SERVICE ADVISORY

NO.: 1841 Rev C

TO: Marine Dealers and Customers
DATE: July 16, 2018
SUBJECT: Obscured Navigation Buoys on Garmin Chartplotters

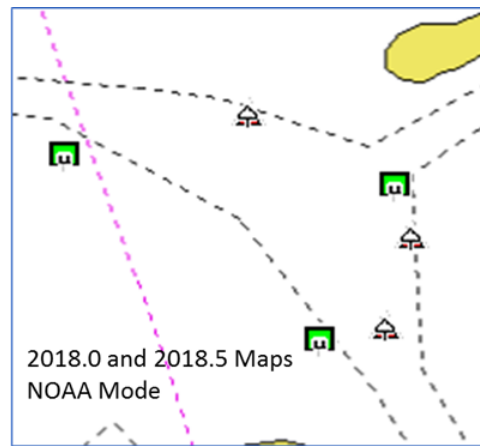

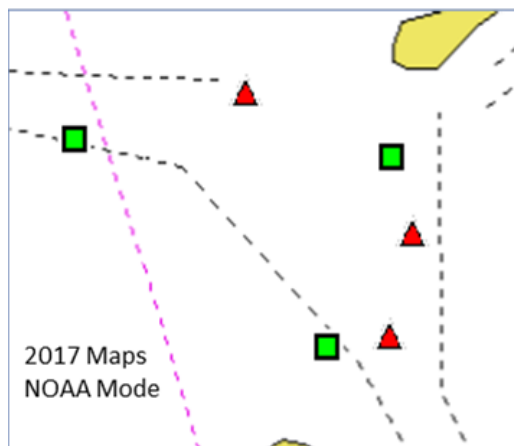

PRODUCTS AFFECTED

Chartplotters using 2018.0 and 2018.5 US coastal and Great Lakes cartography charts. See Appendix A and Appendix B for potentially affected products.

DESCRIPTION

Garmin is aware of the following issue that affects US coastal and Great Lakes chartplotter customers using 2018.0 or 2018.5 charts released in November 2017 and May 2018, respectively:

With the chartplotters navaid type set to NOAA, the buoy top marks draw over the green starboard buoy rectangles and red port buoy triangles, obscuring the red triangles, as shown below. This issue is most prevalent in the Intracoastal Waterway (ICW), but can also be observed in other areas along the US coastline and Great Lakes.

This issue could create confusion during navigation if the vessel operator is not paying attention to the navigational aids on the water. As stated in the written materials in Garmin chartplotter packaging, as well as on-screen chartplotter warnings, the operator must always defer to navigational aids and conditions on the waterway during vessel operation.

RESOLUTION

Updated cartography charts will be released in the near future. Until the updated charts are available to download, Garmin strongly recommends changing the chartplotter navaid type setting from NOAA to IALA because the IALA navaid representation is not affected.

Follow these instructions to change the navaid type.

From a chart view, select **MENU > Chart Setup > Chart Appearance > Symbols > Navaid > IALA.**

When the updated charts are available, Garmin will provide updated charts for affected registered chartplotter models using these applicable charts. For details, contact Garmin Product Support at support.garmin.com.

APPENDIX A – AFFECTED CHARTPLOTTER PRODUCTS

Garmin Part Number	Product Bundle/Name
010-N1281-01	echoMAP 42dv,WW,w/o XDCR,Refurbished
010-01279-10	echoMAP 43dv US LakeVu HD, OEM
010-01279-00	echoMAP 43dv, US LakeVu HD, w/XDCR
