NOVEMBER 2022 SMARTWATCH AND CYCLING COMPUTERS FEATURE UPDATE

PRODUCT UPDATE

In an ongoing effort to improve our products and provide enhanced features to existing users, we are excited to announce our next smartwatch and cycling computers feature update. The update provides improved functionality and new features for a variety of our fitness and outdoor products.

The free software updates have begun rolling out and will continue to do so over the coming weeks. Customers can update their smartwatch or cycling computer by enabling automatic updates from their device or by using Garmin Express™.

Please see below for a few featured highlights found in the update as well as a detailed reference table at the end of the document.

SMARTWATCHES:

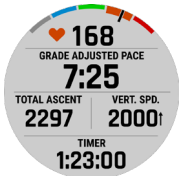

New notable features in this software release for fēnix® 7 series, epix™ (Gen 2), Tactix® 7, Enduro™ 2, MARQ® (Gen 2), Forerunner® 255 Series, Forerunner® 945 LTE (coming soon) and Forerunner® 955 Series smartwatches (Please reference the matrix on page three for which features are coming to each device):

WRIST-BASED RUNNING POWER (WITHOUT ACCESSORY):
To manage efforts, receive real-time metrics of how much power is being exerted on a run —now with no additional accessory required.

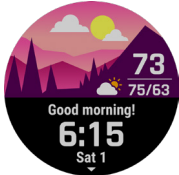

AUTO REST (ULTRARUN):
During an ultrarun activity, the watch automatically keeps track of time spent at an aid station or checkpoint—no need to worry about pausing the run activity.

GRADE ADJUSTED PACE:
Whether running uphill or downhill, runners can now see their equivalent flat ground pace, making it easy to maintain an even effort over various terrain.

BACKCOUNTRY SNOWBOARD:
This preloaded profile helps distinguish between snowboarding and climbing. It shows metrics specific to either ascent or descent.

MORNING REPORT:
Coming to more devices this quarter, morning report gives daily workout suggestions, information about last night's sleep and HRV status, plus when paired with a smartphone, the day's weather. The report can be customized so athletes can view only the details they want to see.

DISC GOLF:
Track stats with the new dedicated disc golf activity. And for those who want to keep score and get the distance to the basket for more than 14,000 disc golf courses on the wrist – try out the UDisc Connect IQ app.

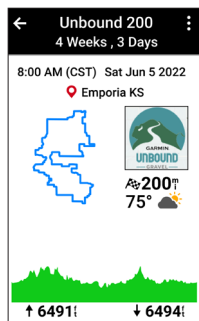

NEXTFORK™ MAP GUIDE:
See the distance to the next trail intersection as well as the name of the upcoming trail.

NOVEMBER 2022 SMARTWATCH AND CYCLING COMPUTERS FEATURE UPDATE

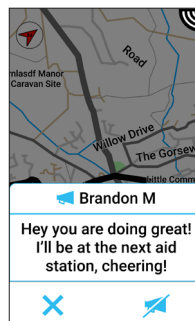

CYCLING COMPUTERS:

New notable features in this software release for Edge® 1040 Series and Edge® Explore 2 cycling computers:

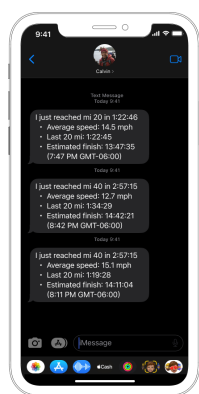

TARGETED ADAPTIVE COACHING:

Stay race-ready with training tips and daily suggested workouts. Plus, view the entire week of daily suggested workouts directly on device, which adapt to match performance, recovery and the demands of upcoming events in the Garmin Connect™ calendar. (Edge 1040 Series only)

SPECTATOR MESSAGING:

When paired to your smartphone, enjoy your ride, and stay motivated with text messages from family and friends.

LIVE EVENT SHARING:

When paired to your smartphone, automatically send live ride updates to family and friends — without lifting a finger. So while you're powering through, they can stay up to date with your speed, miles completed and more.
