
- alerts 18
 - heart rate 8
- ANT+ sensors 20, 21
- applications 3, 4, 6, 14
 - smartphone 2, 11
- assistance 6, 7
- Auto Lap 18
- Auto Pause 18
- auto scroll 19

B

- backlight 1, 20
- bands 22
- battery
 - charging 21
 - maximizing 4, 20, 23
- bike sensors 21
- Bluetooth sensors 20
- Bluetooth technology 3, 4, 6, 19, 22
 - headphones 23
- Bluetooth Technology 4
- Bluetooth technology, headphones 6

C

- cadence
 - alerts 18
 - sensors 21
- calendar 15
- calibrating, compass 16
- calorie, alerts 18
- calories 24
- charging 21
- cleaning the device 22
- clock 19
- compass 13, 16
 - calibrating 16
- computer 6
- Connect IQ 2, 4
- contacts 2
 - adding 2, 6, 7
- controls menu 17
- countdown timer 19
- courses
 - downloading 12
 - playing 12, 13
 - selecting 12
- customizing the device 14, 17, 18
- cycling 12

D

- data
 - storing 14, 16, 17
 - transferring 14, 16, 17
 - uploading 17
- data fields 1, 4, 12, 18, 24
- deleting
 - history 16
 - personal records 15
- distance, alerts 18
- dogleg 13

E

- emergency contacts 2, 6, 7

F

- foot pod 1, 21

G

- Garmin Connect 2, 3, 6, 14–17, 20, 21
 - storing data 17
- Garmin Express, updating software 21
- Garmin Pay 4, 5
- goals 20
- golf round, ending 14
- GPS 1, 7
 - signal 23
- green view, pin location 13

H

- hazards 13
- headphones 23
 - Bluetooth technology 6, 23
 - connecting 6
- health stats 9
- heart rate 1, 7
 - alerts 8, 18
 - monitor 7, 8
 - pairing sensors 8
 - zones 8, 14, 16
- history 12, 16
 - sending to computer 14, 16, 17
 - viewing 14

I

- icons 1
- incident detection 6, 7
- indoor training 11
- intensity minutes 9, 24
- intervals 12

K

- keyboard 3
- keys 1, 22

L

- laps 16, 18
- layup 13
- lengths 12
- license 22
- LiveTrack 6, 7
- locations 15, 16
 - deleting 16
- locking, screen 1, 19

M

- main menu, customizing 10
- maps 15
- measuring a shot 13
- menstrual cycle 9
- menu 1
- messages 2, 3
- music 2, 5
 - loading 5, 6
 - playing 6
 - services 2, 5, 6
- music controls 6

N

- navigation 15, 16
 - stopping 16
- NFC 4
- notifications 3, 4
 - phone calls 4

P

- pairing
 - ANT+ sensors 8
 - sensors 20
 - smartphone 2, 22
- payments 4, 5
- personal records 15
 - deleting 15
- phone calls 4
- pin location, green view 13
- pool size
 - custom 12
 - setting 12
- power (force), alerts 18

- profiles, user 14

R

- replacement parts 22
- resetting the device 23

S

- satellite signals 1, 23
- saving activities 11, 12
- scorecard 13, 14
- scoring 13, 14
- screen 20
- settings 9, 10, 14, 17, 19, 20, 23
 - device 20
- shortcuts 1, 17
- skiing
 - alpine 12
 - snowboarding 12
- sleep mode 4, 9
- smartphone 1–4, 6, 10, 14, 22
 - applications 3, 11
 - pairing 2, 22
- snowboarding 12
- software
 - updating 21, 22
 - version 22
- specifications 22
- speed and cadence sensors 1, 21
- statistics 14
- stopwatch 19
- storing data 14, 16
- stress level 10
- strokes 12
- swimming 12
- swolf score 12
- system settings 19

T

- tempe 21, 24
- temperature 21, 24
- time 19
 - alerts 18
 - settings 19
- time of day 19, 23
- time zones 19
- timer 11, 12
 - countdown 19
- touchscreen 1
- tracking 6
- training 3
 - calendar 15
 - pages 12
 - plans 14, 15
- treadmill 11
- troubleshooting 2, 3, 7, 22–24

U

- unit ID 22
- units of measure 20
- updates, software 21, 22
- uploading data 17
- USB 22
- user profile 14

V

- VIRB remote 10
- VO2 max. 8, 25

W

- wallet 2, 4
- watch face 1
- watch faces 4, 17
- weather 10
- wheel sizes 21, 25
- widgets 1, 4, 5, 7, 10
- workouts 14, 15

Z

- zones
 - heart rate 8
 - time 19
