

## SERVICE ALERT

NO.: 1716 Revision A

**TO:** Installers and dealers with the following Garmin® devices:

- Garmin GPSMAP® 74xx/76xx series chartplotters with software version 5.10 through 5.70
- GPSMAP 5x7/7x1 series chartplotters with software version 3.00 through 4.80
- GPSMAP 8x0/10x0 series chartplotters with software version 2.00 through 4.80
- echoMAP™ CHIRP 4x/5x/7x/9x series chartplotters with software version 3.00 through 3.50
- echoMAP 4x/5x/7x/9x series chartplotters with software version 2.00 through 3.50
- echoMAP 50/70 series chartplotters with software version 3.00 through 4.80

**DATE:** 18 April 2017

**SUBJECT:** MANDATORY SOFTWARE UPDATE to address potential track log issues.

---

### **ISSUE**

Garmin has recently discovered an issue that may affect devices if (1) a non-standard latitude/longitude format (position format other than hddd°mm.mmmm) is selected, (2) a specific software version is loaded, (3) detailed maps are not available, and (4) used in low visibility/nighttime conditions.

If the user has selected a standard latitude/longitude format, such as hddd°mm.mmmm', or has already updated the device software to the latest version, the device may no longer be affected.

This issue applies to the following models and software versions:

<b>Product Model Series</b>	<b>First Software Version with Issue</b>	<b>First Software Version with Fix</b>
GPSMAP 74xx/76xx	5.10 January 2015	7.00 February 2016
GPSMAP 5x7/7x1	3.00 December 2013	6.00 February 2016
GPSMAP 8x0/10x0	2.00 January 2014	6.00 February 2016
echoMAP CHIRP 4x/5x/7x/9x	3.00 January 2016	3.60 June 2016
echoMAP 4x/5x/7x/9x	2.00 January 2015	3.60 June 2016
echoMAP 50/70	3.00 December 2013	6.00 February 2016

#### Affected Position Formats:

- British Grid
- German Grid
- Irish Grid
- Finnish Grid
- RT 90 Grid
- Qatar Grid
- Modified RT 90 Grid
- Austrian Grid
- Swiss Grid
- New Zealand Grid
- Dutch Grid

## **RESOLUTION**

The problem can be corrected by updating the software to the latest version. Garmin always recommends updating devices to the newest software version available.

Please contact all customers who have purchased the affected products from you and inform them that a software update is available. If needed, up to 30 minutes of service and 30 minutes of travel time will be reimbursed under Garmin warranty to help facilitate these updates.

To check the current software version on the chartplotter, select **Settings > System > System Information > Software Information**.

To update the software, perform the following steps.

1. Download the latest Marine Software Update Bundle for the GPSMAP Series or the echoMAP Series available on the Garmin website at [garmin.com/support/software/marine.html](http://garmin.com/support/software/marine.html).

These update bundles contain the appropriate chartplotter software versions for your device.

2. Download the software update to an SD card following the instructions on the download page.
3. Update the device software following the instructions in your chartplotter owner's manual.

If needed, you can download the latest manual for your device at [garmin.com/manuals](http://garmin.com/manuals).

4. After the update is complete, select **Settings > System > System Information > Software Information** on your device to verify that the chartplotter software is the correct version.

If you have questions about the software update or calibrating the device, go to [support.garmin.com](http://support.garmin.com).

If you are not able to update the software, the problem can be corrected in the short term by changing the latitude/longitude selection.

1. Select **Settings > Preferences** (on some GPSMAP models) > **Units > Position Format**.
2. Select **hddd°mm.mmmm'**.

## **AFFECTED PRODUCTS**

echoMAP devices, with specific software versions listed above (SKUs listed):
