

MARCH 2025 SMARTWATCH AND CYCLING COMPUTER FEATURE UPDATE

In an ongoing effort to improve our products and provide enhanced features to existing users, we are excited to announce our next feature update for smartwatches and cycling computers. The update provides improved functionality and new features for a variety of our fitness and outdoor products.

The free software updates have begun rolling out and will continue to do so over the coming weeks. Customers can update their smartwatch or cycling computer by enabling automatic updates from their devices.

Please see the below for a few featured highlights found in this update as well as a detailed reference table at the end of the document.

NEW FEATURES

Notable features in this software release include:

STRENGTH WORKOUTS FOR EXISTING GARMIN COACH RUNNING & CYCLING PLANS

If you're following or considering a Garmin Run Coach or Garmin Cycling Coach plan, this feature lets you opt in to supplementary strength training workouts to support your running or cycling goals. Choose options for body weight only or full gym access workouts.

PASSCODE

Help protect sensitive data if your watch ever gets lost or stolen. For extra passcode security, an auto wrist detection option will ask you to enter your PIN to regain access once the watch has been taken off your wrist.

KEYBOARD ENHANCEMENTS

Updates to the keyboard offer a simpler and more efficient means of responding to messages, entering data, or typing entries of any kind on your device. These enhancements include QWERTY alphabet and symbols layout, autocorrect and predictive text, and the ability to switch between different keyboard layout types, i.e., button or multitap.
