

# JUNE 2024 SMARTWATCH AND CYCLING COMPUTER FEATURE UPDATE

In an ongoing effort to improve our products and provide enhanced features to existing users, we are excited to announce our next feature update for smartwatches and cycling computers. The update provides improved functionality and new features for a variety of our fitness and outdoor products.

The free software updates have begun rolling out and will continue to do so over the coming weeks. Customers can update their smartwatch or cycling computer by enabling automatic updates from their devices or by using Garmin Express™ software.

Please see the below for a few featured highlights found in this update as well as a detailed reference table at the end of the document.

## NEW FEATURES

Notable features in this software release include:

### GARMIN MESSENGER™ APP

It's here — direct messaging from your wrist! This app lets you communicate via two-way text, exchanging messages with friends and family directly from your smartwatch<sup>1</sup>.

### FIND MY PHONE FEATURE

During a GPS activity with your smartwatch, an enhanced Find My Phone tool automatically stores the location should your phone get lost or disconnected. This feature can notify you that your phone is no longer detected and help you easily navigate back to where it was last connected to your smartwatch.

### PIN DROP NAVIGATION

Drop a pin to share points of interest (POIs) from the Maps app on your iPhone® to the Garmin Connect™ app. Then you can sync to your compatible Edge® cycling computer or smartwatch for easy routing. You can even save those POIs to a library on your device.

### SRAM AXS INTEGRATION

Control and configure the data pages on your compatible Edge® cycling computer by using SRAM electronic shifting, so you can keep your hands on the handlebars and focus on the ride.
